Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(b) **Agricultural Prices and Statistics.**—Assistant Professor Norton.
(c) **Farm Management.**—Professor Case.
(d) **Land Economics.**—Associate Professor Stewart.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Arrange. Associate Professor Stewart.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Arrange. Assistant Professor Norton.

---

[1]Sophomores in 1933-34 will be permitted to elect either Agricultural Economics 1 or 20 to fulfill prescribed course requirement.

Agr. Econ. 112. Agricultural Economics Research.—(1 to 2 units).* Credit is conditional on completion of acceptable report of investigation. Arrange. Associate Professor STEWART.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Arrange. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(1 to 2 units).* Arrange. Professor LLOYD.

AGRICULTURAL ENGINEERING

(c) **Horses.**—Professor EDMONDS.
(e) **Sheep.**—Assistant Professor KAMMLADE.
(g) **Swine.**—Professor CARROLL.
(j) **Poultry.**—Professor CARD.
(l) **Animal Nutrition.**—Professor MITCHELL.
(n) **Animal Genetics.**—Associate Professor ROBERTS.
(q) **Animal Pathology.**—Professor GRAHAM.
(s) **Meats.**—Associate Professor BULL.
(u) **Marketing.**—See Agr. Econ. 39. Associate Professor ASHBY.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 1 or 2.

3	Lect.	2	W	553 Agr.	BULL
	A Quiz	2	MF	553 Agr.	BULL
	B Quiz	11	TT	553 Agr.	BULL

An. Husb. 34. Anatomy and Physiology, and Non-Contagious and Parasitic Diseases of Farm Animals.—*Prerequisite:* An. Husb. 21. (3). 1 MWF; An. Path. L. Professor GRAHAM.

An. Husb. 36. Selection and Use of Meat.—(2). 9 TT; 403 Agr. Associate Professor BULL.

An. Husb. 38. Poultry Breeds and Judging.—*Prerequisite:* An. Husb. 37. (3). 3-4:30 MTWTF; Poultry Plant. (This course is concluded at the beginning of the Christmas recess). Dr. SLOAN.

From the students taking or having had this course will be chosen the team to represent the University in the Annual Mid-West Intercollegiate Student Poultry Judging Contest. The class will visit a near-by poultry show. The cost of the trip will be from $10 to $15.

---

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

An. Husb. 7. Principles of Animal Nutrition.—*Prerequisite:* Senior standing, including An. Husb. 21; Chem. 32. (5). Arrange. 553 Agr. Mr. HAMILTON.

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 22. Advanced Stock Judging.—*Prerequisite:* An. Husb. 3. (3). 3 MTWTF; S.P. Heads of divisions.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest.

An. Husb. 24. Meat Judging and Special Problems.—*Prerequisite:* An. Husb. 10 or 36. (2 to 5).* Arrange. Associate Professor BULL.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest. Students registering for meat judging only should register for 2 hours credit. This part of the course will terminate at Thanksgiving.

An. Husb. 25. Beef Production.—*Prerequisite:* An. Husb. 6. (3). 2 MWF; 316 New Agr. Professor RUSK, Associate Professor SNAPP.

An. Husb. 26. Pork Production.—*Prerequisite:* An. Husb. 6. (3). 9 MWF; 316 New Agr. Professor CARROLL.

An. Husb. 40. Economics of Poultry Keeping.—*Prerequisite:* Senior standing, including An. Husb. 37. (3). 8 MWF; 320 New Agr. Professor CARD.

Courses for Graduates

An. Husb. 112a-f. Research.—Arrange. One to three times a week. (½ to 2 units).*

(a) **Economic Factors Involved in Meat Production.**—Professor RUSK.
(b) **Systems of Livestock Farming.**—Professor CASE.
(c) **Animal Pathology.**—Professor GRAHAM.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

An. Husb. 117. Animal Genetics.—(1 unit). One to three times a week. Arrange. Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—(½ unit). Two hours a week. Arrange. Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—(½ to 1 unit).* Two to five times a week. Arrange. (Lab. fee $5). Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—(½ to 1 unit).* Two to five times a week. Arrange. Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Arrange. Associate Professor ROBERTS.

ARCHITECTURE

Courses for Undergraduates

ASTRONOMY

Course for Undergraduates

Astron. 1. Descriptive Astronomy.—The earth as an astronomical body; the solar system. *Prerequisite:* Sophomore standing. (3). 11 MWF, 229 N.H.; one hour Wednesday evening, Observatory. Professor BAKER.

Courses for Graduates

Astron. 101. Seminar.—(1 unit). 1 MWF; Observatory. Professor BAKER.

Astron. 103. Celestial Mechanics.—(1 unit). 11 TTS; Observatory. Professor BAKER.

BACTERIOLOGY

Note: Certain courses in this department require laboratory fees varying from $4 to $5.

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (Advanced Dairy Bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: chemistry and botany. At least eight hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

Bact. 5a. Introductory Bacteriology.—*Prerequisite:* Sophomore standing; or consent of the instructor.

Courses for Advanced Undergraduates and Graduates

Bact. 7a. Research and Special Problems.—*Prerequisite:* Junior standing; Bact. 5a and 5b (or 20); and Bact. 26 or 8; consent of instructor. Hours and credit to be arranged before registration. (3 to 5).* Professor TANNER, Assistant Professor WALLACE.

Bact. 20. General Bacteriology.—*Prerequisite:* Two years of college chemistry; senior standing; consent of instructor. Students with credit in Bact. 5a and 5b will not be allowed credit for Bact. 20. (5). Lect., 11 MWF; 303 Chem. Lab., 1-3 MW; 360 Chem. Assistant Professor WALLACE.

Bact. 26. Pathological Bacteriology.—*Prerequisite:* Bact. 5a and 5b (or 20); junior standing. (5). Lect., 8 TT; 103 Chem. Lab., 8-10 MWF; 367 Chem. Assistant Professor WALLACE.

Courses for Graduates

Bact. 103. Physiology of Bacteria.—(1 unit). Lect., 9 MW; 366 Chem. Professor TANNER.

Bact. 107. Research in Bacteriology.—(1 to 4 units).* Conference, arrange. Lab., arrange; 365 Chem. Professor TANNER.

Bact. 118a. Current Literature.—Required of all graduate students majoring in bacteriology. *Prerequisite:* 10 hours of bacteriology and consent of the instructor. (¼ unit). 1 Tu; 366 Chem. Professor TANNER.

BOTANY

Note: Certain courses in this department require laboratory fees varying from $.50 to $3 (per unit in graduate courses).

Major: 20 hours of botany exclusive of courses 1 and 5, and inclusive of courses 2a or 2b, 3, and at least 5 hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours in one or two departments chosen in consultation with the head of the department from the following list: agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

Bot. 33. Physiology.—*Prerequisite:* Bot. 3 and junior standing. (3 or 5).* 1-3 MWF; 155 N.H. Professor HOTTES and assistant.

Bot. 45. Histology, Anatomy, and Technic.—*Prerequisite:* 1 year of botany, inclusive of Bot. 2a or 2b, and junior standing. (3 or 5).* 8-10 MWF; 206 Entom. Professor BUCHHOLZ.

Bot. 46. Heredity and Evolution.—*Prerequisite:* 1 year of botany and junior standing. (3 or 5).* Lect., 10 S; Lab., 10-12 TT; 201 Entom. Professor BUCHHOLZ.

Bot. 56. Plant Geography of the World.—*Prerequisite:* Botany 8 and junior standing. (3 or 5).* 10-12 MWF; 216 N.H. Associate Professor VESTAL.

Bot. 70. Taxonomy of Pathogenic Fungi.—*Prerequisite:* Bot. 7 or 42, and junior standing. (3 or 5).* Arrange, 304 N.H. Professor STEVENS.

Courses for Graduates

Bot. 110. Botanical Discussion.—No credit. Required of all graduate students in botany and members of the instructional staff. 4 Tu; 258 N.H.

Bot. 112. Discussions in Plant Morphology.—(¼ unit). 4 F; 205 Entom. Professor BUCHHOLZ.

Bot. 113. Discussions in Physiology.—(¼ unit). 4 Th; 155 N.H. Professor HOTTES.

Bot. 117. Discussions in Pathology and Mycology.—(¼ unit). 4 W; 304 N.H. Professor STEVENS.

Bot. 118. Discussions in Ecology.—(¼ unit). 4 M; 204 N.H. Associate Professor VESTAL.

Research Courses

Bot. 120. Morphology.—(½ to 2 units).* (Botany 112 to be taken concurrently.) 1 hour on either W or F, from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 130. Physiology.—(½ to 2 units).* (Botany 113 to be taken concurrently.) 1 hour on M, W, or F, from 1 to 3, the rest arrange; Botany Annex. Professor HOTTES.

Bot. 170. Pathology or Mycology.—(½ to 2 units).* (Botany 117 to be taken concurrently.) 1 hour on either M or W, from 2 to 4; the rest arrange. 304 N.H. Professor STEVENS.

Bot. 180. Plant Ecology or Geography.—(½ to 2 units).* (Botany 118 to be taken concurrently.) 1 hour on Tu from 1 to 3, the rest arrange; 204 N.H. Associate Professor VESTAL.

BUSINESS ORGANIZATION AND OPERATION

(Including Accountancy and Business Law)

A. ACCOUNTANCY

Courses for Undergraduates

Accy. 1a. Principles of Accounting.—Beginners' course. (Students who present one unit of bookkeeping for entrance will not be allowed credit in Accy. 1a and should register in Accy. 1e. Students who have failed in Accy. 1a may register in Accy. 1e and will receive 3 hours credit if their final grade is "C" or above.)

	B	9	MWF	222 Com.	Dillavou

D. BUSINESS ENGLISH

(See Rhetoric 10, 21, and 22 under English Department.)

CERAMIC ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2.00 to $7.50.

Courses for Undergraduates

Cer.E. 1. Ceramic Materials.—*Prerequisite:* Chem. 4.

3	A	8	MWF	214 Cer.
	B	8	MWF	218 Cer.

Cer.E. 21. Ceramic Pyrometry.—*Prerequisite:* General physics; inorganic chemistry. (1). 8 Tu; 214 Cer.

Cer.E. 97. Thesis.—(3 to 5).* Arrange.

Cer.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Advanced Undergraduates and Graduates

Cer.E. 5. Ceramic Bodies.—*Prerequisite:* Cer. 1, 4. (5). 10 MWF, 218 Cer.; 2-5 MWF, 113-114 Cer.

Cer.E. 7. Structural Clay Products.—*Prerequisite:* Cer. 1, 4. (3). Lect. and quiz, 11 MWF; 218 Cer.

Cer.E. 16. Enamels.—*Prerequisite:* Cer. 14. (3). 8 Th, 214 Cer.; 9-12 TT, 102, 113-114 Cer.

Cer.E. 18. Ceramic Microscopy.—*Prerequisite:* Chem. 40; Geol. 47 and 49 or equivalent. (3). 1-4 TT, 9-12 S; 312 Cer.

Cer.E. 22. Kilns and the Burning of Clay Products.—*Prerequisite:* Cer. 5 and 11. (3). 11 MWF; 214 Cer.

Cer.E. 23. Dryer and Kiln Design.—*Prerequisite:* Cer. 11; registration in Cer. 22; G.E.D. 1 or 4. (2). 2-5 MF; 212 Cer.

---

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

Cer.E. 101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

Cer.E. 103. Chemistry of the Silicates.—Laboratory to supplement Ceramic Engineering 101, which must precede or accompany it. (1 to 2 units).*

Cer.E. 106. Research.—Professors PARMELEE, HURSH, ANDREWS.

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42b, 43b, 50a, and courses in the industrial, sanitary, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7 a student is permitted to register in Chem. 2; or upon passing a proficiency examination in Chem. 2, he may register in Chem. 4, 5, or 6.

38 Quiz	9	MW	210 Chem.A., 163 Chem.
Lab.	1–3	M	201 Chem.A.

Chem. 2. Inorganic Chemistry (concluded)

Primarily for students in the College of Agriculture:

Credits	Section	Hours	Days	Room	Instructor
2, 3, or 5[1]	40 Quiz	8	TT	303 Chem.	
	Lab.	8–10	S	201 Chem.A.	
[1]Seniors will receive only 2 hours credit in Chem. 2. Students below the rank of senior receive 5 hours credit, provided their high school chemistry has not been used for entrance and their final grade in Chem. 2 is "C" or above.	42 Quiz	10	TT	204 Chem.	
	Lab.	8–10	Th	1 Chem.A.	

For students majoring in home economics:

44 Quiz	8	TT	301, 161 Chem.
Lab.	8–10	M	201 Chem.A.

For students in the curricula of chemistry and chemical engineering:

47 Quiz	11	MW	300, 301 Chem.
Lab.	1–3	Tu	201 Chem.A.
48 Quiz	10	MW	9, 308 Chem.A.
Lab.	1–3	Th	201 Chem.A.

Chem. 3. Inorganic Chemistry.—(For engineering students who have had no chemistry.) Students may register for any lecture section, but are required to take the quiz and laboratory in some one section. *Note:* Students who have credit for high school chemistry should register for Chem. 2 rather than Chem. 3.

Credits	Section	Hours	Days	Room	Instructor
3 or 4[1]	A Lect.	11	TT	100 Chem.	AUDRIETH
	B Lect.	9	TT	100 Chem.	QUILL
[1]Students who have used their high school chemistry for entrance credit are given only 3 hours credit for Chem. 3. Seniors will receive only 3 hours credit.	81 Quiz	8	WF	300 Chem.	
	Lab.	1–3	TT	1 Chem.A.	
	82 Quiz	1	WF	303 Chem.

Chem. 90a. Thesis.—(*Note:* Senior research in chemistry and chemical engineering optional instead of required. Each student who desires research must receive special permission both from the instructor under whom he is to work and from the head of the division in which the research is to be taken. Such written permission should be presented, at the time of registration, to the adviser for the chemists or chemical engineers.) *Prerequisite:* Chem. 24, 34a, 40, 41, 42, and 43, or the consent of the head of the department. (3 to 5).* Professor ADAMS (in charge).

Courses for Advanced Undergraduates and Graduates

Chem. 15a. Inorganic Chemistry.—*Prerequisite:* Senior standing.

2		9	MW	112 Chem.A.	QUILL

Chem. 16a. Inorganic Chemistry.—(Laboratory.) *Prerequisite:* Senior standing, registration or credit in Chem. 15a.

2	Conf.	9	F	301 Chem.	AUDRIETH
	Lab.	Arrange		350 Chem.	

Chem. 27. Special Methods and Instruments in Quantitative Analysis.—*Prerequisite:* Chem. 24, 34a, 40 and 41, or registration in 40 and 41.

3	Lect.	11	Tu	161 Chem.	SMITH
	A Lab.	1–4	TT	305 Chem.	
	B Lab.	1–4	F	305 Chem.

---

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 62a. Principles of Research and Development.—*Prerequisite:* Senior standing in chemistry or chemical engineering. (2). Lect., 10 MW; 161 Chem. Professor KEYES.

Chem. 73a. Metallurgy.—*Prerequisite:* Senior standing in engineering courses only. (3). Lect., 8 MWF; 161 Chem. Mr. HOWARD.

Chem. 86a. Chemistry of Sanitation.—*Prerequisite:* Chem. 24. Lectures, demonstrations, and field trips. (3). 10 MWF; 162 Chem. Professor BUSWELL.

Chem. 92a. Chemical Literature and Reference Work.—(Required of juniors in chemistry; expected also of juniors taking major work in chemistry.) *Prerequisite:* 18 hours of chemistry, one year of French or German, junior standing.

Credits	Section	Hours	Days	Room	Instructor
1	A	10	Th	201 Chem.	BARTOW
	B	8	F	201 Chem.	
Graduates only....	K	4	M	201 Chem.	

Chem. 95a. History of Science with Particular Reference to Chemistry.—*Prerequisite:* Junior standing and 20 hours of laboratory science. (2). 8 TT; 111 Chem. Dr. BARTOW.

Courses for Graduates

Chem. 101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼ to 1 unit).* Professor HOPKINS.

Chem. 105a. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 11 S; 162 Chem. Special topic: Mechanism of reactions. (Dr. Copley). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 123a. Qualitative Analysis.—(½ unit). Lectures. 11 MF; 162 Chem. Associate Professor REEDY.

Chem. 123c. Qualitative Analysis.—(Laboratory work, optional, to accompany Chem. 123a.) (¼ to ¾ unit).* Arrange. Associate Professor REEDY.

Chem. 125a. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 4 Th; 162 Chem. Professor CLARK.

Chem. 126a. Quantitative Instrumental and Chemical Methods of Analysis in Organic Chemical Research.—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½ unit). Lectures. 8 TT; 308 Chem.A. Assistant Professor ENGLIS.

Chem. 126c. Quantitative Instrumental and Chemical Methods of Analysis in Organic Chemical Research.—(Laboratory work, optional, to accompany Chem. 126a.) (¼ to ¾ unit).* Arrange; 305a Chem. Assistant Professor ENGLIS.

Chem. 127a. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures. 10 TT; 217 Chem. Professor CLARK.

Chem. 127c. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127a.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 132a. Organic Chemistry.—(First course.) (¾ unit). 11 TT; 217 Chem. Professor FUSON.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor FUSON.

Chem. 135a. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 10 W; 111 Chem. Professor ADAMS.

Chem. 136a. Organic Chemistry.—Special Topics. (¾ unit). 11 TT; 103 Chem. Associate Professor SHRINER.

Chem. 145a. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 152a. Physiological Chemistry.—Chiefly laboratory. (½ to 1 unit).* Arrange. 467b Chem. Professor ROSE.

Chem. 155a. Physiological Chemistry.—(Seminar required of all students majoring in physiological chemistry). (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160a. Advanced Chemical Technology and Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186a. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. 60b Chem. Professor BUSWELL.

---

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS.

Inorganic Chemistry.—Professor HOPKINS; Associate Professor REEDY; Dr. AUDRIETH, Dr. BAILAR, Dr. STILLWELL, Dr. QUILL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK; Associate Professor REEDY; Assistant Professors SMITH, ENGLIS.

Food Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK, Dr. STILLWELL.

Organic Chemistry.—Professors NOYES, ADAMS, MARVEL, FUSON; Associate Professor SHRINER; Dr. BAILAR.

Zymochemistry.—Professor BUSWELL.

Phytochemistry.—Assistant Professor ENGLIS.

Physiological Chemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES; Associate Professor KRASE; Assistant Professor KISTLER.

Ceramic Chemistry.—Professor PARMELEE.

CIVIL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $2.50.

Courses for Undergraduates

C.E. 1. Plane Surveying.—*Prerequisite:* Math. 4, G.E.D. 1 or 4.

C.E. 140. Research.—(½ to 2 units).* Arrange.

C.E. 198. Thesis.—(1 to 2½ units).* Arrange.

CLASSICS

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, and 17.

Minors: 20 hours chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Major: 20 hours, excluding Latin 11a-11b, 6, 1a-1b, 13, and 20, and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours chosen from not more than two of the following: foreign language (Greek being especially recommended), English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17 and Latin 11a-11b, 6, 1a-1b, 9, 13, 20. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours chosen from not more than two of the following: foreign language, English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

GREEK

Courses for Undergraduates

Greek 1a. Elementary Greek.—(4). 11 TWTF; 120 L.H. Associate Professor PERRY.

Greek 3. Second Year Greek: Plato.—*Prerequisite:* Greek 1a-1b. (3). 11 MWF; 114 L.H. Mr. DALY.

Greek 15. Greek and Roman Sports.—*Note:* This course does not presuppose a knowledge of Greek. (2). 10 MW; 202 L.H. Mr. RAPP.

Greek 16. Life of the Ancient Greeks.—*Prerequisite:* Sophomore standing. *Note:* This course does not presuppose a knowledge of Greek. (1). 3 Th; 120 L.H. Mr. RAPP.

Courses for Advanced Undergraduates and Graduates

Greek 6. Thucydides and Plato.—*Prerequisite:* Greek 3 and 4 or an equivalent. (3). 9 TTS; 114 L.H. Associate Professor PERRY.

Greek 18. Greek Archaeology.—*Prerequisite:* Sophomore standing. *Note:* This course does not presuppose a knowledge of Greek. (2). 2 TT; 120 L.H. Mr. RAPP.

Greek History.—See History 55. 1 MWF; 202 L.H. Professor OLDFATHER.

Ind. Ed. 2. Advanced Industrial Arts.—

4	Lect.	3	TT	304 Adm.(E)	BRAUCHER and
	Shop A	2–4	MWF	Pat. Lab.	assistant

Note: The following courses given by departments not in the College of Education may be presented as meeting in part the requirements for the 25 hours in Industrial Education.

G.E.D. 1. Elements of Drawing.—(4). (See General Engineering Drawing).

G.E.D. 2. Descriptive Geometry.—(4). (See General Engineering Drawing).

G.E.D. 4. Advanced Drawing.—(4). (See General Engineering Drawing).

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Journ. 9a. **History and Practice of Printing and Publishing.**—(2 or 3). (See Journalism).

M.E. 85. **Pattern and Foundry Laboratory.**—(3). (See Mechanical Engineering).

M.E. 87. **Machine Laboratory.**—(3). (See Mechanical Engineering).

Courses for Advanced Undergraduates and Graduates

Ind. Ed. 41. **Survey of Vocational Education.**—(Same as Ed. 41 and Ind. Ed. E. 41.) *Prerequisite:* Senior standing. (3). 9 MWF; 304 Adm.(E). Professor Mays.

Ind. Ed. 53. **Problems of Industrial Education.**—(Same as Ed. 53.) *Prerequisite:* Junior standing or consent of instructor. (3). 10 MWF; 304 Adm.(E). Professor Mays.

Ind. Ed. 54. **Problems and Methods of the Part-Time School.**—(Same as Ed. 54.) *Prerequisite:* Senior standing. (2). 9 TT; 304 Adm.(E). Professor Mays.

Ind. Ed. 57. **Methods of Trade Teaching.**—(3). Arrange. 310 Adm.(E). Professor Mays.

Ind. Ed. 62. **History and Organization of Industrial Arts.**—(3). 11 MWF; 310 Adm.(E). Professor Mays.

Extra-mural Courses

Ind. Ed. E. 41. **Survey of Vocational Education.**—(Same as Ed. 41 and Ind. Ed. 41). Extra-mural. Dr. Bawden.

Ind. Ed. E. 52. **Teaching Related Trade Subjects.**—Extra-mural. Dr. Bawden.

Ind. Ed. E. 53. **Problems of Industrial Education.**—(Same as Ed. 53 and Ind. Ed. 53). Extra-mural. Dr. Bawden.

Ind. Ed. E. 54. **Problems and Methods of the Part-Time School.**—(Same as Ed. 54 and Ind. Ed. 54). Extra-mural. Dr. Bawden.

Ind. Ed. E. 54a. Continuation of Ind. Ed. E. 54.

Ind. Ed. E. 55. **Problems of Vocational Guidance.**—(Same as Ed. 55 and Ind. Ed. 55). Extra-mural. Dr. Bawden.

Ind. Ed. E. 55a. Continuation of Ind. Ed. E. 55.

Ind. Ed. E. 56. **Teaching Shopwork.**—*Prerequisite:* (a) Two years of trade or industrial experience beyond apprenticeship; (b) completion of elementary school curriculum. Extra-mural. Dr. Bawden.

Ind. Ed. E. 56a. Continuation of Ind. Ed. E. 56.

ELECTRICAL ENGINEERING

Note: Certain courses in this department require laboratory fees of $2.00.

Courses for Graduates

Note: Courses offered to junior and senior students in electrical engineering are open for minor credit to students majoring in other departments who have the proper prerequisites.

E.E. 101. Advanced Courses in Alternating Currents.—(A) Graduate seminar; (B) Circuit transients; (C) Machine transients; (D) Symmetrical components. (½ to 2 units).* Arrange. Professor PAINE, Associate Professor KNIGHT, Assistant Professors KRAEHENBUEHL, KEENER.

E.E. 102. Electric Waves, Oscillations, and Transients.—(A) Theory of electric waves, oscillations, and transients; (B) Demonstration lecture; (C) Theory of energy radiation; (D) Principle of television engineering. (½ to 2 units).* Arrange. Assistant Professors REICH, BROWN.

*In registering for a course with variable credit, as 1-2 units or 2-4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

E.E. 103. Electric Design.—(A) Power plant design; (B) Machine design; (C) Illumination practice and design. (1 unit). Arrange. Associate Professor WALDO, Assistant Professor KRAEHENBUEHL.

E.E. 104. Courses in Electronics.—(A) Theoretical electronics; (B) Vacuum tubes and amplifiers; (C) Photoelectric cells, gaseous control tubes, and inverters. (1 unit). 10 MWF; 109 E.H. Laboratory to be arranged. Assistant Professor REICH.

E.E. 105. Electrical Engineering Research.—(A) Special problems; (B) Thesis. (1 to 3 units).* Arrange. Professors PAINE, TYKOCINER; Associate Professors WALDO, KNIGHT; Assistant Professors BROWN, REICH, KEENER, KRAEHENBUEHL.

ENGLISH

(Including Rhetoric, Speech, and Scandinavian Languages)

Major: 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and *including* at least 10 hours in English literature, at least 3 hours in composition, and two courses from the advanced group in English literature.

Minors: 20 hours in (a) Latin or Greek or French or German or Spanish; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history; or (e) in history and philosophy. No language courses may be regarded as satisfying the minor requirement if they are excluded from the majors of the language departments (excepting elementary courses in Greek, Latin, French 2a, and Spanish 2a). At least eight hours must be offered in each subject.

Major in Speech

Major: 10 hours in speech, inclusive of Speech 7 and 8 and either 4 or 6; and 10 hours of English, exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature from the advanced group.

Minors: 20 hours, in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, law, or sociology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in English 10 and Rhetoric 1-2.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. It is prerequisite to all other courses in the department except 2, 31, and 32, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

3[1]	A	8–10	MWF	309 Entom.	HAYES, MILUM
[1]Seniors will receive only 2 hours credit.	B	10–12	MWF	309 Entom.	METCALF, BALDUF, KEARNS
	C	1–3	MWF	309 Entom.	METCALF, MILUM, KEARNS

Entom. 2. Insects: Their Ways and Their Relations to Man.—A non-technical, cultural course of illustrated lectures. *Prerequisite:* 30 hours of university work. (Not open to students who have taken Entom. 1.)

2	A	11	TT	202 Entom.	BALDUF and others
	B	2	TT	202 Entom.	

Entom. 3a. Classification of Insects: Orders with gradual metamorphosis and principles of systematic entomology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (5). Lab., 8-10 MWF; lect. to be arranged; 310 Entom. Assistant Professor BALDUF.

Entom. 8a. Economic Entomology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (3 or 5).* (For 5 hours credit additional work on an insect collection is assigned). 8-11 TT; 312 Entom. Associate Professor HAYES.

Entom. 31. Essentials of Beekeeping.—*Prerequisite:* 30 hours of university work. (1 or 2).* Lect. 4 Tu; for 2 hours credit include lab. 3-5 Th; 104 Vivarium. Assistant Professor MILUM.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Members of the department.

Entom. 10a. Morphology of Immature Insects.—*Prerequisite:* Entom. 7a and senior standing. (3). 10-12 MWF; 310 Entom. Associate Professor HAYES.

Entom. 20. Insect Control.—*Prerequisite:* Entom. 1 and senior standing. (4). 1-4 TT; 109 Entom. Professor METCALF.

Courses for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 100. Research.—(½ to 4 units).* Time to be arranged.

(a) **Morphology and Embryology of Insects.**—Associate Professor HAYES.
(b) **Economic Entomology.**—Professor METCALF.
(c) **Systematic Entomology.**—Professor METCALF, Assistant Professor BALDUF.
(d) **Biology and Ecology of Insects.**—Professor METCALF.

GAS ENGINEERING

Courses for Undergraduates

Gas E. 41. Design.—*Prerequisite:* Senior standing in Gas Engineering. (3). 9, 1-4 Th, 1-4 F; 207 T.B. Assistant Professor MITCHELL.

Gas E. 51. Manufacture of Gas.—*Prerequisite:* Senior standing in Gas Engineering. (2). Arrange. 206 T.B. Professor CALLEN, Assistant Professor MITCHELL.

Gas E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

GENERAL ENGINEERING DRAWING

Note: All courses in this department require laboratory fees of $1.50.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9 and 19. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

Math. 2. College Algebra.—*Prerequisite:* Entrance algebra, 1½ units; plane geometry, 1 unit.

Math. 100. Seminar and Thesis.—(1 to 2 units).* Arrange.

Math. 113. Linear Differential Equations.—(1 unit). 11 MWF; 254 Math. Professor Carmichael.

Math. 131. Algebraic Geometry.—(1 unit). 9 TTS; 254 Math. Professor Coble.

Math. 135. Differential Geometry.—(1 unit). 10 TTS; 366 Math. Assistant Professor Levy.

Math. 170. Algebra.—(1 unit). 9 MWF; 366 Math. Associate Professor Hazlett.

Math. 171. Analysis.—(1 unit). 2 MWF; 254 Math. Dr. Ketchum.

Math. 172. Geometry.—(1 unit). 8 MWF; 254 Math. Professor Emch.

MECHANICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $4.50.

Courses for Undergraduates

M.E. 1. Steam and Air Machinery.—*Prerequisite:* Math. 9, Physics 1 and 3.

3	E	1	MWF	208 M.E.L.
	F	8	MWF	208 M.E.L.
	GU	10	MWF	216 M.E.L.

3	P	2–4	MWF	Mach. Lab.
	QW	8–10	MWF	Mach. Lab.

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

M.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Associate Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor MacIntire.

M.E. 109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week. Arrange. Professor LEUTWILER.

M.E. 112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration; heating and ventilation. Original work. (1½ units). Three times a week. Arrange. Professors WILLARD, POLSON, KRATZ, HAM, and MACINTIRE.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses.

Mil. Bands 1. Freshman Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director DVORAK, Mr. OVERGARD.

Mil. Bands 3. Sophomore Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director DVORAK, Mr. OVERGARD.

Mil. Bands 5. Junior Band.—Twice a week, by assignment. Director HARDING, Assistant Director DVORAK, Mr. OVERGARD.

Mil. Bands 7. Senior Band.—Twice a week, by assignment. Director HARDING, Assistant Director DVORAK, Mr. OVERGARD.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

MINING ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $7.50.

Courses for Undergraduates

Mining 1. Elements of Mining.—(For students in Mining Engineering only.) *Prerequisite:* Physics 1b-3b. (3). 9 TT, 8-10 S; 206 T.B. Mr. NICHOLSON.

Mining 2. Mining Principles.—(For students in courses other than mining.) *Prerequisite:* Chemistry; sophomore standing. (3). 11 TTS; 206 T.B. Mr. NICHOLSON.

Mining 6. Mechanical Engineering of Mines.—*Prerequisite:* Mining 4 and 10; M.E. 62; T.A.M. 2. (3). 10 MWF; 206 T.B. Professor CALLEN.

Mining 8. Mine Administration.—*Prerequisite:* Mining 4. (3). 10 TTS; 206 T.B. Mr. NICHOLSON.

Mining 9. Preparation of Coal and Ores.—*Prerequisite:* Chemistry 22, Physics 1b-3b, Geol. 20 or equivalent. (3). 11 TT; 1-4 W; 207 T.B. and Mining Lab. Assistant Professor MITCHELL.

Mining 13. Utilization of Fuels.—*Prerequisite:* Chem. 22; junior standing in College of Engineering. (3). 9 MF, 1-4 Tu; 206 T.B. and Mining Lab. Professor CALLEN.

Mining 41. Mining and Metallurgical Design.—*Prerequisite:* C.E. 88a, senior standing in Mining Engineering. (3). 9, 1-4 Th, 1-4 F; 207 T.B. Assistant Professor MITCHELL.

Mining 61. Elementary Mine Surveying.—*Prerequisite:* G.E.D. 1 or 4, Math. 4. (3). 1 M, 1-4 WF; 207 T.B. Mr. NICHOLSON.

Mining 69. Fire Assaying.—*Prerequisite:* Chem. 22, Geol. 20. (2). 1-5 M, 9 Tu; 207 T.B. and Mining Lab. Assistant Professor MITCHELL.

Mining 97. Thesis.—Hours arranged when thesis is permitted, in accordance with the regulations of the College of Engineering.

Mining 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

Mining 101. Advanced Mining Practice.—(1 unit). Arrange. Professor CALLEN.

Mining 102. Advanced Preparation of Coal and Ores.—(1 unit). Arrange. Assistant Professor MITCHELL.

Mining 104.[1] **Mining Reports.**—(1 unit). Arrange. Professor CALLEN.

Mining 105.[1] **Welfare Work and Education among Mine Employees.**—(1 unit). Arrange. Professor CALLEN.

Mining 106.[1] **Advanced Coal, Ore, and Metallurgical Plant Design.**—(1 unit). Arrange. Assistant Professor MITCHELL.

Mining 107.[1] **Advanced Non-Ferrous Metallurgical Projects.**—(1 unit). Arrange. Assistant Professor MITCHELL.

MUSIC

Music 1. History of Music.—*Prerequisite:* One year of university work. (2). 11 MWF; Lecture Room, S.M.H. Professor SCHWARTZ.

PHYSICAL EDUCATION FOR MEN

Note: The University requires each student to secure 4 hours of credit in Physical Education. Men students may secure this credit in the following ways:

1. Passing courses selected from the list presented below—1 hour for each course.
2. Passing proficiency examinations in courses selected from the list presented below—1 hour of credit for each course. Each activity included in a double activity course (e.g., Golf and Skating) will be counted as ½ hour of credit. Students passing a proficiency examination in two such activities placed in different courses (e.g., Golf and Handball) will receive 1 hour of credit toward meeting the requirement. Proficiency examinations will be offered in the following courses: P.E. 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, and 37. The dates for these examinations will be announced. Proficiency examinations will not be offered in the following courses: P.E. 20, 21, 22, 23, 38, 39, 40, 41, and 42.
3. Securing a numeral or letter in any varsity sport—1 hour of credit for each separate sport.

Students who possess organic defects are required to take the courses entitled Individual Corrective Activities until exempted by the University Health Officer. A student may secure 1, 2, 3, or 4 semester hours in this manner.

For information, late registration, changing sections, call at Room 201, Men's Old Gymnasium.

Courses for Undergraduates

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, or 6), or education.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 44, 60, 61.
Senior year: Physics 23, 30, 62, 71, 72, 78.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Zool. 31. Introduction to Parasitology.—*Prerequisite:* Zool. 1 and 2 and junior standing. (2). 3-5 TT; 330 N.H. Assistant Professor THOMAS.

Zool. 63. Comparative Vertebrate Embryology.—*Prerequisite:* One year of zoology and senior standing. (2 to 5).* Arrange. Professor SHUMWAY.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year's undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 102. Evolution of the Vertebrates.—(½ unit). Arrange. Assistant Professor ADAMS.

Zool. 106. Topics in Vertebrate Embryology.—(1 unit). Arrange. Professor SHUMWAY.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 229 N.H. Professor ZELENY.

Zool. 117. Advanced Field and Faunistic Zoology.—(1 unit). 8-12 TT; 420 N.H. Professor VAN CLEAVE.

Individual Research Courses

Zool. 121. Invertebrate Morphology and Parasitology.—(1 to 2 units).* Arrange. Members of the department.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Assistant Professor ADAMS.

Zool. 123. Faunistic and Systematic Zoology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—Time and credits to be arranged. Professor SHELFORD.

Zool. 126. Vertebrate Embryology.—(1 to 2 units).* Arrange. Professor SHUMWAY.

EXPLANATION

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, under Art 35a-35b, Commercial Art, the prerequisites given are Art 27b and 31b. These two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

TIME TABLE FOR COURSES OF INSTRUCTION

SECOND SEMESTER, 1933-1934

AGRICULTURAL COLLEGE EXTENSION

Course for Undergraduates

Agr. Coll. Ext. 6. Agricultural Extension.—*Prerequisite:* Junior standing. (2). 10 TT; 118 New Agr. Associate Professor HUDELSON and others.

AGRICULTURAL ECONOMICS

Courses for Undergraduates

†**Agr. Econ. 1. Introductory Agricultural Economics.**—Required of all agricultural students entering September, 1933, and subsequently.

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	3	W	103 New Agr.	ROSS
	Disc. A	3	MF	313 New Agr.	
	Disc. B	10	MW	313 New Agr.	
	Disc. C	2	TT	313 New Agr.	

†**Agr. Econ. 20. Farm Management.**—*Prerequisite:* Sophomore standing. Local field trips will be arranged; estimated cost, $3.

3	Lect. and Disc.	10	TT	316 New Agr.	WILCOX
	S Lab.	1–3	Th	331 New Agr.	and
	T Lab.	1–3	F	331 New Agr.	others

Agr. Econ. 40. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.

(b) **Agricultural Marketing.**—Members of the department.
(d) **Agricultural Prices and Statistics.**—Assistant Professor NORTON.
(f) **Farm Organization and Management.**—Professor CASE.
(h) **Land Economics.**—Associate Professor STEWART.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 14. Cooperation in Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (2). 9 TT; 118 New Agr. Dr. BARTLETT.

Agr. Econ. 15. Financing Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 11 MWF; 118 New Agr. Assistant Professor NORTON.

Agr. Econ. 18. Land Economics.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 9 MWF; 118 New Agr. Associate Professor STEWART.

Agr. Econ. 23. Farm Business Analysis.—*Prerequisite:* Agr. Econ. 20 and Accountancy 1a. Lectures and quiz. Local field trips will be arranged; estimated cost, $5. (3). 1 MWF; 316 New Agr. Assistant Professor JOHNSTON.

Agr. Econ. 25. Farm Organization.—*Prerequisite:* Agr. Econ. 20. Local field trips will be arranged; estimated cost, $5. (3). 8 MWF; 331 New Agr. Professor CASE, Assistant Professor JOHNSTON.

Agr. Econ. 34. Marketing Dairy Products.—*Prerequisite:* Junior standing. (2). Arrange; D. Mfrs. Dr. BARTLETT and others. (Inspection trip requirement waived for 1933-34).

Agr. Econ. 37. Marketing Live Stock.—*Prerequisite:* Senior standing; An. Husb. 3. *Prerequisite or concurrent:* An. Husb. 6. (2). 9 TT; 316 New Agr. Associate Professor ASHBY. (Inspection trip requirement waived for 1933-34).

Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(b) **Agricultural Prices and Statistics.**—Assistant Professor NORTON.
(c) **Farm Management.**—Professor CASE.
(d) **Land Economics.**—Associate Professor STEWART.

Agr. Econ. 42. Farm Appraisals.—Valuation of farm real estate and other agricultural property. Factors studied include soils, crops, farm management, buildings, drainage, livestock, fruit, land titles, prices and taxes in relation to value. *Prerequisites:* Agron. 28, Agr. Econ. 20, or their equivalents; approval of Dean as supervisor. Local field trips to be arranged; estimated cost, $5. (3). 9 TTS; 116 New Agr. Members of departments involved.

---

†Sophomores in 1933-34 will be permitted to elect either Agricultural Economics 1 or 20 to fulfill prescribed course requirement.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Time to be arranged. Associate Professor STEWART.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Time to be arranged. Assistant Professor NORTON.

Agr. Econ. 112. Agricultural Economics Research.—Only those who write acceptable reports of successful investigation will receive credit. (1 to 2 units).* Time to be arranged. Associate Professor STEWART.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Time to be arranged. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(1 to 2 units).* Time to be arranged. Professor LLOYD.

AGRICULTURAL ENGINEERING

(Formerly Farm Mechanics)

Note: Certain courses in this department require laboratory fees varying from $1 to $8.

Courses for Undergraduates

Agr. Eng. 1. Introduction to Agricultural Engineering.—

Credit	Section	Hours	Days	Room	Instructor
3[1]	Lect.	8	WF	201 Agr. Eng.	YOUNG
	B Quiz	9	W		HAY
[1]Seniors will receive only 2 hours credit.	J Quiz	8	Tu		
	S Quiz	9	F		
	A Lab.	8–10	M		
	J Lab.	8–10	Th		
	N Lab.	1–3	Th		

Agr. Eng. 3. Gas Engines and Tractors.—*Prerequisite:* Agr. Eng. 1. (Inspection trip requirement waived for 1933-34).

3	Lect.	11	TT	201 Agr. Eng.	SHAWL
	K Quiz	9	Tu		
	O Quiz	2	Th		
	O Lab.	2–4	Tu		
	K Lab.	9–11	S		

Agr. Eng. 4. Farm Buildings.—*Prerequisite:* Agr. Eng. 1 or consent of instructor. (3). 1 MW; 202 Agr. Eng. Laboratory time to be arranged. Assistant Professor FOSTER.

Agr. Eng. 11. Dairy Machinery and Equipment.—(Given 1933-34 and alternate years.) *Prerequisite:* Agr. Eng. 1. (2). Lect. 10 Th; Lab. 10-12 Tu. 205 Agr. Eng. Mr. YOUNG.

Agr. Eng. 12. Farm Home Equipment.—*Prerequisite:* Agr. Eng. 1 or junior standing. (2). Lect. 1 Tu; Lab. 1-3 Th; 204 Agr. Eng. Professor LEHMANN.

Agr. Eng. 18b. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Time to be arranged. Professor LEHMANN, Assistant Professor SHAWL.

Agr. Eng. 21. Farm Shop Work.—*Prerequisite:* Agr. Eng. 1. (2). 3-5 MW; 201 Agr. Eng. Mr. YOUNG.

Courses for Advanced Undergraduates and Graduates

Agr. Eng. 17. Harvesting Machinery.—*Prerequisite:* Agr. Eng. 2. (3). Lect. 11 MW, Lab. 2-5 Tu; 201 Agr. Eng. Assistant Professor SHAWL, Mr. HAY.

Agr. Eng. 51. Special Power and Field Machinery.—*Prerequisite:* Agr. Eng. 17 or 28. Consult instructor before registering. (3). Time to be arranged. Professor LEHMANN, Assistant Professor SHAWL.

AGRONOMY

Note: Certain courses in this department require laboratory fees varying from $2 to $4.

Courses for Undergraduates

Agron. 8. Forage Crops.—*Prerequisite:* Agron. 25.

3	Lect.	11	MW	205 Agr.	PIEPER
	Quiz	11	F	205 Agr.	

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Agron. 18. Investigation with Thesis.—*Prerequisite:* Senior standing; not less than 20 hours pertinent to thesis problem; and the approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.

Soils.—Professors BAUER, DETURK, R. S. SMITH; Associate Professor SEARS.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

Agron. 25. Farm Crops.—*Prerequisite:* Bot. 5.

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	3	MW	205 Agr.	PIEPER, DUNGAN, and VAN DOREN
	A Lab.	1–3	Tu	600 Agr.	
	Quiz	3	F	205 Agr.	

Agron. 28. Soils.—*Prerequisite:* Chem. 5; Geol. 44. (Local field trip, cost not to exceed $1.)

5	Lect.	8	MWF	205 Agr.	WIMER, CRANE, and STAUFFER
	A Quiz	8	TT	205 Agr.	
	B Quiz	10	TT	205 Agr.	
	A Lab.	1–4	Th	650 Agr.	
	C Lab.	8–11	S	650 Agr.	

Courses for Advanced Undergraduates and Graduates

Agron. 10. Genesis, Morphology, Classification, and Geography of Soils.—*Prerequisite:* Agron. 28, junior standing. (3). Lect., 1 MWF; 205 Agr. Professor R. S. SMITH.

Agron. 13. Soil Productivity, its Variation, Modification, and Maintenance.—*Prerequisite:* Agron. 28, senior standing. (3). 9 MWF; 302 Agr. Professor BAUER.

Agron. 22. Plant Genetics and Breeding.—*Prerequisite:* Zool. 15, junior standing. (3). Lect., 10 MWF; 302 Agr. Professor WOODWORTH, Dr. BONNETT.

Agron. 30. Metabolism of Soil Microorganisms.—(Given in alternate years). *Prerequisite:* Bact. 5a and 5b (or 20); Chem. 32, junior standing. (3). 11 MWF; 302 Agr. Associate Professor SEARS.

Courses for Graduates

Agron. 114. Principles Underlying the Production of Crops.—(1 unit). Once a week. Arrange. Professor BURLISON, Associate Professor DUNGAN.

Agron. 118. Research.—(½ to 4 units).* Arrange.

Soils.—Professors BAUER, DETURK, R. S. SMITH.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

Agron. 119. Experiment Station Problems.—(See Animal Husbandry 103.) Professor MUMFORD.

ANIMAL HUSBANDRY

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3-5 TT; S.P. Mr. CRAWFORD, Mr. GARRIGUS.

An. Husb. 6. Livestock Management.—*Prerequisite:* An. Husb. 21. (5). 10 MTWTF; S.P. Professor EDMONDS.

An. Husb. 9b-t. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to thesis problem, and approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.

(b) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(d) **Horses.**—Professor EDMONDS.
(f) **Sheep.**—Assistant Professor KAMMLADE.
(h) **Swine.**—Professor CARROLL.
(k) **Poultry.**—Professor CARD.
(m) **Animal Nutrition.**—Professor MITCHELL.
(p) **Animal Genetics.**—Associate Professor ROBERTS.
(r) **Animal Pathology.**—Professor GRAHAM.
(t) **Meats.**—Associate Professor BULL.

An. Husb. 10. Farm Meats.—(3). 1-4 TT; 128 Agr. Associate Professor BULL.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 1 or 2.

3	Lect.	2	W	553 Agr.	BULL and others
	A Quiz	2	MF	553 Agr.	
	B Quiz	11	TT	553 Agr.	

An. Husb. 35. Animal Hygiene, Sanitation, Contagious Diseases of Farm Animals.—*Prerequisite:* An. Husb. 34; Bact. 5a. (2). 3 TT; An. Path. L. Professor GRAHAM.

An. Husb. 37. Poultry Management.—*Prerequisite:* An. Husb. 21. (3 or 4).* 9 MWF; Lab. 3-5 Th; 316 New Agr. Students may register for this course either with or without the laboratory. Professor CARD, Dr. SLOAN.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 27. Sheep Husbandry.—*Prerequisite:* An. Husb. 3 and 6. (3). 11 MWF; 111 S.P. Assistant Professor KAMMLADE.

An. Husb. 28. History of Breeds of Live Stock.—*Prerequisite:* An. Husb. 3. It is recommended that this course precede An. Husb. 22. (3). 3 MWF; 316 New Agr. Heads of divisions.

An. Husb. 31. Advanced Course in Animal Nutrition.—*Prerequisite:* Senior standing, including An. Husb. 7. (3). Time to be arranged. Professor MITCHELL.

An. Husb. 33. Horse Production.—*Prerequisite:* An. Husb. 3 and 6. (3). 1 MWF; S.P. Professor EDMONDS.

An. Husb. 39. Poultry Production.—*Prerequisite:* An. Husb. 37. (3). 8 MWF; 316 New Agr. Professor CARD.

An. Husb. 41. Animal Genetics.—*Prerequisite:* Zool. 15. (3). 2 MWF; Gen. Bldg. Associate Professor ROBERTS.

Courses for Graduates

An. Husb. 103. Experiment Station Problems.—Once a week. (½ unit). Time to be arranged. Professor MUMFORD.

An. Husb. 112a-f. Research.—(½ to 2 units).* Arrange. One to three times a week.

(a) **Economic Factors in Meat Production.**—Professor RUSK.
(b) **Systems of Live Stock Farming.**—Professor CASE.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

These courses may be taken during the summer by special permission.

An. Husb. 117. Animal Genetics.—Two to five times a week. (1 unit). Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—Two hours a week. (½ unit). Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—Two to five times a week. (½ to 1 unit).* Laboratory fee, $5. Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—Two to five times a week. (½ to 1 unit).* Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—Two to five times a week. (½ to 1 unit).* Time to be arranged. Associate Professor ROBERTS.

ARCHITECTURE

Courses for Undergraduates

Arch. 12. History of Architecture.—*Prerequisite:* Arch. 11. Not open to students expecting a degree in Architecture. (3). 3 MWF; 120 Arch.

Arch. 14. History of Architecture.—*Prerequisite:* Arch. 13. (2). 11 MW; 120 Arch.

Arch. 16. History of Architecture.—*Prerequisite:* Arch. 15. (2). 11 TT; 120 Arch.

Arch. 18. History of Architecture.—*Prerequisite:* Arch. 17. (2). 8 WF; 120 Arch.

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; or upon passing a proficiency examination in Chem. 2, he may register in Chem. 4, 5, or 6.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42, 43, 27, 34a, 36b and 37b, 50a, 15a, and 97b. Courses of a more special nature will not as a rule be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42, and 43, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b.) 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) Arrange. (¼ to ¾ unit).* Professor HOPKINS.

Chem. 105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 11 S; 162 Chem. Special topic: The structure of complex inorganic compounds (Dr. BAILAR) 9 MW; 162 Chem. Professor HOPKINS.

Chem. 124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods, and applications. (½ unit). Lectures, 11 MF; 116 Chem. Associate Professor REEDY.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 124d. Quantitative Analysis.—(Laboratory work. Optional, to accompany Chem. 124b.) (¼ to ¾ unit).* Arrange; 260 Chem. Assistant Professor SMITH.

Chem. 125b. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 4 Th; 162 Chem. Additional meetings arrange. Professor CLARK.

Chem. 127b. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures, 10 TT; 217 Chem. Professor CLARK.

Chem. 127d. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127b.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange. 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). 10 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 150b. Physiological Chemistry.—(¾ unit). 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory. Arrange. 463 Chem. Professor ROSE.

Chem. 155b. Physiological Chemistry.—(Seminar). Required of all students majoring in physiological chemistry. (¾ unit). 9-11 F; 456 Chem. Professor ROSE.

Chem. 160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (½ unit). 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange. 60b Chem. Professor BUSWELL.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Dr. BAILAR, Dr. AUDRIETH, Dr. QUILL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK, Associate Professor REEDY, Assistant Professors ENGLIS, SMITH.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON; Associate Professor SHRINER, Dr. BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES, Associate Professor KRASE, Assistant Professor KISTLER.

Ceramic Chemistry.—Professor PARMELEE.

Zymochemistry.—Professor BUSWELL.

Ed. 150. Thesis.—(1 to 2 units).* Dean BENNER and others.

Ed. 184. Seminar in School Administration.—*Prerequisite:* 3 units of graduate work in education including Ed. 104 or 106 and consent of instructor. (1 unit). Arrange. 302 Adm.(E). Associate Professor WEBER.

Ed. 185. Seminar in Educational Psychology.—*Prerequisite:* Ed. 125 and consent of instructor. (1 unit). Arrange. 203 Adm.(E). Professor CAMERON; Associate Professor GRIFFITH.

Ed. 190. Research in Education.—*Prerequisite:* 3 units of graduate work in Education and consent of the dean. (1 unit). Dean BENNER and others.

B. RELATED COURSES IN SPECIAL SUBJECTS

The following courses given by departments not in the College of Education may be presented as meeting in part the requirements for the 20 hours in Education for graduation; for the 15 hours in Education for the State High School Certificate; or for the hours of Education necessary as a qualification for teachers in the North Central Association accredited schools.

Art. 10b. Course for Teachers.—(3). (See Art).

Botany 14. Course for Teachers.—(3). (See Botany).

Chemistry 12b. Course for Teachers.—(3). (See Chemistry).

English 41. Teaching of English Literature.—(2). (See English).

German 25. Teachers' Course.—(2). (See German).

History 18. Teaching of History.—(2). (See History).

Home Economics 11. Teachers' Course.—(3). (See Home Economics).

Industrial Education 56. Organization and Teaching of Shop Work.—(3). (See Industrial Education).

Latin 9. Teachers' Course.—(2). (See Classics).

Mathematics 35. Teachers' Course.—(3). (See Mathematics).

Music 25b. Public School Music Methods.—(2). (See Music).

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Music 26b. Public School Music Methods.—(3). (See Music).

Physical Education for Women 95b. Methods.—(4). (See Physical Education for Women).

Spanish 25. Methods of Teaching Spanish.—(3). (See Spanish).

Speech 12. Teaching of Speech.—(2). (See Speech).

C. EDUCATIONAL PRACTICE

The courses listed below are open only to seniors. *Prerequisite:* Ed. 25, Ed. 6, and Ed. 10, except that students who take Ed. Prac. 6, 7, 11, 11a, 13, 14, 20, 21, or 25 must register at the same time for Ed. 10. For Educational Practice in Agriculture, see Associate Professor NOLAN at 116 Old Agriculture. For Educational Practice in Physical Education, see Mr. JACKSON at 202 New Gymnasium. For Educational Practice in Home Economics, see Miss ROBINSON, Miss TODD, and Miss KING at 119 Woman's Building. Arrange for all other courses in Educational Practice with Principal C. W. SANFORD, at 102 University High School.

Ed. Prac. 1. Physical Education for Men.—(2 to 4).*

Ed. Prac. 2. Physical Education for Men.—(2 to 4).*

Ed. Prac. 3. Physical Education for Men.—(2 to 4).*

Ed. Prac. 4. Physical Education for Men.—(2 to 4).*

Ed. Prac. 5. Agricultural Education.—(3 to 5).* (Same as Agr. Ed. 50.)

Ed. Prac. 6. Biology.—(5). Students must be registered in Ed. 10, Section A.

Ed. Prac. 7. Chemistry.—(5). Students must be registered in Ed. 10, Section A.

Ed. Prac. 8. Civics.—(5).

Ed. Prac. 9. Drawing, Art.—(3 to 5).*

Ed. Prac. 10. Drawing, Mechanical.—(3 to 5).*

Ed. Prac. 11. English.—(5). Students must be registered in Ed. 10, Section G1.

Ed. Prac. 11a. Speech.—(5). Students must be registered in Ed. 10, Section G1.

Ed. Prac. 12. French.—(5).

Ed. Prac. 13. General Science.—(5). Students must be registered in Ed. 10, Section A.

Ed. Prac. 14. Home Economics Education.—(5). Students must be registered in Ed. 10, Section G2.

Ed. Prac. 15. History.—(5).

Ed. Prac. 16. Industrial Education.—(3 to 5).*

Ed. Prac. 17. Latin.—(5).

Ed. Prac. 19. Mathematics.—(5).

Ed. Prac. 20. Music.—(3 to 5).* Students must be registered in Ed. 10, Section D1.

Ed. Prac. 21. Physics.—(5). Students must be registered in Ed. 10, Section A.

Ed. Prac. 23. Spanish.—(5).

Ed. Prac. 24. Stenography and Typewriting.—(3 to 5).*

Ed. Prac. 25. Elementary Education.—(5). Students must be registered in Ed. 10, Section H.

Ed. Prac. 26. Bookkeeping.—(5).

Ed. Prac. 27. Economics.—(5).

Ed. Prac. 28. German.—(5).

D. AGRICULTURAL EDUCATION

Agr. Ed. 50. Teaching.—*Prerequisite:* Ed. 25 and senior standing. (Same as Ed. Prac. 5.)

Agr. Ed. 51. Teachers' Course in Agriculture.—*Prerequisite:* Ed. 25, and senior standing. (3). 4 MWF; 116 Agr. Associate Professor NOLAN.

Agr. Ed. 91. Special Problems of Education in Rural Communities.—(Same as Ed. 91.) *Prerequisite:* Senior standing and at least 6 hours in Education. (2). 3 TT; 116 Agr. Associate Professor NOLAN.

Agr. Ed. 92. Adult Education in Vocational Agriculture.—*Prerequisite:* 20 hours of technical agriculture, Ed. 25, and senior standing. (Subject-matter and methods in part-time and evening classes, and other extension service in vocational agriculture.) (2). 11 MW; 116 Agr. Associate Professor NOLAN.

E. INDUSTRIAL EDUCATION

Ind. Ed. 1. Industrial Arts.—First Course. (4). Lect., 10 TT; Shop, 8-10 MWF; 5 Wood Shop. Mr. BRAUCHER and assistant.

Ind. Ed. 2. Advanced Industrial Arts.—(4). Lect., 11 TT; Shop, 10-12 MWF; 5 Wood Shop. Mr. BRAUCHER and assistant.

Ind. Ed. 2a. Problems of House Construction.—(4). Lect., 3 TT; Shop, 2-4 MWF; 5 Wood Shop. Mr. BRAUCHER and assistant.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Note: The following courses given by departments not in the College of Education may be presented as meeting in part the requirements for the 25 hours in Industrial Education.

G.E.D. 1. Elements of Drawing.—(4). (See General Engineering Drawing).

G.E.D. 2. Descriptive Geometry.—(4). (See General Engineering Drawing).

G.E.D. 4. Advanced Drawing.—(4). (See General Engineering Drawing).

Journ. 9b. History and Practice of Printing and Publishing.—(2 or 3). (See Journalism.)

M.E. 85. Pattern and Foundry Laboratory.—(3). (See Mechanical Engineering).

M.E. 87. Machine Laboratory.—(3). (See Mechanical Engineering).

Courses for Advanced Undergraduates and Graduates

Ind. Ed. 52. The Function, Organization, and Methods of the Evening School.—Same as Ed. 52. *Prerequisite:* Junior standing. (2). 11 TT; 304 Adm.(E). Professor Mays.

Ind. Ed. 53. Problems of Industrial Education.—(Same as Ed. 53.) *Prerequisite:* Junior standing or consent of instructor. (3). 9 MWF; 304 Adm.(E). Professor Mays.

Ind. Ed. 55. Problems of Vocational Guidance.—Same as Ed. 55 and Ind. Ed. E55. *Prerequisite:* Senior standing. (3). 8 MWF; 304 Adm.(E). Professor Mays.

Ind. Ed. 56. Organization and Teaching of Shop Work.—(3). 11 MWF; 310 Adm.(E). Professor Mays.

Extra-mural Courses

Ind. Ed. E. 41. Survey of Vocational Education.—Same as Ed. 41 and Ind. Ed. 41. Mr. Bawden.

Ind. Ed. E. 52. Teaching Related Trade Subjects.—Same as Ed. 52 and Ind. Ed. 52. Mr. Bawden.

Ind. Ed. E. 53. Problems of Industrial Education.—Same as Ed. 53 and Ind. Ed. 53. Mr. Bawden.

Ind. Ed. E. 54. Principles and Methods of the Part-Time School.—Same as Ed. 54 and Ind. Ed. 54. Mr. Bawden.

Ind. Ed. E. 54a. Continuation of Ind. Ed. E. 54.

Ind. Ed. E. 55. Problems of Vocational Guidance.—Same as Ed. 55 and Ind. Ed. 55. Mr. Bawden.

Ind. Ed. E. 55a. Continuation of Ind. Ed. E. 55.

Ind. Ed. E. 56. Teaching Shopwork.—Same as Ed. 56 and Ind. Ed. 56. *Prerequisite:* (a) Two years of trade or industrial experience beyond apprenticeship; (b) completion of elementary school curriculum. Mr. Bawden.

Ind. Ed. E. 56a. Continuation of Ind. Ed. E. 56.

Courses for Graduates

Note: Entrance on graduate work in Electrical Engineering presupposes the equivalent of the full undergraduate course in that subject. The undergraduate courses in electrical engineering are open for minor credit to students majoring in other departments who have the proper prerequisites.

E.E. 101. Advanced Courses in Alternating Currents.—(½ to 2 units).* Arrange.

(a) Graduate Seminar.—Professor PAINE.
(c) Machine Transients.—Assistant Professor KEENER.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

E.E. 102. **Electric Waves, Oscillations and Transients.**—(½ to 1 unit).* Arrange.
(a) **Theory of Electric Waves, Oscillations and Transients.**—Assistant Professor REICH.
(b) **Demonstration Lecture.**—Assistant Professor REICH.
(c) **Theory of Energy Radiation.**—Assistant Professor BROWN.
(d) **Principles of Television Engineering.**—Assistant Professor BROWN.

E.E. 103. **Electrical Design.**—(½ to 1 unit).* Arrange.
(a) **Power Plant Design.**—Associate Professor WALDO.
(b) **Machine Design.**—Associate Professor WALDO.
(c) **Illumination Practice and Design.**—Assistant Professor KRAEHENBUEHL.

E.E. 104. **Courses in Electronics.**—(1 unit). Arrange.
(a) **Theoretical Electronics.**—Assistant Professor REICH.
(c) **Photoelectric Cells, Gaseous Control Tubes and Inverters.**—Assistant Professor REICH.

E.E. 105. **Electrical Engineering Research.**—(1 to 3 units).* Professors PAINE, TYKOCINER, Associate Professor KNIGHT, Assistant Professors BROWN, REICH, KEENER, KRAEHENBUEHL.

ENGINEERING

Courses for Undergraduates

Note: Each of the following courses may be used as an approved or non-technical elective in all engineering curricula.

Eng. 10. **Engineering Economics.**—Evolution and growth of industry; basic industrial principles; ownership and securities; standardization; valuation and depreciation; comparisons and selections of engineering projects. *Prerequisite:* Junior standing in engineering.

Credit	Section	Hours	Days	Room	Instructor
3	A	10	MWF	117 T.B.	KING

Eng. 39. **Industrial Relations.**—History of the development of industry; the factory system; manufacturers' organizations; labor organizations; works management; trade unions; wage systems; personnel problems; labor legislation. *Prerequisite:* Junior or senior standing.

3	PQ	11	MWF	1 Wood Shop	CASBERG

Eng. 92. **Engineering Law.**—Contracts, evidence, torts, equity, real property, corporations, agency, sales, negotiable instruments, water rights, patent rights, special assessments, contract letting, general conditions. *Prerequisite:* Senior standing in engineering or architecture.

ENGLISH

(Including Rhetoric, Speech, and Scandinavian Languages)

Major: 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and *including* at least 10 hours in English literature, at least 3 hours in composition, and two courses from the advanced group in English literature.

Minors: 20 hours in (a) Latin or Greek or French or German or Spanish; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history; or (e) in history and philosophy. No language courses may be regarded as satisfying the minor requirement if they are excluded from the majors of the language departments (excepting elementary courses in Greek, Latin, French 2a, and Spanish 2a). At least eight hours must be offered in each subject.

Major in Speech

Major: 10 hours in speech, inclusive of Speech 7 and 8 and either 4 or 6; and 10 hours of English, exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature from the advanced group.

Minors: 20 hours, in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, law, or sociology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in English 10 and Rhetoric 1-2.

A. ENGLISH LANGUAGE AND LITERATURE

Courses for Undergraduates

Engl. 10a. **An Introduction to Literature.**—Forms of poetry, mainly narrative. *Prerequisite:* The minimum entrance requirement in English. (Credit is not given for Engl. 10a in addition to 20a and 20b).

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. It is prerequisite to all other courses in the department except 2, 31, and 32, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department. Seniors receive reduced credit in Entomology 1.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9 and 19. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

Math. 2. College Algebra.—*Prerequisite:* Entrance algebra, 1½ units; plane geometry, 1 unit.

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

Courses for Graduates

Note: Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week; arrange. Associate Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week; arrange. Professor Macintire.

M.E. 109. Machine Design.—Rational design; the application of mechanics of materials. Individual problems. (1 unit). Twice a week; arrange. Professor Leutwiler.

M.E. 112. Laboratory Investigation.—Combustion of fuel, boiler economy; steam engines and turbines; gas engines and producers; explosive mixtures; mechanical refrigeration. Original work. (1½ units). Three times a week; arrange. Professors Willard, Polson, Kratz, Ham, and Macintire.

METALLURGICAL ENGINEERING

Met. 2. Principles of Metallurgy.—*Prerequisite:* Chem. 4; Physics 1a-3a. (2). 10 MF; 206 T.B. Assistant Professor Mitchell.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses.

Mil. Bands 2. Freshman Band.—(1). Twice a week, by assignment. Director Harding, Assistant Director Dvorak, Mr. Overgard.

Mil. Bands 4. Sophomore Band.—(1). Twice a week, by assignment. Director Harding, Assistant Director Dvorak, Mr. Overgard.

Mil. Bands 6. Junior Band.—Twice a week, by assignment. Director Harding, Assistant Director Dvorak.

Mil. Bands 8. Senior Band.—Twice a week, by assignment. Director Harding, Assistant Director Dvorak.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6 or 7), education or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.

Sophomore year: Physics 1a-1b, 3a-3b, and calculus.

Junior year: Physics 14, 44, 60, 61, 62.

Senior year: Physics 23, 30, 71, 72, 78.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and

†This course meets twice a week for 45 minutes; registration is limited to students with free period following this hour.

3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Courses for Advanced Undergraduates and Graduates

T.A.M. 42. Properties of Engineering Materials: Specifications and Inspection.—*Prerequisite:* T.A.M. 1, 3, and 63. (3 credits or ½ unit). Time to be arranged. Professor SEELY.

T.A.M. 44. Laboratory Work in Testing Materials.—*Prerequisite:* T.A.M. 1, 3, and 63. (3 credits or ½ to 1 unit).* Time to be arranged. Professor MOORE and Associate Professor PUTNAM.

Courses for Graduates

T.A.M. 107. Laboratory Investigations in Strength of Materials.—(1 to 2 units).* Twice a week. Arrange. Professor MOORE.

T.A.M. 108. Laboratory Investigations in Hydraulics.—(1 to 2 units).* Twice a week. Arrange. Professor ENGER.

T.A.M. 109. Laboratory Investigations in Plain and Reinforced Concrete.—(1 to 2 units).* Twice a week. Arrange. Professor RICHART.

T.A.M. 111. Analytical Study of Experimental Work on Reinforced Concrete: Columns and Slabs.—(1 unit). Twice a week. Arrange. Professor RICHART.

T.A.M. 113. Graphical and Approximate Methods of Structural Analysis.—(½ unit). Twice a week. Arrange. Professor WESTERGAARD.

T.A.M. 115. Theory of Elasticity with Application to Engineering Problems.—(Continuation of T.A.M. 114). (1 unit). Twice a week. Arrange. Professor WESTERGAARD.

T.A.M. 117. The Properties of Engineering Materials.—(1 unit). Three times a week. Arrange. Professor SEELY.

ZOOLOGY

Note: Certain courses in this department require laboratory fees varying from $1 to $5.

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and including Zoology 2, 3, 4, 5 (or 7), and 9. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: bacteriology, botany, chemistry, entomology, geology, physics, physiology, psychology. At least 8 hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Zool. 1 and 2.

Courses for Undergraduates

Zool. 1. General Zoology.

Courses for Advanced Undergraduates and Graduates

Zool. 9. Animal Ecology.—*Prerequisite:* One year of zoology and junior standing.

3 to 4*[2]	Lect. (1st half sem.)	9	TT	229 N.H.	SHELFORD
[2]For 4 hours credit, additional field work is assigned.	Lab. (2nd half sem.)	9–11	S	202 Viv.	SHELFORD
	Field	9–12	S	(Two all day trips)	

Zool. 8b. Thesis Investigation.—*Prerequisite:* Two years of zoology. (3 to 5).* Arrange. Members of the department.

Zool. 18. Protozoology.—*Prerequisite:* One year in zoology and junior standing. (2). 1-3 TT; 314 N.H. Assistant Professor KUDO.

Zool. 20b. Current Investigation.—Required of all graduate students majoring in zoology; may be elected by seniors majoring in zoology with consent of instructor. (1). 3 F; 340 N.H. Members of the department.

Zool. 21b. Introduction to Zoological Research.—*Prerequisite:* One year in zoology courses; senior standing. (2 to 5).* Arrange. Members of the department.

Zool. 23. Morphology of Vertebrates.—*Prerequisite:* Zool. 3 and 22.

2 to 4*	Lect.	4	Tu	419 N.H.	ADAMS
	Lab.	1–5	TT	419 N.H.	

Zool. 66. Vertebrate Organogeny.—*Prerequisite:* Zool. 3 or 63. (2 to 5).* Arrange. Professor SHUMWAY.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

Students entering on graduate study in the Department of Zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year's undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 106. Topics in Vertebrate Embryology.—(1 unit). Arrange. Professor SHUMWAY.

Zool. 110. Climatic Ecology.—(½ to 1 unit).* Arrange. Professor SHELFORD.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Time to be arranged. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 117. Faunistic Zoology.—(½ to 1 unit).* Time to be arranged. Professor VAN CLEAVE.

Individual Research Courses

Zool. 121. Invertebrate Morphology and Parasitology.—(1 to 2 units).* Time to be arranged. Members of the department.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Time to be arranged. Assistant Professor ADAMS.

Zool. 123. Faunistic and Systematic Zoology.—(1 to 2 units).* Time to be arranged. Professor VAN CLEAVE.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Time to be arranged. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—Time and credits to be arranged. Professor SHELFORD.

Zool. 126. Vertebrate Embryology.—(1 to 2 units).* Time to be arranged. Professor SHUMWAY.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

TIME TABLE

FIRST SEMESTER
1934-1935

This Time Table is issued early, for the convenience of faculty members and students. Preserve your copy for use during the period of registration, as there will not be a supply for general distribution at that time.

PUBLISHED WEEKLY BY THE UNIVERSITY OF ILLINOIS

[Entered as second-class matter December 11, 1912, at the post office at Urbana, Illinois, under the Act of August 24, 1912. Acceptance for mailing at the special rate of postage provided for in section 1103, Act of October 3, 1917, authorized July 31, 1918]

REGISTRATION CALENDAR

1934-35

FIRST SEMESTER

1934

Sept. 5-8, Wed.-Sat. . . . . Entrance examinations (get programs and permits at the Registrar's Office).
Sept. 13, Thurs., 7:30 p.m. . . Freshman Welcome.
Sept. 14, Fri., 8 a.m. . . . . Meetings for freshman groups with advisers.
Sept. 14, Fri., 9 a.m. . . . . Rhetoric examination.
Sept. 14, Fri., 1:30 p.m. . . . . Meetings for freshman groups with advisers.
Sept. 14, Fri., 7:30 p.m. . . . . Student night meeting.
Sept. 14-15, Fri.-Sat. . . . . Registration for graduate students.
Sept. 15, Sat., 8 a.m.-5 p.m. . Registration for freshmen.
Sept. 17-18, Mon.-Tues. . . . . Registration for upper classmen.
Sept. 17, Mon., 1:30 p.m. . . . Hygiene examination.
Sept. 18, Tues. . . . . Talks for freshmen by Dean of Men and Dean of Women.
Sept. 19, Wed., 8 a.m. . . . . Instruction begun.
Sept. 24, Mon., 12 m. . . . . Latest date for change of study-lists without fee.
Sept. 29, Sat., 12 m. . . . . Latest date for rebates in full.
Oct. 30, Tues. . . . . Latest date for announcement of subjects for theses.
Nov. 17, Sat., 12 m. . . . . Latest date for rebates of one-half fees, and latest date for seniors graduating in February to make substitutions in courses or to remove failures of the last semester or the summer session.
Nov. 22-24, Thurs.-Sat. . . . . High School Conference.
Nov. 28, Wed., 12 m. . . . . Thanksgiving recess begun.
Dec. 3, Mon., 1 p.m. . . . . Instruction resumed.
Dec. 22, Sat., 12 m. . . . . Holiday recess begun.

1935

Jan. 3, Thurs., 1 p.m. . . . . Instruction resumed.
Jan. 11, Fri. . . . . Latest date for special examinations.
Jan. 22, Tues. . . . . Semester examinations begun.
Jan. 30, Wed. . . . . Semester examinations ended.

SECOND SEMESTER

Jan. 30-Feb. 2, Wed.-Sat. . . . Entrance examinations (get programs and permits at the Registrar's Office).
Feb. 1-2, Fri.-Sat. . . . . Registration for graduate students.
Feb. 4-5, Mon.-Tues. . . . . Registration for undergraduate students.
Feb. 6, Wed., 8 a.m. . . . . Instruction begun.
Feb. 11, Mon. . . . . Earliest date for special examinations.
Feb. 11, Mon., 12 m. . . . . Latest date for change of study-lists without fee.
Feb. 16, Sat., 12 m. . . . . Latest date for rebates in full.
April 6, Sat., 12 m. . . . . Latest date for rebates of one-half fees and latest date for seniors to make substitutions in courses or to remove failures of the first semester.
April 18, Thurs., 12 m. . . . . Easter recess begun.
April 23, Tues., 1 p.m. . . . . Instruction resumed.
May 13, Mon. . . . . Latest date for special examinations.
May 23, Thurs. . . . . Military day.
May 24, Fri. . . . . Semester examinations begun.
June 3, Mon. . . . . Semester examinations ended.
June 10, Mon. . . . . Sixty-fourth Annual Commencement.

SUMMER SESSION, 1935

June 17, Mon. . . . . Registration day.

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 11, in Art 35a-35b, Commercial Art, the prerequisites given are Art 27b and 31b. These two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

TIME TABLE FOR COURSES OF INSTRUCTION

FIRST SEMESTER, 1934-1935

AGRICULTURAL ECONOMICS

Courses for Undergraduates

Agr. Econ. 1. Introductory Agricultural Economics.—

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	3	W	103 New Agr.	Ross
	Disc. A	3	MF	313 New Agr.	
	Disc. B	10	MW	313 New Agr.	
	Disc. C	2	TT	313 New Agr.	

Agr. Econ. 20. Farm Management.—*Prerequisite:* Sophomore standing. Local field trips will be arranged; estimated cost, $5.

3	Lect. and Disc.	10	TT	316 New Agr.	Case and others
	S Lab.	1–3	Th	331 New Agr.	
	T Lab.	1–3	F	331 New Agr.	

Agr. Econ. 30. Marketing of Agricultural Products.—*Prerequisite:* Sophomore standing.

3	Lect.	10	M	118 New Agr.	Stewart
	Quiz	10	WF	118 New Agr.	

Agr. Econ. 40. Investigation with Thesis.—Continuous through the year; credit not given for either semester separately. *Prerequisite:* Senior standing, including not less than 20 hours pertinent to thesis problem; approval of head of department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(c) **Agricultural Prices and Statistics.**—Assistant Professor Norton.
(e) **Farm Management.**—Professor Case.
(g) **Land Economics.**—Associate Professor Stewart.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 10. Economic Relationships of Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 11 MWF; 316 New Agr. Assistant Professor Norton.

Agr. Econ. 17. Economic History of Agriculture.—*Prerequisite:* Econ. 1 or 2. (2). Arrange. Assistant Professor Norton.

Agr. Econ. 22. Types and Systems of Farming.—*Prerequisite:* Agr. Econ. 20. Lectures and quiz. Local field trips will be arranged; estimated cost, $3. (3). 8 MWF; 316 New Agr. Professor Case and others.

Agr. Econ. 24. Farm Operation.—*Prerequisite:* Agr. Econ. 20; junior standing. Local field trips will be arranged; estimated cost, $3. (2). 11 TT; 316 New Agr. Mr. Wills.

Agr. Econ. 26. Farm Administration.—*Prerequisite:* Agr. Econ. 20; senior standing. (2). 9 TT; 316 New Agr. Professor Case.

Agr. Econ. 36. Marketing Horticultural Products.—*Prerequisite:* Econ. 1 or 2; Agr. Econ. 30; senior standing. Inspection trip required; estimated cost $12. (3). 3 MWF; 203 V.G. Professor Lloyd.

Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of head of department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(b) **Agricultural Prices and Statistics.**—Assistant Professor Norton.
(c) **Farm Management.**—Professor Case.
(d) **Land Economics.**—Associate Professor Stewart.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Arrange. Associate Professor Stewart.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Arrange. Assistant Professor Norton.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Agr. Econ. 112. Agricultural Economics Research.—(1 to 2 units).* Credit is conditional on completion of acceptable report of investigation. Arrange. Associate Professor STEWART.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Arrange. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(1 to 2 units).* Arrange. Professor LLOYD.

AGRICULTURAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $8.

Courses for Undergraduates

Agr. Eng. 1. Introduction to Agricultural Engineering.—

Courses for Advanced Undergraduates and Graduates

Agron. 7. Crop Production as Affected by Environmental Factors.—*Prerequisite:* Agron. 25; junior standing. (3). Lect., 8 MWF; 302 Agr. Professor BURLISON, Associate Professor DUNGAN.

Agron. 11. Rôle of Micro-organisms in Soil Fertility.—*Prerequisite:* Agron. 28; Bact. 5a; junior standing. (3). Lect., 9 MWF; 302 Agr. Associate Professor SEARS.

Agron. 29. Field Plot Technic.—*Prerequisite:* Senior standing. (3). Lect., 10 MWF; 302 Agr. Professor WOODWORTH, Mr. MUMM.

Agron. 32. Physical Methods of Soil Investigation.—(Given in alternate years). *Prerequisite:* Agron. 28; junior standing. (3). Lect., Disc., Lab.; 1-3 MWF; 657 Agr. Dr. STAUFFER.

Courses for Graduates

Agron. 101. Chemical Properties of Soils and Their Relation to Plant Growth.—(1 unit). Twice a week. Arrange; 306 Agr. Professor DETURK.

Agron. 104. Seminar.—(¼ unit). Once a week. Arrange; 301 Agr. Graduate staff.

Agron. 112. Theory and Analysis of Plant Breeding Problems.—(1 unit). Three times a week. Arrange. Professor WOODWORTH.

Agron. 118. Research.—(½ to 4 units).* Arrange.
Soils.—Professors BAUER, DETURK, R. S. SMITH.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

ANIMAL HUSBANDRY

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors). (2). 3-5 TT; S.P. Mr. CRAWFORD.

An. Husb. 3. Livestock Judging.—*Prerequisite:* An. Husb. 1 or equivalent. (5). 10-12 MTWTF; S.P. Associate Professor SNAPP.

An. Husb. 9a-s. Investigation with Thesis.—Continuous through the year; credit not given for either semester separately. *Prerequisite:* Senior standing, including 20 hours pertinent to thesis problem; approval of head of department. (5). Arrange.
(a) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(c) **Horses.**—Professor EDMONDS.
(e) **Sheep.**—Assistant Professor KAMMLADE.
(g) **Swine.**—Professor CARROLL.
(j) **Poultry.**—Professor CARD.
(l) **Animal Nutrition.**—Professor MITCHELL.
(n) **Animal Genetics.**—Associate Professor ROBERTS.
(q) **Animal Pathology.**—Professor GRAHAM.
(s) **Meats.**—Associate Professor BULL.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 1 or 2.

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	2	W	553 Agr.	BULL
	A Quiz	2	MF	553 Agr.	
	B Quiz	11	TT	553 Agr.	

An. Husb. 34. Anatomy and Physiology, and Non-Contagious and Parasitic Diseases of Farm Animals.—*Prerequisite:* An. Husb. 21. (3). 1 MWF; An. Path. L. Professor GRAHAM.

An. Husb. 36. Selection and Use of Meat.—(2). 9 TT; 403 Agr. Associate Professor BULL.

An. Husb. 38. Poultry Breeds and Judging.—*Prerequisite:* An. Husb. 37. (3). 3-4:30 MTWTF; Poultry Plant. (This course is concluded at the beginning of the Christmas recess). Dr. SLOAN.

From the students taking or having had this course will be chosen the team to represent the University in the Annual Mid-West Intercollegiate Student Poultry Judging Contest. The class will visit a near-by poultry show. The cost of the trip will be from $10 to $15.

Courses for Advanced Undergraduates and Graduates

An. Husb. 7. Principles of Animal Nutrition.—*Prerequisite:* Senior standing, including An. Husb. 21; Chem. 32. (5). Arrange. 553 Agr. Mr. HAMILTON.

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

An. Husb. 22. Advanced Stock Judging.—*Prerequisite:* An. Husb. 3. (3). 3 MTWTF; S.P. Heads of divisions.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest.

An. Husb. 24. Meat Judging and Special Problems.—*Prerequisite:* An. Husb. 10 or 36. (2 to 5).* Arrange. Associate Professor BULL.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest. Students registering for meat judging only should register for 2 hours credit. This part of the course will terminate at Thanksgiving.

An. Husb. 25. Beef Production.—*Prerequisite:* An. Husb. 6. (3). 2 MWF; 316 New Agr. Professor RUSK, Associate Professor SNAPP.

An. Husb. 26. Pork Production.—*Prerequisite:* An. Husb. 6. (3). 9 MWF; 316 New Agr. Professor CARROLL.

An. Husb. 40. Economics of Poultry Keeping.—*Prerequisite:* Senior standing, including An. Husb. 37. (3). 8 MWF; 313 New Agr. Professor CARD.

Courses for Graduates

An. Husb. 112a-f. Research.—Arrange. One to three times a week. (½ to 2 units).*

(a) **Economic Factors Involved in Meat Production.**—Professor RUSK.
(b) **Systems of Livestock Farming.**—Professor CASE.
(c) **Animal Pathology.**—Professor GRAHAM.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

An. Husb. 117. Animal Genetics.—(1 unit). One to three times a week. Arrange. Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—(½ unit). Two hours a week. Arrange. Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—(½ to 1 unit).* Two to five times a week. Arrange. (Lab. fee $5). Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—(½ to 1 unit).* Two to five times a week. Arrange. Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Arrange. Associate Professor ROBERTS.

ARCHITECTURE

ASTRONOMY

Course for Undergraduates

Astron. 1. Descriptive Astronomy.—*Prerequisite:* Sophomore standing. (3). 11 MWF; 229 N.H.; one hour Wednesday evening, Observatory. Professor Baker.

Course for Advanced Undergraduates and Graduates

Astron. 15. Geodetic Astronomy.—*Prerequisite:* Consent of instructor. (3). To be arranged; Observatory. Professor Baker.

Courses for Graduates

Astron. 101. Seminar.—(1 unit). 11 TTS; Observatory. Professor Baker.

Astron. 103. Celestial Mechanics.—(1 unit). 1 MWF; Observatory. Professor Baker.

BACTERIOLOGY

Note: Certain courses in this department require laboratory fees varying from $4 to $5.

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (Advanced Dairy Bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: agronomy, botany, chemistry, entomology, physiology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

Bact. 5a. Introductory Bacteriology.—*Prerequisite:* Sophomore standing; or consent of the instructor.

Bact. 7a. Research and Special Problems.—*Prerequisite:* Junior standing; 10 hours in bacteriology; consent of instructor. (3 to 5).* Arrange. Professor TANNER, Assistant Professor WALLACE.

Courses for Advanced Undergraduates and Graduates

Bact. 20. General Bacteriology.—*Prerequisite:* Two years of college chemistry; senior standing; consent of instructor. Students with credit in Bact. 5a and 5b will not be allowed credit for Bact. 20. (5). Lect., 11 MWF; 303 Chem. Lab., 1-3 MW; 360 Chem. Assistant Professor WALLACE.

Bact. 26. Pathologenic Bacteriology.—*Prerequisite:* Bact. 5a and 5b (or 20); junior standing. (5). Lect., 8 TT; 103 Chem. Lab., 8-10 MWF; 367 Chem. Assistant Professor WALLACE.

Courses for Graduates

Bact. 103. Physiology of Bacteria.—(1 unit). Lect., 9 MW; 366 Chem. Professor TANNER.

Bact. 107. Research in Bacteriology.—(1 to 4 units).* Conference, arrange. Lab., arrange; 365 Chem. Professor TANNER.

Bact. 118a. Current Literature.—Required of all graduate students majoring in bacteriology. *Prerequisite:* 10 hours of bacteriology and consent of the instructor. (¼ unit). 2 Tu; 366 Chem. Professor TANNER.

BOTANY

Note: Certain courses in this department require laboratory fees varying from $1 to $3.

Major: 20 hours of botany exclusive of Bot. 1 and 5, and inclusive of Bot. 2 or 12, 3, and at least five hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours in one or two departments chosen in consultation with the head of the department from the following list: agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

Courses for Undergraduates

Bot. 1a. Introductory Botany (Cultural Course).—The relation of the plant world to the physical and animal worlds. The progressive development of the plant world and its evolutional significance; its part in the formation of soils, the production of food, and the maintenance of life. Lectures, demonstrational quiz, one or two field trips. Designed to accompany Bot. 1b, but may be elected without it.

Bot. 90a. Thesis Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Arrange.

Bot. 91a. Honors Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Arrange.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

Bot. 33. Plant Physiology.—*Prerequisite:* Bot. 3 and junior standing. (3 or 5).* 1-3 MWF; 155 N.H. Professor HOTTES and assistant.

Bot. 43. Pteridophytes.—*Prerequisite:* One year of botany, inclusive of Bot. 2 or 12, and junior standing. (3 or 5).* 10-12 TTS; 201 Entom. Professor BUCHHOLZ.

Bot. 45. Plant Histology, Anatomy, and Technic.—*Prerequisite:* One year of botany, inclusive of Bot. 2 or 12, and junior standing. (3 or 5).* 8-10 MWF; 206 Entom. Professor BUCHHOLZ.

Bot. 56. Plant Geography.—*Prerequisite:* Bot. 8 or 81, and junior standing. (3 or 5).* 10-12 MWF; 216 N.H. Associate Professor VESTAL.

Bot. 60. Advanced Systematic Botany.—Systems of classification of flowering plants, pylogeny, use of regional manuals in the identification of plants, field trips, etc. *Prerequisite:* Bot. 6 and junior standing. (3 or 5).* Lect. 1 TT; Lab. 2-3 Tu, 2-4 Th; 350 N.H.; field hours to be arranged. Dr. FULLER.

Bot. 70. Taxonomy of Pathogenic Fungi.—*Prerequisite:* Bot. 7 or 41, and junior standing. (3 or 5).* Lect. 11 Tu, Lab. 10-12 ThS; 304 N.H. Professor STEVENS.

Bot. 81. Plant Ecology.—*Prerequisite:* One year of botany and junior standing. (3 or 5).* Lect. 8 TT; 229 N.H.; field work on four or five Saturdays. Associate Professor VESTAL.

Courses for Graduates

Bot. 110. Botanical Discussion.—No credit. Required of all graduate students in botany and members of the instructional staff. 4 Tu; 258 N.H.

Bot. 112. Discussions in Plant Morphology.—(¼ unit). 4 F; 205 Entom. Professor BUCHHOLZ.

Bot. 113. Discussions in Plant Physiology.—(¼ unit). 4 Th; 155 N.H. Professor HOTTES.

Bot. 117. Discussions in Plant Pathology and Mycology.—(¼ unit). 4 W; 304 N.H. Professor STEVENS.

Bot. 118. Discussions in Plant Ecology.—(¼ unit). 4 M; 204 N.H. Associate Professor VESTAL.

Research Courses

Bot. 120. Plant Morphology.—(½ to 2 units).* (Botany 112 to be taken concurrently.) 1 hour on either W or F, from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 130. Plant Physiology.—(½ to 2 units).* (Botany 113 to be taken concurrently.) 1 hour on M, W, or F, from 1 to 3, the rest arrange; Botany Annex. Professor HOTTES.

Bot. 170. Plant Pathology or Mycology.—(½ to 2 units).* (Botany 117 to be taken concurrently.) 1 hour on either M or W, from 2 to 4; the rest arrange; 304 N.H. Professor STEVENS.

Bot. 180. Plant Ecology or Geography.—(½ to 2 units).* (Botany 118 to be taken concurrently.) Conf., 1 M or 10 Tu, the rest arrange; 204 N.H. Associate Professor VESTAL.

BUSINESS ORGANIZATION AND OPERATION

3	A	8	MWF	224 Com.	Dillavou

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

B.O.O. 14. The Technique of Executive Control.—*Prerequisite:* B.O.O. 1.

Credit	Section	Hours	Days	Room	Instructor
3	F	2	MWF	329 Com.	ANDERSON

B.O.O. 17. Problems in Sales Administration.—*Prerequisite:* Credit or concurrent registration in B.O.O. 7.

2	K	9	TT	329 Com.	HESLIP

B.O.O. 20. Credits and Collections.—*Prerequisite:* B.O.O. 2; junior standing.

3	D	11	MWF	329 Com.	HUEGY

B.O.O. 75. Management of Public Utilities.—*Prerequisite:* Econ. 1 and Accy. 2a.

3	A	8	MWF	223 Com.	GRAY

Courses for Graduates

B.O.O. 102. Marketing Policies and Problems.—(1 unit). Arrange. Professor CONVERSE.

B.O.O. 104. Scientific Management.—(1 unit). Arrange. Professor ANDERSON.

B.O.O. 107. Sales Campaigns.—(1 unit). Arrange. Professor RUSSELL.

B.O.O. 129. Thesis.—(1 unit). Arrange. Professor RUSSELL and others.

C. BUSINESS LAW

Courses for Undergraduates

Bus. Law 1a. General Principles of Business Law.—*Prerequisite:* 60 hours of university credit, including Econ. 1 and Accy. 1b.

3	A	8	MWF	106 Com.	CURTIS
	B	9	MWF	123 Com.	ROBERTS
	K	9	TTS	106 Com.	CURTIS

Bus. Law 1b. General Principles of Business Law.—*Prerequisite:* Bus. Law 1a.

3	A	8	MWF	122 Com.	FRANKLIN
	J	8	TTS	122 Com.	

Bus. Law 2. Elementary Law of Business.—This course is offered exclusively for non-commerce students. *Prerequisite:* Junior standing.

3	A	8	MWF	123 Com.	ROBERTS
	K	9	TTS	223 Com.	

Course for Advanced Undergraduates and Graduates

Bus. Law 10. Law of Security Relations and Banking.—*Prerequisite:* Senior standing and registration or credit in Bus. Law 1b.

3	C	10	MWF	224 Com.	DILLAVOU
	D	11	MWF	224 Com.	

D. BUSINESS ENGLISH

(See Rhetoric 10, 21, and 22 under English Department.)

CERAMIC ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2.00 to $7.50.

Courses for Undergraduates

Cer.E. 1. Ceramic Materials.—*Prerequisite:* Chem. 4.

3	A	8	MWF	214 Cer.
	B	8	MWF	218 Cer.

Cer.E. 21. Ceramic Pyrometry.—*Prerequisite:* General physics; inorganic chemistry. (1). 4 Tu; 214 Cer.

Cer.E. 97. Thesis.—(3 to 5).* Arrange.

Cer.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

Cer.E. 5. Ceramic Bodies.—*Prerequisite:* Cer. 1, 4. (5). Quiz, 10 MWF, 218 Cer.; Lab. A, 1-4 MWF, Lab B, 9-12 TTS; 113-114 Cer.

Cer.E. 7. Structural Clay Products.—*Prerequisite:* Cer. 1, 4. (3). Lect. and quiz, 11 MWF; 218 Cer.

Cer.E. 16. Enamels.—*Prerequisite:* Cer. 14. (3). 8 Th, 214 Cer.; 9-12 TT, 102, 113-114 Cer.

Cer.E. 18. Ceramic Microscopy.—*Prerequisite:* Chem. 40; Geol. 47 and 49 or equivalent. (3). 1-4 TT, 9-12 S; 312 Cer.

Cer.E. 22. Kilns and the Burning of Clay Products.—*Prerequisite:* Cer. 5 and 11. (3). 11 MWF; 214 Cer.

Cer.E. 23. Dryer and Kiln Design.—*Prerequisite:* Cer. 11; registration in Cer. 22; G.E.D. 1 or 4. (2). 2-5 TT; 212 Cer.

Courses for Graduates

Cer.E. 101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

Cer.E. 103. Chemistry of the Silicates.—Laboratory to supplement Ceramic Engineering 101, which must precede or accompany it. (1 to 2 units).*

Cer.E. 106. Research.—Professors Parmelee, Hursh, Andrews.

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in the chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, ceramic engineering, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7 a student is permitted to register in Chem. 2; or upon passing a proficiency examination in Chem. 2, he may register in Chem. 4, 5, or 6.

Chem. 93a. General Chemistry.—Lectures, demonstrations, and recitations. An elementary résumé of the various fields of chemistry. (*Note:* This course is accepted in partial fulfilment of the general science requirement. It is not accepted as a prerequisite to other chemistry courses.) *Prerequisite:* Junior standing or consent of the instructor. No credit is allowed students who have previous credit in college chemistry. (3). 2 MWF; 100 Chem. Professor Buswell and assistant.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 2 or 3. Students may register in either lecture section but are required to take the quiz and laboratory in some one section.

[1]Students who have received entrance credit for high school chemistry are given only 3 hours credit for Chem. 1. Seniors will receive only 3 hours credit.

	D Lab.	1–5	Th	50 Chem.	HOWARD

Chem. 62a. Principles of Research and Development in Chemical Engineering.—*Prerequisite:* Senior standing in chemistry or chemical engineering. (2). Lect., 10 MW; 161 Chem. Professor KEYES.

Chem. 73a. Metallurgy.—*Prerequisite:* Senior standing in engineering courses only. (3). Lect., 8 MWF; 161 Chem. Mr. HOWARD.

Chem. 86a. Chemistry of Sanitation.—*Prerequisite:* Chem. 24. Lectures, demonstrations, and field trips. (3). 10 MWF; 162 Chem. Professor BUSWELL and assistant.

Chem. 92a. Chemical Literature and Reference Work.—(Required of juniors in chemistry; expected also of juniors taking major work in chemistry.) *Prerequisite:* 18 hours of chemistry, one year of French or German, junior standing.

1	A	10	Th	201 Chem.	BARTOW
	B	8	F	201 Chem.	
Graduates only....	K	4	W	201 Chem.	

Chem. 95a. History of Science with Particular Reference to Chemistry.—*Prerequisite:* Junior standing and 20 hours of laboratory science. (2). 8 TT; 112 Chem.A. Dr. BARTOW.

Courses for Graduates

Chem. 101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼ to 1 unit).* Professor HOPKINS.

Chem. 105a. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 11 S; 162 Chem. Special topic: Non-aqueous Solvents as Media for Chemical Reactions (Dr. AUDRIETH). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 123a. Qualitative Analysis.—(½ unit). Lectures. 11 MF; 116 Chem. Associate Professor REEDY.

Chem. 123c. Qualitative Analysis.—(Laboratory work, optional, to accompany Chem. 123a.) (¼ to ¾ unit).* Arrange. Associate Professor REEDY.

Chem. 125a. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 4 Th; 162 Chem. Professor CLARK.

Chem. 126a. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½ unit). Lectures. 9 TT; arrange. Assistant Professor ENGLIS.

Chem. 126c. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—(Laboratory work, optional, to accompany Chem. 126a.) (¼ to ¾ unit).* Arrange; 305a Chem. Assistant Professor ENGLIS.

Chem. 127a. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures. 10 TT; 217 Chem. Professor CLARK.

Chem. 127c. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127a.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 132a. Organic Chemistry.—(First course.) (¾ unit). 11 TT; 217 Chem. Associate Professor SHRINER.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Associate Professor SHRINER.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 135a. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 11 W; 217 Chem. Professor ADAMS.

Chem. 136a. Organic Chemistry.—Special Topics. (¾ unit). 11 TT; 112 Chem.A. Professor FUSON.

Chem. 145a. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 152a. Physiological Chemistry.—Chiefly laboratory. (½ to 1 unit).* Arrange; 467b Chem. Professor ROSE.

Chem. 155a. Physiological Chemistry.—(Seminar required of all students majoring in physiological chemistry). (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160a. Advanced Chemical Technology and Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186a. Sanitary Chemistry.—(½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

Chem. 190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS.

Inorganic Chemistry.—Professor HOPKINS; Associate Professor REEDY; Dr. AUDRIETH, Dr. BAILAR, Dr. QUILL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK; Associate Professor REEDY; Assistant Professors SMITH, ENGLIS.

Food Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON; Associate Professor SHRINER; Dr. BAILAR.

Zymochemistry.—Professor BUSWELL.

Phytochemistry.—Assistant Professor ENGLIS.

Physiological Chemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES; Associate Professor KRASE; Assistant Professor KISTLER, Mr. HOWARD, Assistant Professor SWANN.

Ceramic Chemistry.—Professor PARMELEE.

CIVIL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $2.50.

CLASSICS

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, and 17.

Minors: 20 hours chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Major: 20 hours, excluding Latin 1a-1b, 6, 11a-11b, 13, and 20, and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours chosen from not more than two of the following: foreign language (Greek being especially recommended), English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

Classics

Major: 20 hours in Greek and Latin, excluding Greek 1a-1b, 15, 16, 17 and Latin 1a-1b, 6, 9, 11a-11b, 13, 20. At least six hours shall be offered in the secondary language and the remaining hours in the primary one.

Minors: 20 hours chosen from not more than two of the following: foreign language, English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

A. GREEK

Courses for Undergraduates

Greek 1a. Elementary Greek.—(4). 11 TWTF; 120 L.H. Associate Professor Perry.

Greek 3. Second Year Greek. Plato.—*Prerequisite:* Greek 1a-1b. (3). 11 MWF; 114 L.H. Mr. Johnston.

Courses for Advanced Undergraduates and Graduates

Greek 5. Herodotus and Lyric Poets.—*Prerequisite:* Greek 3 and 4 or an equivalent. (3). 9 TTS; 114 L.H. Associate Professor Perry.

Greek Life and History

Note: For Greek 16, 18, and History 55, a knowledge of Greek is not presupposed.

Greek 16. Life of the Ancient Greeks.—*Prerequisite:* Sophomore standing. (1). 3 Th; 120 L.H. Dr. Rapp.

Greek 18. Greek Archaeology.—*Prerequisite:* Sophomore standing. (2). 2 TT; 120 L.H. Dr. Rapp.

Greek History.—See History 55. 1 MWF; 202 L.H. Professor Oldfather.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

Note: Students desiring to take graduate work in Greek should have had at least three years of college Greek or an equivalent.

Greek 105b. Plato.—(1 unit). Twice a week. Arrange. Professor OLDFATHER.

Greek 110a. See Latin 110a.

Greek 121. Thucydides.—(1 unit). Twice a week. 9 MF; 124 L.H. Associate Professor PERRY.

B. LATIN

Courses for Undergraduates

Latin 6. Cicero.—*Prerequisite:* Two entrance units in Latin or Latin 11a-11b. (4). 2 TWTF; 114 L.H. Mr. STONE.

Latin 1a. Ovid.—*Prerequisite:* Three entrance units in Latin or Latin 6. (4). 1 TWTF; 114 L.H. Mr. JOHNSTON.

Latin 12a. Plautus, Terence, Catullus.—*Prerequisite:* Four entrance units in Latin or Latin 1a-1b. (4). 9 TWTF; 120 L.H. Professor CANTER.

Latin 3. Lucretius and Horace (Odes).—*Prerequisite:* Latin 12a-12b or an equivalent. (3). 10 MWF; 120 L.H. Professor CANTER.

Latin 5a. Latin Composition.—*Prerequisite:* Three entrance units in Latin or Latin 6. Required to secure the department's recommendation to teach. (1). 4 Th; 120 L.H. Dr. RAPP.

ROMAN LIFE AND HISTORY

Latin 20. Mythology of Greece and Rome.—*Prerequisite:* Sophomore standing. *Note:* This course presupposes no knowledge of Latin and is open to all students except freshmen. (2). 2 TT; 202 L.H. Associate Professor PERRY.

ECONOMICS

(Including courses formerly listed as Public Utilities and Transportation)

(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences. 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

The courses in economics may be grouped in several rather distinct fields in which students may find it profitable to concentrate in their junior and senior years. The following fields are suggested: economic theory, history, and statistics; public and private finance, including insurance; labor; foreign trade; public utilities and transportation.

Courses for Undergraduates

Econ. 1. Principles of Economics.—*Prerequisite:* 30 hours of university work.

Scand. 130. The Runic Inscriptions: Old Scandinavian, Anglo-Saxon, Gothic and German.—(1 unit). Arrange; 209 L.H. Professor FLOM.

Scand. 150. Research.—Thesis. Conferences. (1 to 2 units).* Arrange; 209 L.H. Professor FLOM.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, without prerequisite. It is prerequisite to all other courses in the department except 2, 31, and 32, and may be followed by any of the other courses for undergraduates or by 6, 10, 20, or 21 in the senior year. Agricultural students and others desiring strictly practical work may take 1, 8, and 20 in sequence. Students majoring in entomology should take as many of the courses offered as possible, including some work in classification, morphology, and control, and should consult the head of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

Credit	Section	Hours	Days	Room	Instructor
3[1]	A	8–10	MWF	309 Entom.	HAYES, KEARNS, HEISS
[1]Seniors will receive only 2 hours credit.	B	10–12	MWF	309 Entom.	METCALF, BALDUF, MILUM
	C	1–3	MWF	309 Entom.	METCALF, MILUM, BURKS

Entom. 2. Insects: Their Ways and Their Relations to Man.—A non-technical, cultural course of illustrated lectures. *Prerequisite:* 30 hours of university work. (Not open to students who have taken Entom. 1.)

2	A	11	TT	202 Entom.	BALDUF and others
	B	2	TT	202 Entom.	

Entom. 7a. External Insect Morphology.—*Prerequisite:* Entom. 1 and 30 hours of university work. (3). 10-12 MWF; 312 Entom. Associate Professor HAYES.

Entom. 8a. Economic Entomology.—*Prerequisite:* Entom. 1, and 30 hours of university work. (3 or 5).* For 5 hours credit additional work on an insect collection is assigned. 8-11 TT; 312 Entom. Associate Professor HAYES.

Entom. 31. Essentials of Beekeeping.—*Prerequisite:* 30 hours of university work. (1 or 2).* Lect., 4 Tu; for 2 hours credit include lab., 3-5 Th; 104 Exp. Zool. Lab. Assistant Professor MILUM.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Members of the department.

Entom. 20. Insect Control.—*Prerequisite:* Entom. 1 and senior standing. (4). 2-5 TT; 109 Entom. Professor METCALF.

Courses for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 100. Research.—(½ to 4 units).* Time to be arranged.

(a) **Morphology and Embryology of Insects.**—Associate Professor HAYES.
(b) **Economic Entomology.**—Professor METCALF.
(c) **Systematic Entomology.**—Professor METCALF, Assistant Professor BALDUF.
(d) **Biology and Ecology of Insects.**—Professor METCALF.

Entom. 107a. Insect Anatomy.—(1 unit). 10-12 MWF; 312 Entom. Associate Professor HAYES.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

GENERAL ENGINEERING DRAWING

Note: All courses in this department require laboratory fees of $1.50.

Courses for Undergraduates

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9 and 19. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

Courses for Advanced Undergraduates and Graduates

Math. 16. Differential Equations and Advanced Calculus.—*Prerequisite:* Math. 7 and 9 (or 8).

3	A	8	MWF	206 U.H.	Bailey
	E	1	MWF	110 L.H.	Steimley

Math. 22. Statistics.—*Prerequisite:* Math. 2 (or 3) and 6, junior standing. (3). 11 MWF; 154 Math. Associate Professor Crathorne.

Math. 35. Teachers' Course.—*Prerequisite:* 18 hours of mathematics, including Math. 7 and 9. (3). 10 MWF; 156 Math. Associate Professor Lytle

Math. 36. Advanced Aspects of Euclidean Geometry.—*Prerequisite:* 18 hours of mathematics, including Math. 7 and 9. (3). 9 MWF; 156 Math. Associate Professor Lytle.

Math. 53a. Integral and Operational Equations in Mathematical Physics.—*Prerequisite:* Math. 9a. (3). 1 MWF; 254 Math. Dr. Bourgin.

Math. 70a. Introduction to Higher Algebra.—*Prerequisite:* Math. 7 and 9. (3). 10 TTS; 254 Math. Professor Coble.

Math. 71a. Introduction to Higher Analysis.—*Prerequisite:* Math. 7 and 9. (3). 11 MWF; 155 Math. Dr. Ketchum.

Math. 72a. Introduction to Higher Geometry.—*Prerequisite:* Math. 7 and 9. (3). 9 TTS; 155 Math. Assistant Professor Levy.

Math. 90a. Undergraduate Thesis.—*Prerequisite:* 24 hours of college mathematics. (2). Arrange.

Courses for Graduates

Math. 100. Seminar and Thesis.—(1 to 2 units).* Arrange.

Math. 112. Linear Difference Equations.—(1 unit). 11 MWF; 254 Math. Professor Carmichael.

Math. 129. Theory of Statistics.—(1 unit). 10 MWF; 254 Math. Associate Professor Crathorne.

Math. 131. Algebraic Geometry.—(1 unit). 8 MWF; 254 Math. Professor Emch.

Math. 143. Linear Algebras.—(1 unit). 9 MWF; 366 Math. Associate Professor Hazlett.

Math. 170. Algebra.—(1 unit). 10 MWF; 366 Math. Assistant Professor Brahana.

Math. 171. Analysis.—(1 unit). 9 MWF; 254 Math. Dr. Pepper.

Math. 172. Geometry.—(1 unit). 9 TTS; 254 Math. Professor Coble.

MECHANICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $4.50.

Courses for Undergraduates

M.E. 1. Steam and Air Machinery.—*Prerequisite:* Math. 9; Physics 1 and 3.

3	E	1	MWF	217 M.E.L.
	F	8	MWF	208 M.E.L.
	GU	11	MWF	217 M.E.L.

M.E. 3. Steam Engineering.—*Prerequisite:* M.E. 10; registration in M.E. 61.

3	KM	10	TTS	208 M.E.L.
	JLNV	11	TTS	208 M.E.L.

M.E. 7. Internal Combustion Engines.—*Prerequisite:* M.E. 6.

3	PQ	11	MWF	208 M.E.L.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

M.E. 10. Thermodynamics.—*Prerequisite:* Math. 9; Physics 1 and 3.

Credit	Section	Hours	Days	Room	Instructor
3	LM	8	MWF	217 M.E.L.	
	KN	2	MWF	217 M.E.L.

M.E. 17. Refrigeration Engineering.—*Prerequisite:* M.E. 16.

3	PQ	11	MW	202 T.B.
		8–10	S	112 T.B.

M.E. 21. Mechanical Equipment of Buildings (Laboratory).—*Prerequisite:* Registration in M.E. 23.

1	C	8–11	W	M.E.L.

M.E. 23. Mechanical Equipment of Buildings.—*Prerequisite:* Senior standing.

4	C	11	MWFS	M.E.L.

M.E. 25. Heating and Ventilation for Architects.—*Prerequisite:* Senior standing.

2	A	11	TT	M.E.L.

M.E. 31. Mechanics of Machinery.—*Prerequisite:* Registration in T.A.M. 2.

5	PQ	8	MWF	216 T.B.
		8–11	TT	201, 216 T.B.
	RS	1	MWF	216 T.B.
		1–4	TT	201, 216 T.B.

M.E. 33. Aeronautical Engineering.—*Prerequisite:* Senior standing.

3	PQ	11	MWF	216 M.E.L.

M.E. 41. Mechanical Engineering Design.—*Prerequisite:* M.E. 40.

4	P	8–11	MWF	112, 114 T.B.
	Q	1–4	MWF	112, 114 T.B.

M.E. 61. Mechanical Engineering Laboratory.—*Prerequisite:* M.E. 1 or 2 or 3.

2	KCh1	2–5	MF	M.E.L.
	LVCh2	2–5	W	M.E.L.
		8–11	S	M.E.L.

	LQ	8–11	MF	Pat. Lab.
	MR	1–4	TT	Pat. Lab.
	J1NS	1–4	MF	Pat. Lab.

M.E. 87. Machine Laboratory.—*Prerequisite:* Sophomore standing.

3	JKS	8–11	TT	Mach. Lab.
	LR	8–11	MF	Mach. Lab.
	MPV	1–4	TT	Mach. Lab.
	NQW	1–4	MF	Mach. Lab.

M.E. 89. Heat Treatment of Metals.—*Prerequisite:* Senior standing in Mechanical or Railway Mechanical Engineering.

3	P	2–4	MWF	Mach. Lab.
	QW	8–10	MWF	Mach. Lab.

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

M.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. No credit.

Courses for Graduates

Note: Entrance on graduate work in mechanical engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Associate Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—Application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor Macintire.

M.E. 109. Mechanical Engineering Design.—(a) machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors Leutwiler, Ham.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating and ventilation; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors Polson, Kratz, Ham, Macintire; Associate Professor Goff.

METALLURGICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2.50 to $7.50.

Courses for Undergraduates

Met. 3 (formerly Mining 69). **Fire Assaying.**—*Prerequisite:* Chem. 22, Geol. 20. (2). 1-5 M, 9 Tu.; Mining Lab. and 207 T.B. Assistant Professor MITCHELL.

Met. 4. Physical Metallurgy.—*Prerequisite:* Met. 2. (3). 8 MWF; 206 T.B. Assistant Professor MITCHELL.

Met. 13 (formerly Mining 13). **Utilization of Fuels.**—*Prerequisite:* Chem. 22; junior standing in College of Engineering. (3). 9 MF, 1-4 W; 207 T.B. and Mining Lab. Professor CALLEN.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses.

Mil. Bands 1. Freshman Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Mil. Bands 3. Sophomore Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Mil. Bands 5. Junior Band.—Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY.

Mil. Bands 7. Senior Band.—Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

†This course meets twice a week for 45 minutes; registration is limited to students with free period following this hour.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00.

Major: 20 hours from courses offered in the department. At least 5 hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than 8 hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6, or 7), education, or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.

Sophomore year: Physics 1a-1b, 3a-3b, and calculus.

Junior year: Physics 14, 44, 60, 61.

Senior year: Physics 23, 30, 62, 71, 72, 78.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Courses for Graduates

Physics 122a. Dynamics.—(1 unit). 8 MWF; 302 P.L. Professor Kunz.

Physics 131a. Physical Laboratory Technique.—(½ to 1 unit).* Arrange. Professor Knipp.

Physics 146a. Electrodynamics.—(1 unit). 9 TTS; 302 P.L. Assistant Professor Bartlett.

Physics 160. Thermodynamics.—(1 unit). 8 TTS; 302 P.L. Professor Kunz.

Physics 184. Line Spectra and Atomic Structure.—(1 unit). 11 MWF; 202 P.L. Dr. Almy.

Physics 186a. Quantum Mechanics.—(1 unit). 11 TTS; 302 P.L. Dr. Mott-Smith.

Physics 190. Research.—(1 to 3 units).* Arrange. Profesors in the department.

Physics 198. Seminar.—(1 to 2 units).* Arrange. Professors in the department.

Physics 199. Physics Colloquium.—(No credit). 4:45 Th; 119 P.L. Dr. Mott-Smith.

PHYSIOLOGY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $3.50.

Major: 20 hours from courses offered in the department, exclusive of Physiology 1.

Minors: 20 hours in not more than two of the following: bacteriology, botany, chemistry, entomology, and zoology. At least eight hours must be offered in each subject if two are chosen.

Courses for Undergraduates

Physiol. 1. Mammalian Physiology.—A survey of the field of mammalian physiology.

Physiol. 8. Thesis.—*Prerequisite:* Senior standing and 15 hours of physiology. (3 to 5).* Time to be arranged before registration. Associate Professor BURGE and Mr. WICKWIRE.

Courses for Graduates

Physiol. 101. Journal Club.—Review of literature. (¼ unit). Arrange. Members of the staff.

Physiol. 102. Research.—(1 to 2 units).* Arrange. Associate Professor BURGE.

Physiol. 103. Experimental Physiology.—(½ to 1 unit).* Arrange. Sect. A, Associate Professor BURGE; Sect. B, Associate STEGGERDA.

POLITICAL SCIENCE

Major: 20 hours from any courses offered by the department. A major may include three hours of constitutional history (Hist. 44 or 62).

Minors: 20 hours selected from one or two of the following subjects: history, economics, law, sociology, philosophy, and education. At least eight hours must be offered in each subject, if two are chosen.

Courses 1 and 3 give a general survey of national, state, and local government in the United States. Undergraduates beginning the study of political science are advised to take first, course 1, 3, or 16, and those planning for advanced work should take course 1 and either 3 or 16 in their sophomore year. Course 3 is offered the second semester.

Courses for Undergraduates

Pol. Sci. 1. American National Government.—*Prerequisite:* Sophomore standing.

Zool. 63. Comparative Vertebrate Embryology.—*Prerequisite:* One year of zoology; senior standing.

2 to 5*		10	MW	326 N.H.	SHUMWAY
		Other hours to be arranged			

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year of undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 103. Cytology: The Animal Cell.—(1 unit). 2 MW; 340 N.H. Professor SHUMWAY.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 131. Helminthology.—(½ to 1 unit).* 2-5 TT; 418 N.H. Professor VAN CLEAVE, Assistant Professor THOMAS.

Individual Research Courses

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor THOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Assistant Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange. 432 N.H. Professor SHUMWAY.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Assistant Professor KUDO.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 11, in Art 35a-35b, Commercial Art, the prerequisites given are Art 27b and 31b. These two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

TIME TABLE FOR COURSES OF INSTRUCTION SECOND SEMESTER, 1934-1935

AGRICULTURAL COLLEGE ADMINISTRATION

Course for Undergraduates

Agr. Coll. Adm. 6. Agricultural Extension.—*Prerequisite:* Junior standing. (2). 10 TT; 118 New Agr. Associate Professor HUDELSON and others.

AGRICULTURAL ECONOMICS

Courses for Undergraduates

Agr. Econ. 1. Introductory Agricultural Economics.—

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	3	W	103 New Agr.	ROSS
	Disc. A	3	MF	313 New Agr.	JORDAN
	Disc. B	10	MW	313 New Agr.	
	Disc. C	2	TT	313 New Agr.	

Agr. Econ. 20. Farm Management.—*Prerequisite:* Sophomore standing. Local field trips will be arranged; estimated cost, $3.

3	Lect. and Disc.	10	TT	316 New Agr.	CASE
	S Lab.	1–3	Th	331 New Agr.	WILLS
	T Lab.	1–3	F	331 New Agr.	ACKERMAN

Agr. Econ. 40. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.

(b) **Agricultural Marketing.**—Members of the department.
(d) **Agricultural Prices and Statistics.**—Members of the department.
(f) **Farm Management.**—Professor CASE.
(h) **Land Economics.**—Associate Professor STEWART.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 14. Cooperation in Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (2). 11 TT; 313 New Agr. Assistant Professor BARTLETT.

Agr. Econ. 15. Financing Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 11 MWF; 118 New Agr. Dr. JORDAN.

Agr. Econ. 18. Land Economics.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 9 MWF; 118 New Agr. Associate Professor STEWART.

Agr. Econ. 23. Farm Business Analysis.—*Prerequisite:* Agr. Econ. 20 and Accountancy 1a. Lectures and quiz. Local field trips will be arranged; estimated cost, $5. (3). 1 MWF; 316 New Agr. Mr. WILLS.

Agr. Econ. 25. Farm Organization.—*Prerequisite:* Agr. Econ. 20. Local field trips will be arranged; estimated cost, $5. (3). 2 MWF; 310 New Agr. Professor CASE, Mr. ACKERMAN.

Agr. Econ. 34. Marketing Dairy Products.—*Prerequisite:* Junior standing. (2). Arrange; D. Mfrs. Assistant Professor BARTLETT and others. (Inspection trip requirement waived for 1934-35).

Agr. Econ. 37. Marketing Live Stock.—*Prerequisite:* Senior standing; An. Husb. 3. *Prerequisite or concurrent:* An. Husb. 6. (2). 9 TT; 316 New Agr. Associate Professor ASHBY. (Inspection trip requirement waived for 1934-35).

Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(b) **Agricultural Prices and Statistics.**—Members of the department.
(c) **Farm Management.**—Professor CASE.
(d) **Land Economics.**—Associate Professor STEWART.

Agr. Econ. 42. Farm Appraisals.—Valuation of farm real estate and other agricultural property. Factors studied include soils, crops, farm management, buildings, drainage, livestock, fruit, land titles, prices and taxes in relation to value. *Prerequisites:* Agron. 28, Agr. Econ. 20, or their equivalents; approval of Dean as supervisor. Local field trips to be arranged; estimated cost, $5. (5). 8 MWF, 8-12 S; 116 New Agr. Members of departments involved.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Arrange. Associate Professor STEWART.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Arrange. Assistant Professor BARTLETT.

Agr. Econ. 112. Agricultural Economics Research.—Only those who write acceptable reports of successful investigation will receive credit. (1 to 2 units).* Arrange. Members of the department.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Arrange. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(1 to 2 units).* Arrange. Professor LLOYD.

AGRICULTURAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $8.

Courses for Undergraduates

Agr. Eng. 1. Introduction to Agricultural Engineering.—

Credit	Section	Hours	Days	Room	Instructor
3[1]	Lect.	8	WF	201 Agr. Eng.	YOUNG
	B Quiz	9	W		
[1]Seniors will receive only 2 hours credit.	J Quiz	8	Tu		
	S Quiz	9	F		
	A Lab.	8–10	M		
	J Lab.	8–10	Th		
	N Lab.	1–3	Th		

Agr. Eng. 3. Gas Engines and Tractors.—*Prerequisite:* Agr. Eng. 1. (Inspection trip requirement waived for 1934-35).

3	Lect.	11	TT	201 Agr. Eng.	SHAWL
	K Quiz	9	Tu		
	O Quiz	2	Th		
	O Lab.	2–4	Tu		
	K Lab.	9–11	S		

Agr. Eng. 4. Farm Buildings.—*Prerequisite:* Agr. Eng. 1 or consent of instructor. (3). 1 MF; 202 Agr. Eng. Laboratory time to be arranged. Assistant Professor FOSTER.

Agr. Eng. 12. Farm Home Equipment.—*Prerequisite:* Agr. Eng. 1 or junior standing. (2). Lect., 1 Tu; Lab., 1-3 Th; 204 Agr. Eng. Professor LEHMANN.

Agr. Eng. 18b. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange. Professor LEHMANN, Assistant Professor SHAWL.

Agr. Eng. 21. Farm Shop Work.—*Prerequisite:* Agr. Eng. 1. (2). 3-5 MW; 201 Agr. Eng. Mr. YOUNG.

Courses for Advanced Undergraduates and Graduates

Agr. Eng. 17. Harvesting Machinery.—*Prerequisite:* Agr. Eng. 2. (3). Lect., 11 MW; Lab., 2-5 Tu; 201 Agr. Eng. Assistant Professor SHAWL.

Agr. Eng. 51. Special Power and Field Machinery.—*Prerequisite:* Agr. Eng. 17 or 28. Consult instructor before registering. (3). Arrange. Professor LEHMANN, Assistant Professor SHAWL.

AGRONOMY

Note: Certain courses in this department require laboratory fees varying from $2 to $4.

Courses for Undergraduates

Agron. 8. Forage Crops.—*Prerequisite:* Agron. 25.

3	Lect.	11	MW	205 Agr.	PIEPER
	Quiz	11	F	205 Agr.	

Agron. 18. Investigation with Thesis.—*Prerequisite:* Senior standing; not less than 20 hours pertinent to thesis problem; and the approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.

Soils.—Professors BAUER, DETURK, R. S. SMITH; Associate Professor SEARS.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Agron. 25. Farm Crops.—*Prerequisite:* Bot. 5.

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	3	MW	205 Agr.	PIEPER, DUNGAN, and VAN DOREN
	Lab.	1–3	Tu	600 Agr.

Agron. 28. Soils.—*Prerequisite:* Chem. 5; Geol. 44. (Local field trip, cost not to exceed $1.)

5	Lect.	8	MWF	205 Agr.	WIMER and CRANE
	Quiz	8	TT	205 Agr.	
	A Lab.	1–4	Th	650 Agr.	
	C Lab.	8–11	S	650 Agr.	

Courses for Advanced Undergraduates and Graduates

Agron. 10. Genesis, Morphology, Classification, and Geography of Soils.—*Prerequisite:* Agron. 28, junior standing. (3). Lect., 1 MWF; 205 Agr. Professor R. S. SMITH.

Agron. 13. Soil Productivity, its Variation, Modification, and Maintenance.—*Prerequisite:* Agron. 28, senior standing. (3). 9 MWF; 553 Agr. Professor BAUER.

Agron. 22. Plant Genetics and Breeding.—*Prerequisite:* Zool. 15, junior standing. (3). Lect., 10 MWF; 553 Agr. Professor WOODWORTH, Dr. BONNETT.

Agron. 31. Biological Methods of Soil Investigations.—(Given in 1934-35 and alternate years). *Prerequisite:* Agron. 11, senior standing. (3). 8-10 MWF; 323 Agr. Associate Professor SEARS.

Agron. 35. Farm Appraisals.—(See Agricultural Economics 42.)

Courses for Graduates

Agron. 104. Seminar.—(¼ unit). Once a week. Arrange. Graduate staff.

Agron. 114. Principles Underlying the Production of Crops.—(1 unit). Twice a week. Arrange. Professor BURLISON, Associate Professor DUNGAN.

Agron. 118. Research.—(½ to 4 units).* Arrange.
Soils.—Professors BAUER, DETURK, R. S. SMITH.
Crops.—Professors BURLISON, WOODWORTH; Associate Professor DUNGAN.

Agron. 119. Experiment Station Problems.—(See Animal Husbandry 103.) Professor MUMFORD.

ANIMAL HUSBANDRY

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.) (2). 3-5 TT; S.P. Mr. CRAWFORD, Mr. GARRIGUS.

An. Husb. 6. Livestock Management.—*Prerequisite:* An. Husb. 21. (5). 10 MTWTF; S.P. Professor EDMONDS.

An. Husb. 9b-t. Investigation with Thesis.—*Prerequisite:* Senior standing, including not less than 20 hours pertinent to thesis problem, and approval of the head of the department. This course is continuous through the year; credit is not given for either semester separately. (5). Arrange.
(b) **Beef Cattle.**—Professor RUSK, Associate Professor SNAPP.
(d) **Horses.**—Professor EDMONDS.
(f) **Sheep.**—Assistant Professor KAMMLADE.
(h) **Swine.**—Professor CARROLL.
(k) **Poultry.**—Professor CARD.
(m) **Animal Nutrition.**—Professor MITCHELL.
(p) **Animal Genetics.**—Associate Professor ROBERTS.
(r) **Animal Pathology.**—Professor GRAHAM.
(t) **Meats.**—Associate Professor BULL.

An. Husb. 10. Farm Meats.—(3). 1-4 TT; 128 Agr. Associate Professor BULL.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 1 or 2.

3	Lect.	2	W	553 Agr.	BULL and others
	A Quiz	2	MF	553 Agr.	
	B Quiz	11	TT	553 Agr.	

An. Husb. 35. Animal Hygiene, Sanitation, Contagious Diseases of Farm Animals.—*Prerequisite:* An. Husb. 34; Bact. 5a. (2). 3 TT; An. Path. L. Professor GRAHAM.

An. Husb. 37. Poultry Management.—*Prerequisite:* An. Husb. 21. (3 or 4).* 9 MWF; Lab. 3-5 Th; 316 New Agr. Students may register for this course either with or without the laboratory. Professor CARD, Dr. SLOAN.

An. Husb. 42. Poultry Diseases.—*Prerequisite:* An. Husb. 37. (2). 3 M, 3-5 W; An. Path. L. Lectures and demonstrations on parasitic, bacterial, filterable virus, protozoan, fungus, and nutritional diseases of domestic fowl. Professor GRAHAM.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Advanced Undergraduates and Graduates

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 27. Sheep Husbandry.—*Prerequisite:* An. Husb. 6. (3). 11 MWF; 111 S.P. Assistant Professor KAMMLADE.

An. Husb. 28. History of Breeds of Live Stock.—*Prerequisite:* An. Husb. 3. It is recommended that this course precede An. Husb. 22. (3). 3 MWF; 316 New Agr. Heads of divisions.

An. Husb. 31. Advanced Course in Animal Nutrition.—*Prerequisite:* Senior standing, including An. Husb. 7. (3). Arrange. Professor MITCHELL.

An. Husb. 33. Horse Production.—*Prerequisite:* An. Husb. 3 and 6. (3). 1 MWF; S.P. Professor EDMONDS.

An. Husb. 39. Poultry Production.—*Prerequisite:* An. Husb. 37. (3). 8 MWF; 316 New Agr. Professor CARD.

An. Husb. 41. Animal Genetics.—*Prerequisite:* Zool. 15. (3). 2 MWF; Gen. Bldg. Associate Professor ROBERTS.

Courses for Graduates

An. Husb. 103. Experiment Station Problems.—Once a week. (½ unit). Arrange. Professor MUMFORD.

An. Husb. 112a-f. Research.—One to three times a week. (½ to 2 units).*

(a) **Economic Factors in Meat Production.**—Professor RUSK.
(b) **Systems of Live Stock Farming.**—Professor CASE.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Associate Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

These courses may be taken during the summer by special permission.

An. Husb. 117. Animal Genetics.—Two to five times a week. (1 unit). Associate Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—Two hours a week. (½ unit). Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—Two to five times a week. (½ to 1 unit).* Laboratory fee, $5. Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—Two to five times a week. (½ to 1 unit).* Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—Two to five times a week. (½ to 1 unit).* Arrange. Associate Professor ROBERTS.

ARCHITECTURE

Courses for Undergraduates

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32, or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; or by securing special permission he may register in Chem. 4, 5, or 6.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42, 43, 27, 34a, 36b and 37b, 50a, 15a, and 97b. Courses of a more special nature will not as a rule be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42, and 43, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b.) 8 MW; 303 Chem. Dr. QUILL.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) Arrange. (¼ to ¾ unit).* Dr. QUILL.

Chem. 105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 11 S; 162 Chem. Special topic: The influence of atomic radii and atomic volumes on chemical properties. (Dr. QUILL). 9 TT; 161 Chem. Professor HOPKINS.

Chem. 124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods, and applications. (½ unit). Lectures, 11 MF; 116 Chem. Associate Professor REEDY.

Chem. 124d. Quantitative Analysis.—(Laboratory work, optional, to accompany Chem. 124b.) (¼ to ¾ unit).* Arrange; 260 Chem. Assistant Professor SMITH.

Chem. 125b. Quantitative Analysis.—(Seminar). Required of all students taking a major or minor in analytical chemistry. (¼ to 1 unit).* 4 Th; 162 Chem. Additional meetings arrange. Professor CLARK.

Chem. 127b. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures, 10 TT; 217 Chem. Professor CLARK.

Chem. 127d. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127b.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). 11 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH

Chem. 150b. Physiological Chemistry.—(¾ unit). 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory work. Arrange; 467b Chem. Professor ROSE.

Chem. 155b. Physiological Chemistry.—(Seminar). Required of all students majoring in physiological chemistry. (¾ unit). 9-11 F; 456 Chem. Professor ROSE.

Chem. 160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (½ unit). 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Dr. BAILAR, Dr. AUDRIETH, Dr. QUILL, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK, Associate Professor REEDY, Assistant Professors ENGLIS, SMITH.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON; Associate Professor SHRINER, Dr. BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES, Associate Professor KRASE, Assistant Professor KISTLER.

Ceramic Chemistry.—Professor PARMELEE.

Zymochemistry.—Professor BUSWELL.

CIVIL ENGINEERING

D.H. 5. Composition of Dairy Products.—*Prerequisite:* Junior standing, including Chem. 32. (3). 10-12 MWF; 502 Agr. Assistant Professor OVERMAN.

D.H. 7. Creamery Buttermaking and Factory Management.—*Prerequisite:* D.H. 24b or its equivalent and junior standing. (5). Lect., 1 MTu; Lab., 1-3 Th, 1-6 F; Quiz, 2 Tu; D.Mfrs. Professor RUEHE, Mr. TUCKEY. Inspection trip waived, 1934-35.

D.H. 8. Fluid Milk Plant Operations.—*Prerequisite:* D.H. 24b or its equivalent and junior standing. (3). 8-10 MWF; D.Mfrs. Associate Professor TRACY, Mr. RAMSEY. Inspection trip waived, 1934-35.

D.H. 14. Milk Condensing.—*Prerequisite:* D.H. 24b or its equivalent and junior standing. (3). Lect., 9 TT; Lab., 1-5 W; D.Mfrs. Associate Professor TRACY, Mr. RAMSEY. Inspection trip waived, 1934-35.

D.H. 21. Systems of Dairy Farming.—*Prerequisite:* Junior standing. (3). 11 MWF; 553 Agr. Inspection trip costing about $1. Professor FRASER.

Courses for Graduates

D.H. 101. Economic Milk Production.—(½ to 2 units).* Twice a week. Arrange. Professor FRASER.

D.H. 105. Dairy Manufactures.—(½ to 2 units).* Arrange. Professor RUEHE, Associate Professor TRACY.

D.H. 106. Dairy Bacteriology.—(½ to 2 units).* Arrange. Professor PRUCHA.

D.H. 107. Dairy Chemistry.—(½ to 2 units).* Arrange. Assistant Professor OVERMAN.

D.H. 108. Physiology of Lactation.—(½ to 2 units).* Arrange. Professor GAINES.

D.H. 112a-f. Research.—(1 to 4 units).* Arrange. *Note:* Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

(a) **Dairy Bacteriology.**—Professor PRUCHA.
(b) **Dairy Chemistry.**—Assistant Professor OVERMAN.
(c) **Dairy Cattle Breeding.**—Professor YAPP.
(d) **Dairy Cattle Feeding.**—Associate Professor NEVENS.
(e) **Milk Production.**—Professor GAINES.
(f) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.

D.H. 113. Seminar.—(½ unit). Once a week. Both semesters. Current literature in dairy bacteriology, dairy chemistry and dairy manufactures. Members of the graduate staff.

D.H. 114. Seminar.—(½ unit). Once a week. Both semesters. Current literature in biology of milk production. Professor GAINES.

ECONOMICS

Including courses formerly in Public Utilities and Transportation
(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.
Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

Courses for Graduates

Note: Entrance on graduate work in electrical engineering presupposes the equivalent of the full undergraduate course in that subject. The undergraduate courses in electrical engineering are open for minor credit to students majoring in other departments who have the proper prerequisites.

E.E. 101. Advanced Courses in Alternating Currents.—(½ to 2 units).* Arrange.

(a) Graduate Seminar.—Professor PAINE.
(c) Machine Transients.—Assistant Professor KEENER.

E.E. 102. Electric Waves, Oscillations and Transients.—(½ to 1 unit).* Arrange.

(a) Theory of Electric Waves, Oscillations and Transients.—Assistant Professor REICH.
(b) Demonstration Lecture.—Assistant Professor REICH.
(c) Theory of Energy Radiation.—Assistant Professor BROWN.
(d) Principles of Television Engineering.—Assistant Professor BROWN.

E.E. 103. Electrical Design.—(½ to 1 unit).* Arrange.

(a) Power Plant Design.—Professor PAINE.
(b) Machine Design.—Professor PAINE.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9 and 19. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Graduates

Note: Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Associate Professor GOFF.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor MACINTIRE.

M.E. 109. Mechanical Engineering Design.—(a) Machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors LEUTWILER, HAM.

M.E. 110. Advanced Heating, Ventilating, and Air Conditioning.—Applications of various systems, notable developments, and results of research. Individual problems. (1 unit). Twice a week. Arrange. Professor SEVERNS.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating, ventilation, and air conditioning; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors POLSON, KRATZ, HAM, MACINTIRE; Associate Professor GOFF.

METALLURGICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $2.50 to $7.50.

Met. 2. Principles of Metallurgy.—*Prerequisite:* Chem. 4; Physics 1a-3a. (2). 11 TT; 207 T.B. Assistant Professor MITCHELL.

Met. 5. Ferrous Metallurgy.—*Prerequisite:* Met. 2 and 4. (3). 8 MWF; 207 T.B. Assistant Professor MITCHELL.

Met. 6. Metallurgical Calculations.—*Prerequisite:* Registration in Met. 5. (2). 10 TT; 207 T.B. Assistant Professor MITCHELL.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses.

Mil. Bands 2. Freshman Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Mil. Bands 4. Sophomore Band.—(1). Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Mil. Bands 6. Junior Band.—Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY.

Mil. Bands 8. Senior Band.—Twice a week, by assignment. Director HARDING, Assistant Director HINDSLEY.

MILITARY SCIENCE

All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for advanced courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

Uniform is required for all practical instruction and is optional for class room instruction.

PHYSICAL EDUCATION FOR MEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1.00 for the semester.

Freshmen and Sophomores: Men entering the University as freshmen are required to obtain credit for four semesters of work in physical education; those entering as sophomores, two semesters. They may obtain this credit by courses listed below or by proficiency examinations which are offered at times specified by the department.

Major: For Curriculum in Physical Education for Men, see "Directions for Registration."

For information, late registration, changing sections, call at Room 201, Men's Old Gymnasium.

Courses for Undergraduates

P.E. 20-21-22-23. Individual Corrective Activities.—These courses are open only to students who fail to pass the health examinations. Students enrolling for the first time should register for P.E. 20. Students enrolling for the second, third, or fourth time should register for P.E. 21, 22, and 23, respectively.

PHYSICAL EDUCATION FOR WOMEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1 for the semester.

Freshmen and Sophomores: Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 72) or rhythms (P.E. 51); one semester of swimming (P.E. 75, 76, 54); one semester of individual sports (P.E. 60) or seasonal sports (P.E. 73) or team games (P.E. 58); and one semester of an elective.

Proficiency examinations in any courses offered to freshmen and sophomores may be taken at times specified by the department. These will be given each semester.

Major: For Curriculum in Physical Education for Women, see "Directions for Registration."

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00.

Major: 20 hours from courses offered in the department. At least five hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than eight hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6 or 7), education or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 44, 60, 61, 62.
Senior year: Physics 23, 30, 71, 72, 78, 80.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Spanish 10b. Survey of Spanish Literature.—

3	C	10	MWF	204a L.H.	Burner

Spanish 11b. Cervantes: Don Quijote.—

2	M	11	TT	205 L.H.	Van Horne

Spanish 17b. Modern Spanish Drama.—

2	L	9	TT	216 L.H.	Hamilton

Courses for Graduates

Spanish 131. Spanish Literature in the Seventeenth Century.—(1 unit). Arrange; 216 L.H. Associate Professor HAMILTON.

Spanish 135. Modern Spanish Novel.—(1 unit). Arrange; 216 L.H. Associate Professor HAMILTON.

Spanish 138. Spanish-American Literature.—(1 unit). 1 MW; 425a Lib. Professor VAN HORNE.

Spanish 195. Seminar.—Research work in special topics. (1 to 2 units).* Members of the department.

SOCIOLOGY

Major: 20 hours from any courses in the department.

Minors: 20 hours from one or two of the following subjects: history, philosophy, psychology, economics, political science. At least eight hours must be offered in either minor subject, if two are chosen.

Courses for Undergraduates

Sociol. 1. Principles of Sociology.—*Prerequisite:* Junior standing, or sophomore standing with a course in either economics or psychology or history.

Credit	Section	Hours	Days	Room	Instructor
3	A	8	MWF	304 L.H.	HILLER
	B	9	MWF	202 L.H.	ALBIG

	G	2	MWF	308 L.H.	HOUGHTON
	H	3	MWF	326 L.H.	HOUGHTON

Sociol. 2. Social Factors in Personality.—*Prerequisite:* Sociol. 1.

3	A	8	MWF	202 L.H.	AHRENS
	B	9	MWF	306 L.H.	

Sociol. 90b. Honors Course.—For majors in sociology and other seniors. Consent of instructor required.

2	Arrange	Members of the department

Courses for Advanced Undergraduates and Graduates

Sociol. 3. Social Evolution.—*Prerequisite:* Sociol. 1 and junior standing.

3	A	11	MWF	326 L.H.	AHRENS

Sociol. 4. Social Control.—*Prerequisite:* Sociol. 1 and junior standing.

2	A	1	MW	306 L.H.	ALBIG
	B	3	MW	334 L.H.	

Sociol. 7. Rural Sociology.—*Prerequisite:* Sociol. 1 and junior standing.

3	A	9	MWF	321 L.H.	TYLOR

Sociol. 8. Charities.—*Prerequisite:* Sociol. 1 and junior standing. Suggested background courses: Sociol. 2 and courses in economics and history.

3	A	11	MWF	204 L.H.	TIMMONS
	B	2	MWF	334 L.H.	

Sociol. 9. Criminology.—*Prerequisite:* Sociol. 2 or senior standing. (Open to pre-legal juniors by consent of instructor.)

3	A	1	MWF	334 L.H.	TAFT
	B	2	MWF	326 L.H.	

Sociol. 14. Group Opinion.—*Prerequisite:* Sociol. 1 and senior standing.

3	A	10	MWF	305 L.H.	ALBIG

Sociol. 24. Penology.—*Prerequisite:* Sociol. 9.

3	A	9	MWF	105 L.H.	TAFT

Sociol. 27. Community Welfare Organization.—*Prerequisite:* Fourteen credit hours in the Department of Sociology.

3	A	8	MWF	326 L.H.	TIMMONS

Sociol. 28. Immigration and Assimilation.—*Prerequisite:* Five hours of sociology.

3	A	10	MWF	326 L.H.	HILLER

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

Sociol. 107. Rural Communities.—(1 unit). Twice a week. Arrange; 201 L.H. Assistant Professor TYLOR.

Sociol. 109. Research in Criminology.—(1 unit). Twice a week. Arrange; 201 L.H. Professor TAFT.

Sociol. 128. Fusion of Culture Resulting from Immigration.—(1 unit). Twice a week. Arrange; 201 L.H. Professor HILLER.

Sociol. 150. Seminar.—Preparation of theses. (½ to 2 units).* Arrange. Members of the department.

THEORETICAL AND APPLIED MECHANICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $2.50.

Courses for Undergraduates

T.A.M. 1. Analytical Mechanics (Statics).—*Prerequisite:* Math. 7; registration in Math. 9.

Courses for Advanced Undergraduates and Graduates

T.A.M. 42. Properties of Engineering Materials: Specifications and Inspection.—*Prerequisite:* T.A.M. 3 and 63. (3). Arrange. Professor SEELY.

T.A.M. 43. Laboratory Work in Hydraulics.—*Prerequisite:* T.A.M. 4 and 64. (3). Twice a week. Arrange. Professor ENGER and Mr. LANSFORD.

T.A.M. 44. Laboratory Work in Testing Materials.—*Prerequisite:* T.A.M. 3 and 63. (3 semester hours or ½ to 1 unit).* Arrange. Professor MOORE and Professor PUTNAM.

Courses for Graduates

T.A.M. 101. The Development of Basic Ideas in Mechanics.—(1 unit). Twice a week. Arrange. Professor MOORE.

T.A.M. 103. Hydraulics.—(1 unit). Twice a week. Arrange. Professor ENGER.

T.A.M. 107. Laboratory Investigations in Strength of Materials.—(1 to 2 units).* Twice a week. Arrange. Professor MOORE.

T.A.M. 108. Laboratory Investigations in Hydraulics.—(1 to 2 units).* Twice a week. Arrange. Professor ENGER.

T.A.M. 109. Laboratory Investigations in Plain and Reinforced Concrete.—(1 to 2 units).* Twice a week. Arrange. Professor RICHART.

T.A.M. 111. Analytical Study of Experimental Work on Reinforced Concrete: Columns and Slabs.—(1 unit). Twice a week. Arrange. Professor RICHART.

T.A.M. 113. Graphical and Approximate Methods of Structural Analysis.—(½ unit). Twice a week. Arrange. Professor WESTERGAARD.

T.A.M. 115. Theory of Elasticity with Application to Engineering Problems.—(Continuation of T.A.M. 114). (1 unit). 9 TT. Professor WESTERGAARD.

T.A.M. 117. The Properties of Engineering Materials.—(1 unit). Three times a week. Arrange. Professor SEELY.

ZOOLOGY

Note: Certain courses in this department require laboratory fees varying from $1 to $4.50.

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and including Zoology 2, 3, 4, 5 (or 7), and 9. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from one or two of the following subjects: animal husbandry, bacteriology, botany, chemistry, entomology, geology, physics, physiology, psychology. At least eight hours must be offered in each subject, if two are chosen.

Note: Credit for seniors who take Zoology 1 or 2 will be reduced one hour.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

Students entering on graduate study in the Department of Zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and undergraduates must be preceded by at least one full year's undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 103. Cytology: The Animal Cell.—(1 unit). 2 MW; 432 N.H. Professor SHUMWAY.

Zool. 109. Physiological Ecology.—(½ to 1 unit).* Arrange. Professor SHELFORD.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 117. Invertebrate Taxonomy.—(½ to 1 unit).* Arrange; 420 N.H. Professor VAN CLEAVE.

Zool. 118. Advanced Protozoology.—(1 unit). 1-4 TT; 418 N.H. Assistant Professor KUDO.

Individual Research Courses

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor THOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Assistant Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange. Professor SHUMWAY.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Assistant Professor KUDO.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 10, in Art 35a-35b, Commercial Art, the prerequisites given are Art 28 and Architecture 72; these two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

(e) **Farm Management.**—Professor Case.
(g) **Land Economics.**—Professor Stewart.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 10. Economic Relationships of Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing. (3). 11 MWF; 316 New Agr. Professor Stewart.

Agr. Econ. 22. Types and Systems of Farming.—*Prerequisite:* Agr. Econ. 20. Lectures and quiz. (3). 8 MWF; 316 New Agr. Associate Professor Wilcox.

Agr. Econ. 24. Farm Operation.—*Prerequisite:* Agr. Econ. 20; junior standing. Local field trips will be arranged; estimated cost, $3. (2). 11 TT; 316 New Agr. Mr. Wills.

Agr. Econ. 26. Farm Administration.—*Prerequisite:* Agr. Econ. 20; senior standing. (2). 9 TT; 316 New Agr. Professor Case, Mr. Ackerman.

Agr. Econ. 36. Marketing Horticultural Products.—*Prerequisite:* Econ. 1 or 2; Agr. Econ. 30; senior standing. Inspection trip required; estimated cost, $12. (3). 3 MWF; 203 V.G. Professor Lloyd.

Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of head of department. (5). Arrange.

(a) **Agricultural Marketing.**—Members of the department.
(b) **Agricultural Prices and Statistics.**—Members of the department.
(c) **Farm Management.**—Professor Case.
(d) **Land Economics.**—Professor Stewart.

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students majoring in Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Arrange. Professor Stewart.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Arrange. Assistant Professor Bartlett.

Agr. Econ. 112. Agricultural Economics Research.—(1 to 2 units).* Credit is conditional on completion of acceptable report of investigation. Arrange. Members of the department.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Arrange. Professor Case.

Agr. Econ. 135. Marketing Fruits and Vegetables. –(1 to 2 units).* Arrange. Professor Lloyd.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

AGRICULTURAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $8.

(c) **Horses.**—Professor Edmonds.
(e) **Sheep.**—Associate Professor Kammlade.
(g) **Swine.**—Professor Carroll.
(j) **Poultry.**—Professor Card.
(l) **Animal Nutrition.**—Professor Mitchell.
(n) **Animal Genetics.**—Professor Roberts.
(q) **Animal Pathology.**—Professor Graham.
(s) **Meats.**—Associate Professor Bull.

An. Husb. 12. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Members of the department.

An. Husb. 21. Principles of Feeding.—*Prerequisite:* Chem. 1 or 2.

Credit	Section	Hours	Days	Room	Instructor
3	Lect.	2	W	553 Agr.	Bull
	A Quiz	2	MF	553 Agr.	
	B Quiz	11	TT	553 Agr.	

An. Husb. 34. Anatomy and Physiology, and Non-Contagious and Parasitic Diseases of Farm Animals.—*Prerequisite:* An. Husb. 21. (3). 10 MWF; An. Path. L. Professor Graham.

An. Husb. 36. Selection and Use of Meat.—(2). 9 TT; 403 Agr. Associate Professor Bull.

An. Husb. 38. Poultry Breeds and Judging.—*Prerequisite:* An. Husb. 37. (3). 3-4:30 MTWTF; Poultry Plant. (This course is concluded at the beginning of the Christmas recess.) Dr. Sloan.

From the students taking or having had this course will be chosen the team to represent the University in the Annual Mid-West Intercollegiate Poultry Judging Contest. The class will visit a near-by poultry show. The cost of the trip will be from $10 to $15.

Courses for Advanced Undergraduates and Graduates

An. Husb. 7. Principles of Animal Nutrition.—*Prerequisite:* Senior standing, including An. Husb. 21; Chem. 32. (5). Arrange. 553 Agr. Mr. Hamilton.

An. Husb. 22. Advanced Stock Judging.—*Prerequisite:* An. Husb. 3. (3). 3 MTWTF; S.P. Heads of divisions.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest.

An. Husb. 24. Meat Judging and Special Problems.—*Prerequisite:* An. Husb. 10 or 36. (2 to 5).* Arrange. Associate Professor Bull.

From the students in this class will be chosen the team to represent the University in the Annual Intercollegiate Student Judging Contest. Students registering for meat judging only should register for 2 hours credit. This part of the course will terminate at Thanksgiving.

An. Husb. 25. Beef Production.—*Prerequisite:* An. Husb. 6. (3). 2 MWF; 316 New Agr. Professor Rusk, Associate Professor Snapp.

An. Husb. 26. Pork Production.—*Prerequisite:* An. Husb. 21. (3). 9 MWF; 316 New Agr. Professor Carroll.

An. Husb. 40. Economics of Poultry Keeping.—*Prerequisite:* Senior standing, including An. Husb. 37. (3). 8 MWF; 313 New Agr. Professor Card.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Courses for Graduates

An. Husb. 112a-f. Research.—Arrange. One to three times a week. (½ to 2 units).*

(a) **Economic Factors Involved in Meat Production.**—Professor RUSK.
(b) **Systems of Livestock Farming.**—Professor CASE.
(c) **Animal Pathology.**—Professor GRAHAM.
(d) **Animal Nutrition.**—Professor MITCHELL.
(e) **Animal Genetics.**—Professor ROBERTS.
(f) **Poultry Husbandry.**—Professor CARD.

An. Husb. 117. Animal Genetics.—(1 unit). One to three times a week. Arrange. Professor ROBERTS.

An. Husb. 118. Animal Nutrition Seminar.—(½ unit). Two hours a week. Arrange. Professor MITCHELL.

An. Husb. 119. Laboratory Methods in Animal Nutrition.—(½ to 1 unit).* Two to five times a week. Arrange. (Laboratory fee, $5.) Professor MITCHELL.

An. Husb. 120. Laboratory Methods in the Diagnosis of Animal Diseases.—(½ to 1 unit).* Two to five times a week. Arrange. (Laboratory fee, $2.) Professor GRAHAM.

An. Husb. 121. Laboratory Methods in Animal Genetics.—(½ to 1 unit).* Two to five times a week. Arrange. (Laboratory fee, $3.) Professor ROBERTS.

ARCHITECTURE

Courses for Undergraduates

Arch. 11. History of Architecture.—(Not open to students expecting a degree in Architecture). (3). 3 MWF; 117 L.H.

ASTRONOMY

Course for Undergraduates

Astron. 1. Descriptive Astronomy.—*Prerequisite:* Sophomore standing. (3). 11 MWF, 229 N.H.; one hour Wednesday evening, Observatory. Professor BAKER.

Course for Advanced Undergraduates and Graduates

Astron. 14. Observational Astronomy.—*Prerequisite:* Consent of instructor. (3). Arrange; Observatory. Professor BAKER.

Courses for Graduates

Astron. 101. Seminar.—(1 unit). 11 TTS; Observatory. Professor BAKER.

Astron. 103. Celestial Mechanics.—(1 unit). 1 MWF; Observatory. Professor BAKER.

BACTERIOLOGY

Note: Certain courses in this department require laboratory fees varying from $4 to $5.

Major: 20 hours chosen from the courses offered by this department. Dairy Husbandry 10 (Advanced Dairy Bacteriology) may be offered in partial satisfaction of this requirement. At least five hours must be offered from the advanced groups.

Minors: 20 hours chosen from one or two of the following subjects: agronomy, botany, chemistry, entomology, physiology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Courses for Undergraduates

Bact. 5a. Introductory Bacteriology.—*Prerequisite:* Sophomore standing; or consent of the instructor.

Course for Advanced Undergraduates

Bact. 7a. Research and Special Problems.—*Prerequisite:* Junior standing; 10 hours in bacteriology; consent of instructor. (3 to 5).* Arrange. Conference, 2-4 W. Professor TANNER, Assistant Professor WALLACE.

Courses for Advanced Undergraduates and Graduates

Bact. 20. General Bacteriology.—*Prerequisite:* Two years of college chemistry; senior standing; consent of instructor. Students with credit in Bact. 5a and 5b will not be allowed credit for Bact. 20. (5). Lect., 11 MWF; 303 Chem. Lab., 1-3 MW; 360 Chem. Assistant Professor WALLACE.

Bact. 26. Pathogenic Bacteriology.—*Prerequisite:* Bact. 5a and 5b (or 20); junior standing. (5). Lect., 8 TT; 103 Chem. Lab., 8-10 MWF; 367 Chem. Assistant Professor WALLACE and Miss PARK.

Courses for Graduates

Bact. 103. Physiology of Bacteria.—(1 unit). Lect., 9 MW; 366 Chem. Professor TANNER.

Bact. 107. Research in Bacteriology.—(1 to 4 units).* Conference, arrange. Lab., arrange; 365 Chem. Professor TANNER.

Bact. 118a. Current Literature.—Required of all graduate students majoring in bacteriology. *Prerequisite:* 10 hours of bacteriology and consent of the instructor. (¼ unit). 9 Tu; 366 Chem. Professor TANNER.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

BOTANY

Note: Certain courses in this department require laboratory fees varying from $1 to $3.

Major: 20 hours of botany exclusive of Bot. 1 and 5, and inclusive of Bot. 2 or 12, 3, and at least five hours in courses listed for advanced undergraduates and graduates.

Minors: 20 hours in one or two departments chosen in consultation with the head of the department from the following list: agronomy, bacteriology, chemistry, entomology, geology, horticulture, mathematics, physics, physiology, and zoology. At least eight hours must be offered in each department, if two are chosen.

Courses for Undergraduates

Bot. 1a. Introductory Botany (Cultural Course).—The relation of the plant world to the physical and animal worlds. The progressive development of the plant world and its evolutional significance; its part in the formation of soils, the production of food, and the maintenance of life. Lectures, demonstrational quiz. Designed to accompany Bot. 1b, but may be elected without it.

Courses for Advanced Undergraduates

Bot. 90a. Thesis Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Arrange.

Bot. 91a. Honors Course.—*Prerequisite:* 15 hours of botany and senior standing. (2). Arrange.

Courses for Advanced Undergraduates and Graduates

Bot. 33. Physiology.—*Prerequisite:* Bot. 3 and junior standing. (3 or 5).* 1-3 MWF; 155 N.H. Professor HOTTES and assistant.

Bot. 45. Histology, Anatomy, and Technic.—*Prerequisite:* 1 year of botany, inclusive of Bot. 2a or 2b, and junior standing. (3 or 5).* 8-10 MWF; 206 Entom. Professor BUCHHOLZ.

Bot. 46. Heredity and Evolution.—*Prerequisite:* One year of botany and junior standing. (3 or 5).* Lect., 10 S; Lab., 10-12 TT; 201 Entom. Professor BUCHHOLZ.

Bot. 56. Plant Geography.—*Prerequisite:* One year of botany and junior standing. (3 or 5).* 10-12 MWF; 216 N.H. Associate Professor VESTAL.

Bot. 70. Taxonomy of Pathogenic Fungi.—*Prerequisite:* Bot. 7 and junior standing. (3 or 5).* Lect., 11 Tu; Lab., 10-12 ThS; 304 N.H. Professor ————.

Bot. 81. Plant Ecology.—*Prerequisite:* One year of botany and junior standing. (3 or 5).* Lect., 8 TT; 229 N.H.; field work on four or five Saturdays. Associate Professor VESTAL.

Courses for Graduates

Bot. 110. Botanical Discussion.—(No credit). Required of all graduate students in botany and members of the instructional staff. 4 Tu; 258 N.H.

Bot. 112. Discussions in Plant Morphology.—(¼ unit). 4 F; 205 Entom. Professor BUCHHOLZ.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Bot. 113. Discussions in Plant Physiology.—(¼ unit). 4 Th; 155 N.H. Professor HOTTES.

Bot. 117. Discussions in Plant Pathology and Mycology.—(¼ unit). 4 W; 304 N.H. Professor ————.

Bot. 118. Discussions in Plant Ecology.—(¼ unit). 4 M; 204 N.H. Associate Professor VESTAL.

Research Courses

Bot. 120. Plant Morphology.—(½ to 2 units).* (Botany 112 to be taken concurrently.) One hour on either W or F, from 1 to 3, the rest arrange; 201 Entom. Professor BUCHHOLZ.

Bot. 130. Plant Physiology.—(½ to 2 units).* (Botany 113 to be taken concurrently.) One hour on M, W, or F, from 1 to 3, the rest arrange; Botany Annex. Professor HOTTES.

Bot. 170. Plant Pathology or Mycology.—(½ to 2 units).* (Botany 117 to be taken concurrently.) One hour on either M or W, from 2 to 4, the rest arrange; 304 N.H. Professor ————.

Bot. 180. Plant Ecology or Geography.—(½ to 2 units).* (Botany 118 to be taken concurrently.) Conf., 1 M or 10 Tu, the rest arrange; 204 N.H. Associate Professor VESTAL.

BUSINESS ORGANIZATION AND OPERATION

Cer.E. 7. Structural Clay Products.—*Prerequisite:* Cer. 1, 4. (3). Lect. and quiz, 11 MWF; 218 Cer.

Cer.E. 16. Enamels.—*Prerequisite:* Cer. 14.

3	Lect.	8	Th	214 Cer.
	Lab. A	9–12	TT	102, 113-114 Cer.
	Lab. B	1–4	TT	102, 113-114 Cer.

Cer.E. 18. Ceramic Microscopy.—*Prerequisite:* Chem. 40; Geol. 47 and 49 or equivalent. (3). 1-4 TT, 8-11 S; 312 Cer.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Cer.E. 21. Ceramic Pyrometry.—*Prerequisite:* General physics; inorganic chemistry.

Credit	Section	Hours	Days	Room	Instructor
1	A	4	Tu	218 Cer.	
	B	4	W	218 Cer.	

Cer.E. 22. Kilns and the Burning of Clay Products.—*Prerequisite:* Cer. 5 and 11. (3). 9 MWF; 218 Cer.

Cer.E. 23. Dryer and Kiln Design.—*Prerequisite:* Cer. 11; registration in Cer. 22; G.E.D. 1 or 4. (2). 2-5 TT; 212 Cer.

Cer.E. 97. Thesis.—(3 to 5).* Arrange.

Cer.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. (No credit).

Courses for Graduates

Cer.E. 101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

Cer.E. 103. Chemistry of the Silicates.—Laboratory to supplement Ceramic Engineering 101, which must precede or accompany it. (1 to 2 units).*

Cer.E. 106. Research.—Professors PARMELEE, HURSH, ANDREWS.

CHEMISTRY

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.00.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in the chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, ceramic engineering, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7 a student is permitted to register in Chem. 2; or upon passing a proficiency examination in Chem. 2, he may register in Chem. 4, 5, or 6.

Credit	Section	Hours	Days	Room	Instructor

	Lab.	1–3	TT	1 Chem.A.	

[1]Seniors will receive only 3 hours credit.

Chem. 93a. General Chemistry.—Lectures, demonstrations, and recitations. An elementary résumé of the various fields of chemistry. (*Note:* This course is accepted in partial fulfilment of the general science requirement. It is not accepted as a prerequisite to other chemistry courses. It will be given only if registration is 25 or above.) *Prerequisite:* Junior standing or consent of the instructor. No credit is allowed students who have previous credit in college chemistry. (3). 2 MWF; 100 Chem. Professor BUSWELL and assistant.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 1. Inorganic Chemistry.—*Prerequisite:* One unit of entrance credit in physics, or 2½ units of entrance credit in mathematics, or registration in Math. 2 or 3. Students may register in either lecture section but are required to take the quiz and laboratory in some one section.

	Conf.	8	Tu	217 Chem.	
	Lab.	9–11	Tu	250 Chem.	
		8–11	Th	250 Chem.	

Chem. 34a. Organic Chemistry.—(For students majoring in chemistry or for those registered in the curriculum of chemistry or of chemical engineering.) *Prerequisite:* Chem. 6, 10, and 24.

5	Lect.	9	MWF	217 Chem.	MARVEL and assistants
	Conf.	1	M	217 Chem.	
	Lab.	2–4	M	250 Chem.	
		1–4	W	250 Chem.	

Chem. 90a. Thesis.—(*Note:* Senior research in chemistry and chemical engineering optional instead of required. Each student who desires research must receive special permission both from the instructor under whom he is to work and from the head of the division in which the research is to be taken. Such written permission should be presented, at the time of registration, to the adviser for the chemists or chemical engineers.) *Prerequisite:* Chem. 24, 34a, 40, 41, 42, and 43, or the consent of the head of the department. (3 to 5).* Professor ADAMS (in charge)

Courses for Advanced Undergraduates and Graduates

Chem. 15a. Inorganic Chemistry.—*Prerequisite:* Senior standing, and 10 hours credit in chemistry in addition to the elementary courses.

2		9	MW	112 Chem.A.	AUDRIETH

Chem. 16a. Inorganic Chemistry.—(Laboratory.) *Prerequisite:* Registration or credit in Chem. 15a.

2	Conf.	9	F	210 Chem.A.	BAILAR
	Lab.	Arrange		350 Chem.	

Chem. 27. Special Methods and Instruments in Quantitative Analysis.—*Prerequisite:* Chem. 24, 34a, 40 and 41, or registration in 40 and 41.

3	Lect.	11	Tu	161 Chem.	SMITH
	A Lab.	1–4	TT	305 Chem.	
	B Lab.	1–4	F	305 Chem.	
		8–11	S	305 Chem.	

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 38a. Qualitative Organic Analysis.—*Prerequisite:* Chem. 36b and 37b.

Credit	Section	Hours	Days	Room	Instructor
3	Conf.	1	TT	217 Chem.	SHRINER
	Lab.	2–4	TT	250 Chem.	

Chem. 40. Elementary Physical Chemistry.—*Prerequisite:* Chem. 24; Physics 1a-1b or 7a-7b; Math. 7 or 8. (3). 10 MWF; 112 Chem.A. Professor RODEBUSH.

Chem. 41. Elementary Physical Chemistry.—(Laboratory.) To accompany Chem. 40.

1	A Lab.	1–4	Tu	124 Chem.	PHIPPS
	B Lab.	1–4	Th	124 Chem.	
	C Lab.	1–4	F	124 Chem.	

Chem. 42. Elementary Physical Chemistry.—*Prerequisite:* Chem. 40. (3). 9 TTS; 161 Chem. Associate Professor PHIPPS.

Chem. 43. Elementary Physical Chemistry.—(Laboratory.) *Prerequisite:* Chem. 40, 41, and registration in Chem. 42.

1	A Lab.	1–4	Th	124 Chem.	PHIPPS
	B Lab.	1–4	F	124 Chem.	

Chem. 44a. Advanced Physical Chemistry.—*Prerequisite:* Chem. 40, 41. (2). 10 TT; 161 Chem. Associate Professor PHIPPS.

Chem. 50a. Physiological Chemistry.—*Prerequisite:* Chem. 24 or 22, and 33 or 34a.

5	Lect.	9	TT	217 Chem.	ROSE, CARTER, and assistants
	A Lab.	1–4	TT	450 Chem.	
		8–11	S	450 Chem.	
	B Lab.	1–4	MWF	450 Chem.	

Chem. 60a. Chemical Technology.—*Prerequisite:* Senior standing. (Estimated cost of optional inspection trip is $30 to $35 per student.)

4	Lect.	11	MWF	161 Chem.
	A Lab.	1–5	M	50 Chem.
	B Lab.	1–5	Tu	50 Chem.
	C Lab.	1–5	Th	50 Chem.
	D Lab.	1–5	F	50 Chem.

Chem. 61a. Principles of Chemical Engineering.—*Prerequisite:* Chem. 42 or senior standing

4	Lect.	9	MWF	161 Chem.	KRASE
	A Lab.	1–5	M	50 Chem.	HOWARD
	B Lab.	1–5	Tu	50 Chem.	HOWARD
	C Lab.	1–5	W	50 Chem.	HOWARD
	D Lab.	1–5	Th	50 Chem.	HOWARD

Chem. 62a. Principles of Research and Development in Chemical Engineering.—*Prerequisite:* Senior standing in chemistry or chemical engineering. (2). Lect., 10 MW; 161 Chem. Professor KEYES.

Chem. 73a. Metallurgy.—*Prerequisite:* Senior standing in engineering courses only. (3). Lect., 8 MWF; 161 Chem. Mr. Howard.

Chem. 86a. Water Treatment.—*Prerequisite:* Chem. 24. Lectures, demonstrations, field trips. Methods for determining water quality. Special water requirements of industries. Chemistry of water conditioning for municipal and industrial use. By-product recovery from industrial and other wastes. (3). 10 MWF; 162 Chem. Professor BUSWELL and assistant.

Chem. 92a. Chemical Literature and Reference Work.—(Required of juniors in chemistry; expected also of juniors taking major work in chemistry.) *Prerequisite:* 18 hours of chemistry, one year of French or German, junior standing.

1	A	10	Th	201 Chem.	BARTOW
	B	8	F	201 Chem.	
Graduates only.....	K	4	W	201 Chem.	

Chem. 95a. History of Science with Particular Reference to Chemistry.—*Prerequisite:* Junior standing and 20 hours of laboratory science. (2). 8 TT; 112 Chem.A. Dr. BARTOW.

Courses for Graduates

Chem. 101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼ to 1 unit).* Professor HOPKINS.

Chem. 105a. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 11 S; 162 Chem. Special topic: The mechanism of chemical reactions (Dr. COPLEY). 9 MW; 105 Chem.A. Professor HOPKINS.

Chem. 123a. Qualitative Analysis.—(½ unit). Lectures. 11 MF; 116 Chem. Associate Professor REEDY.

Chem. 123c. Qualitative Analysis.—(Laboratory work, optional, to accompany Chem. 123a. For 1935-36, microanalysis.) (¼ to ¾ unit).* Arrange. Associate Professor REEDY.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 125a. Quantitative Analysis.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 4 Th; 162 Chem. Professor CLARK.

Chem. 126a. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—(Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc.). (½ unit). Lectures. 9 TT; 303 Chem. Assistant Professor ENGLIS.

Chem. 126c. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—(Laboratory work, optional, to accompany Chem. 126a.) (¼ to ¾ unit).* Arrange; 305a Chem. Assistant Professor ENGLIS.

Chem. 127a. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures. 10 TT; 217 Chem. Professor CLARK.

Chem. 127c. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127a.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 132a. Organic Chemistry.—(First course.) (¾ unit). 11 TT; 217 Chem. Professor MARVEL.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Professor MARVEL.

Chem. 135a. Organic Chemistry.—(Seminar). (¼ unit). Once a week. 11 W; 217 Chem. Professor ADAMS.

Chem. 145a. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 152a. Physiological Chemistry.—Chiefly laboratory. (½ to 1 unit).* Arrange; 467b Chem. Professor ROSE.

Chem. 155a. Physiological Chemistry.—(Seminar required of all students majoring in physiological chemistry). (¾ unit). Two hours a week. 9-11 F; 456 Chem. Professor ROSE.

Chem. 160a. Advanced Chemical Technology and Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 1 MW; 162 Chem. Professor KEYES.

Chem. 161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186a. The Chemistry of Water Treatment.—(½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

Chem. 190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH; Associate Professor PHIPPS; Dr. COPLEY.
Inorganic Chemistry.—Professor HOPKINS; Associate Professor REEDY; Assistant Professors AUDRIETH, BAILAR, NICHOLSON.
Analytical Chemistry.—Professor CLARK; Associate Professors REEDY, SMITH; Assistant Professor ENGLIS.
Food Chemistry.—Assistant Professor ENGLIS.
Applied X-rays.—Professor CLARK.
Organic Chemistry.—Professors ADAMS, MARVEL, SHRINER; Assistant Professor BAILAR.
Zymochemistry.—Professor BUSWELL.
Phytochemistry.—Assistant Professor ENGLIS.
Physiological Chemistry.—Professor ROSE.
Chemical Engineering.—Professor KEYES; Associate Professor KRASE; Assistant Professor SWANN; Mr. HOWARD.
Ceramic Chemistry.—Professor PARMELEE.

CIVIL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1 to $2.

Courses for Undergraduates

C.E. 1. Plane Surveying.—*Prerequisite:* Math. 4; G.E.D. 1 or 4.

ECONOMICS

Including courses formerly in Public Utilities and Transportation

(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

The courses in economics may be grouped in several rather distinct fields in which students may find it profitable to concentrate in their junior and senior years. The following fields are suggested: economic theory, history, and statistics; public and private finance, including insurance; labor; foreign trade; public utilities and transportation.

Courses for Undergraduates

Courses for Advanced Undergraduates and Graduates

Ed. 11. Ancient and Medieval Education.—*Prerequisite:* Senior standing or Ed. 2. (2). 10 TT; 303 Adm.(E). Professor Seybolt.

Ed. 15. Mental Hygiene in the School.—*Prerequisite:* Ed. 25 and senior standing. (3). 9 MWF; 204 Adm.(E). Professor Griffith.

Ed. 18. Educational Measurements.—*Prerequisite:* Ed. 25. (3). 9 MWF; 308 Adm.(E). Associate Professor Odell.

Ed. 21. Supervision of Elementary Education.—*Prerequisite:* Junior standing and Ed. 25. (3). 2 MWF; 303 Adm.(E). Assistant Professor Browne.

Ed. 45. Genetic Psychology for Teachers.—*Prerequisite:* Ed. 25 and senior standing. (3). 11 MWF; 204 Adm.(E). Professor Griffith.

Ed. 46. Recent Developments in the Teaching of the Elementary School Subjects.—*Prerequisite:* Ed. 25. (2). 10-12 S; 307 Adm.(E). Assistant Professor Dolch.

Ed. 52. Part-Time and Evening Schools.—(Same as Ind. Ed. 52). *Prerequisite:* Junior standing. (3). 9 MWF; 304 Adm.(E). Professor Mays.

Ed. 53. Problems of Industrial Education.—(Same as Ind.Ed. 53). *Prerequisite:* Junior standing or consent of instructor. (3). 10 MWF; 304 Adm.(E). Professor Mays.

Courses for Graduates

In addition to complying with the general rules of the Graduate School, candidates for the master's degree in education must meet the following requirements: (1) Education 125 is a required course for all students; (2) for students who have not taken a course in the history of education, Education 11 or Education 30 is required; (3) Education 6 and 25, or their equivalents, are prerequisites for all graduate courses.

No student is recommended to the Dean of the Graduate School for formal admission to candidacy for the master's degree until at least four units of the eight ordinarily required for the degree have been completed satisfactorily. In the case of a student who has been allowed to waive the thesis (see Graduate School Bulletin), two papers will be required. The first shall be written during the first half of the student's residence and shall be an important factor in determining his further status in the department. The second shall be written during the second half of the student's period of residence.

Ed. 102. Research in the History of Education.—(1 unit). Arrange; 311 Adm.(E). Professor SEYBOLT.

Ed. 104. Educational Administration.—(1 unit). 10-12 S; 303 Adm.(E). Associate Professor WEBER.

Ed. 106. High School Administration.—(1 unit). 4-6 Tu; 308 Adm.(E). Professor CLEMENT.

Ed. 109. Seminar in Curriculum Revision.—(½ to 1 unit).* *Prerequisite:* Ed. 119a or 119b or consent of instructor. Arrange; 302 Adm.(E). Assistant Professor EVERETT.

Ed. 119a. Problems of the Curriculum.—(1 unit). 4-6 M; 312 Adm.(E). Assistant Professor EVERETT.

Ed. 123. Educational Statistics.—(1 unit). 4-6 M; 304 Adm.(E). Associate Professor ODELL.

Ed. 124. Readings in Educational Research.—(1 unit). 4-6 Th; 206 Adm.(E). Professor MONROE.

ENGLISH

(Including Rhetoric, Speech, and Scandinavian Languages)

Major: 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and *including* at least ten hours in English literature, at least three hours in composition, and two courses from the advanced group in English literature.

Minors: 20 hours in (a) Latin or Greek or French or German or Spanish; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history; or (e) in history and philosophy. No language courses may be regarded as satisfying the minor requirement if they are excluded from the majors of the language departments (excepting elementary courses in Greek, Latin, French 2a, and Spanish 2a). At least eight hours must be offered in each subject.

Major in Speech

Major: 10 hours in speech, inclusive of Speech 7 and 8 and either 4 or 6; and 10 hours of English, exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature from the advanced group.

Minors: 20 hours, in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, law, or sociology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in English 10 and Rhetoric 1-2.

A. ENGLISH LANGUAGE AND LITERATURE

Courses for Undergraduates

Engl. 10a. An Introduction to Literature.—Forms of poetry, mainly narrative. *Prerequisite:* The minimum entrance requirement in English. (Credit is not given for Engl. 10a in addition to 20a and 20b.)

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.00.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, and 2 and 31 to sophomores, without prerequisites. Either 1, or both 2 and 9, are prerequisite to all other courses in the department. Recommended sequences of courses are 1, 8, 20, and 31, for those desiring strictly practical or economic work; 2, 9, and 21 for those interested in the cultural or biological values of insect study. Students majoring in entomology should include some work in classification, morphology, and control and should plan all of their work with the advice of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

Credit	Section	Hours	Days	Room	Instructor
3[1]	A	8–10	MWF	309 Entom.	HAYES, MILUM, and HEISS
[1]Seniors will receive only 2 hours credit.	B	10–12	MWF	309 Entom.	METCALF, MILUM, and FAY
	C	1–3	MWF	309 Entom.	METCALF, MILUM, and MCCLURE

Entom. 2. Insects: Their Ways and Their Relations to Man.—A non-technical, cultural course of illustrated lectures with exhibits. *Prerequisite:* Sophomore standing. (Not open to students who have taken Entom. 1.)

2	A	11	TT	202 Entom.	BALDUF
	B	2	TT	202 Entom.	

Entom. 9. Collection and Classification of Insects.—*Prerequisite:* Entom. 1 or 2 or concurrent registration in 1 or 2. (3). Discussion, 2 W; field and laboratory work, 1-3 MF; 310 Entom. Assistant Professor BALDUF.

Entom. 22. Methods and Technic for the Study of Insects.—*Prerequisite:* Entom. 1 and sophomore standing. (3). 8-11 TT; 312 Entom. Associate Professor HAYES.

Entom. 31. Essentials of Beekeeping.—*Prerequisite:* Sophomore standing. (1 or 2).* Lect., 4 Tu; for 2 hours credit include lab., 3-5 Th; 104 Exp. Zool. Lab. Assistant Professor MILUM.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 7, 8, 10, 20, 21, 22, or 31; and senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Members of the department.

Entom. 10a. Morphology of Immature Insects.—*Prerequisite:* Entom. 7 and senior standing. (3). 10-12 MWF; 312 Entom. Associate Professor HAYES.

Entom. 20. Insect Control.—*Prerequisite:* Entom. 1 or 9 and senior standing. (4). 2-5 TT; 109 Entom. Professor METCALF.

Course for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 100. Research.—(½ to 4 units).* Arrange:

(a) **Morphology and Embryology of Insects.**—Associate Professor HAYES.
(b) **Economic Entomology.**—Professor METCALF.
(c) **Systematic Entomology.**—Professor METCALF, Assistant Professor BALDUF.
(d) **Biology and Ecology of Insects.**—Professor METCALF.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9 and 19. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), economics, accountancy, philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

Math. 2. College Algebra.—*Prerequisite:* Entrance algebra, 1½ units; plane geometry, 1 unit.

Courses for Graduates

Note: Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor Macintire.

M.E. 109. Mechanical Engineering Design.—(a) Machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors Leutwiler, Ham.

M.E. 110. Advanced Heating, Ventilating, and Air Conditioning.—Applications of various systems, notable developments, and results of research. Individual problems. (1 unit). Twice a week. Arrange. Professor Severns.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating, ventilation, and air conditioning; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors Polson, Kratz, Ham, Macintire, Goff.

M.E. 117. Advanced Refrigerating Engineering.—Advanced theory and special cycles. Design of comfort cooling and other special installations. (1 unit). Twice a week. Arrange. Professor Macintire.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours (twice a week). Assignments are made according to proficiency. Service in the bands takes the place of the required military courses. Director Harding, Assistant Director Hindsley, Mr. Overgard.

Mil. Bands 1. Freshman Band.—(1).

Mil. Bands 3. Sophomore Band.—(1).

Mil. Bands 5. Junior Band.—

Mil. Bands 7. Senior Band.—

MILITARY SCIENCE

Note: All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R.O.T.C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

Uniform is required for all practical instruction and is optional for classroom instruction.

MINING AND METALLURGICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1.00 to $7.50.

A. MINING

Courses for Undergraduates

Mining 1. Elements of Mining.—(For students in Mining Engineering only.) *Prerequisite:* Physics 1b-3b. (3). 11 ThS, 10-12 Tu; 206 T.B. Mr. NICHOLSON.

Mining 2. Mining Principles.—(For students in courses other than mining.) *Prerequisite:* Math. 2; one year of college chemistry. (3). 9 MWF; 206 T.B. Assistant Professor MITCHELL.

Mining 6. Mechanical Engineering of Mines.—*Prerequisite:* Mining 4 and 10; M.E. 62; T.A.M. 2. (3). 11 MWF; 206 T.B. Professor CALLEN.

Mining 8. Mine Administration.—*Prerequisite:* Mining 4; Accy. 12. (3). 10 MWF; 207 T.B. Mr. NICHOLSON.

Mining 9. Preparation of Coal and Ores.—*Prerequisite:* Chemistry 22; Physics 1b-3b; Geol. 20 or equivalent. (3). 11 TT, 1-4 F; 207 T.B. and Mining Lab. Assistant Professor MITCHELL.

Mining 12. Mining Geology.—*Prerequisite:* Geol. 49; Mining 4. (3). 8 TT, 8-11 S; 206 T.B. and Mining Lab. Mr. NICHOLSON.

Mining 41. Mining Design.—*Prerequisite:* Senior standing in Mining Engineering. (3). 1-5 TT; 207 T.B. Assistant Professor MITCHELL.

Mining 61. Elementary Mine Surveying.—*Prerequisite:* G.E.D. 1 or 4; Math. 4. (3). 1 M, 1-4 WF; 207 T.B. Mr. NICHOLSON.

Mining 97. Thesis.—Hours arranged when thesis is permitted, in accordance with the regulations of the College of Engineering.

Mining 99. Inspection Trip.—*Prerequisite:* Senior standing. (No credit).

Courses for Graduates

Mining 101. Advanced Mining Practice.—(1 unit). Arrange. Professor CALLEN.

Mining 102. Advanced Preparation of Coal and Ores.—(1 unit). Arrange. Assistant Professor MITCHELL.

Mining 104.[1] Mining Reports.—(1 unit). Arrange. Professor CALLEN.

Mining 105.[1] Welfare Work and Education among Mine Employees.—(1 unit). Arrange. Professor CALLEN.

Mining 106.[1] Advanced Coal, Ore, and Metallurgical Plant Design.—(1 unit). Arrange. Assistant Professor MITCHELL.

Mining 107.[1] Advanced Non-Ferrous Metallurgical Projects.—(1 unit). Arrange. Assistant Professor MITCHELL.

---

[1]Of courses 104 and 105, only one will be given, according to election of students; the same applies to courses 106 and 107.

B. METALLURGY

Courses for Undergraduates

Met. 1. Elements of Metallurgy.—Process metallurgy (iron and steel); principles of physical metallurgy. *Prerequisite:* Chem. 4, Physics 1b-3b; junior standing in College of Engineering. (3). 8 MWF; 206 T.B. Assistant Professor WILDER.

Met. 3. Fire Assaying.—*Prerequisite:* Chem. 22; Geol. 20. (2). 1-5 M, 11 S; Mining Lab. and 207 T.B. Assistant Professor MITCHELL.

Met. 4. Physical Metallurgy.—*Prerequisite:* Met. 2. (3). 10 TTS; 207 T.B. Assistant Professor WILDER.

Met. 7. Metallography.—*Prerequisite:* Met. 4; Chem. 40. (2). 1-4 MW; Mining Lab. and 206 T.B. Assistant Professor WILDER.

Met. 8. Non-Ferrous Metallurgy.—*Prerequisite:* Met. 6. (3). 9 TTS; 206 T.B. Assistant Professor MITCHELL.

Met. 9. Physical-Chemical Treatment.—*Prerequisite:* Registration in Met. 7. (3). 9 M, 9-12 WF; Mining Lab. Assistant Professor WILDER.

Met. 13. Utilization of Fuels.—*Prerequisite:* Chem. 22; junior standing in College of Engineering. (3). 9 MW, 1-4 W; 207 T.B. and Mining Lab. Professor CALLEN.

Met. 41. Metallurgical Design.—*Prerequisite:* Senior standing in Metallurgical Engineering. (3). 1-5 TT; 207 T.B. Assistant Professor MITCHELL.

Met. 97. Thesis.—Hours arranged when thesis is permitted, in accordance with the regulations of the College of Engineering.

Met. 99. Inspection Trip.—*Prerequisite:* Senior standing. (No credit).

PHYSICAL EDUCATION FOR MEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1 for the semester.

Freshmen and Sophomores: Men entering the University as freshmen are required to obtain credit for four semesters of work in physical education; those entering as sophomores, two semesters. They may obtain this credit by courses listed below or by proficiency examinations which are offered at times specified by the department.

Major: For Curriculum in Physical Education for Men, see "Directions for Registration."

For information, late registration, changing sections, call at Room 201, Men's Old Gymnasium.

Courses for Undergraduates

P.E. 20a, 20b, 20c, 20d. Adapted Activities.—Open only to students who fail to pass the health examinations. Students enrolling for the first time should register for P.E. 20a. Students enrolling for the second, third, or fourth time should register for P.E. 20b, 20c, and 20d, respectively.

PHYSICAL EDUCATION FOR WOMEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1 for the semester.

Freshmen and Sophomores: Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 72) or rhythms (P.E. 51); one semester of swimming (P.E. 75, 76, 54); one semester of individual sports (P.E. 60) or seasonal sports (P.E. 73) or team games (P.E. 58); and one semester of an elective.

Proficiency examinations in any courses offered to freshmen and sophomores may be taken at times specified by the department. These will be given each semester.

Major: For Curriculum in Physical Education for Women, see "Directions for Registration."

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00.

Major: 20 hours from courses offered in the department. At least five hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than eight hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6, or 7), education, or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.

Sophomore year: Physics 1a-1b, 3a-3b, and calculus.

Junior year: Physics 14, 23, 44, 60, 61.

Senior year: Physics 30, 62, 71, 72, 78, 80.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and advanced undergraduates must be preceded by at least one full year of undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 102. Evolution of the Vertebrates.—(1 unit). Arrange. Associate Professor ADAMS.

Zool. 106. General Embryology.—Problems of development. (1 unit). 2 MW; 432 N.H. Professor SHUMWAY.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 131. Helminthology.—(½ to 1 unit).* 2-5 TT; 420 N.H. Professor VAN CLEAVE, Assistant Professor THOMAS.

Individual Research Courses

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor THOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Associate Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange. 432 N.H. Professor SHUMWAY.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Assistant Professor KUDO.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 12, in Art 35a-35b, Commercial Art, the prerequisites given are Art 28 and Architecture 72; these two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

Courses for Graduates

Cer.E. 101. Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit). Arrange.

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. Lectures; seminar; laboratory. (1 or 2 units).* Arrange.

Cer.E. 104. Technology of Glass.—Lectures and laboratory. (1 or 2 units).* Arrange.

Cer.E. 105. Methods of Ceramic Research.—Lectures. (1 unit). Arrange.

Cer.E. 106. Research.—Arrange.

CHEMISTRY

(Including Chemical Engineering)

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.00.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, 93a, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; or by securing special permission he may register in Chem. 4, 5, or 6.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42, 43, 27, 34a, 36b and 37b, 50a, 15a, and 29b. Courses of a more special nature will not as a rule be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry must include among their courses Chemistry 40, 41, 42, and 43, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b). 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) (¼ to ¾ unit).* Arrange. Professor HOPKINS.

Chem. 105b. Inorganic Seminar and Special Topics.—(¼ to 1 unit).* Seminar, 4 Tu; 162 Chem. Professor HOPKINS. Special topic: The structure of complex inorganic compounds. 9 TT; 161 Chem. Assistant Professor BAILAR.

Chem. 124b. Quantitative Analysis.—A modern survey of advanced principles, calculations, experimental methods, and applications. (½ unit). Lectures, 11 MF; 116 Chem. Associate Professor REEDY.

Chem. 124d. Quantitative Analysis.—(Laboratory work, optional, to accompany Chem. 124b.) (¼ to ¾ unit).* Arrange; 260 Chem. Associate Professor SMITH.

Chem. 125b. Analytical Chemistry.—(Seminar). Required of all students taking a major or minor in analytical chemistry. (¼ to 1 unit).* 4 Th; 162 Chem. Additional meetings to be arranged. Professor CLARK.

Chem. 127b. Modern Applications of X-rays to Chemical and Industrial Problems.—(½ unit). Lectures, 10 TT; 217 Chem. Professor CLARK.

Chem. 127d. Modern Applications of X-rays to Chemical and Industrial Problems.—(Laboratory work, optional, to accompany Chem. 127b.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). 11 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 150b. Physiological Chemistry.—(¾ unit). 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Physiological Chemistry.—(½ to 1 unit).* Chiefly laboratory work. Arrange; 467b Chem. Professor ROSE.

Chem. 155b. Physiological Chemistry.—(Seminar). Required of all students majoring in physiological chemistry. (¾ unit). 9–11 F; 456 Chem. Professor ROSE.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 160b. Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lect., 8 MW; 162 Chem. Professor KEYES.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (½ unit). 9 TT; 162 Chem. Associate Professor KRASE.

Chem. 186b. Sanitary Chemistry.—(½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Dr. COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Assistant Professors BAILAR and AUDRIETH, Dr. COPLEY.

Analytical Chemistry.—Professor CLARK, Associate Professors REEDY and SMITH, Assistant Professor ENGLIS.

Food and Phyto-Chemistry.—Assistant Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON, and SHRINER, Assistant Professor BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Physiological Chemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES, Associate Professor KRASE, Assistant Professors JOHNSTONE and SWANN, Mr. HOWARD.

Ceramic Chemistry.—Professor PARMELEE.

Zymochemistry.—Professor BUSWELL.

Courses for Graduates

D.H. 101. Economic Milk Production.—(½ to 2 units).* Twice a week. Arrange. Professor FRASER.

D.H. 105. Dairy Manufactures.—(½ to 2 units).* Arrange. Professor RUEHE, Associate Professor TRACY.

D.H. 106. Dairy Bacteriology.—(½ to 2 units).* Arrange. Professor PRUCHA.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

D.H. 107. Dairy Chemistry.—(½ to 2 units).* Arrange. Associate Professor OVERMAN.

D.H. 108. Physiology of Lactation.—(½ to 2 units).* Arrange. Professor GAINES.

D.H. 112a-f. Research.—(1 to 4 units).* Arrange. *Note:* Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

(a) **Dairy Bacteriology.**—Professor PRUCHA.
(b) **Dairy Chemistry.**—Associate Professor OVERMAN.
(c) **Dairy Cattle Breeding.**—Professor YAPP.
(d) **Dairy Cattle Feeding.**—Associate Professor NEVENS.
(e) **Milk Production.**—Professor GAINES.
(f) **Dairy Manufactures.**—Professor RUEHE, Associate Professor TRACY.

D.H. 113. Seminar.—(½ unit). Once a week. Both semesters. Current literature in dairy bacteriology, dairy chemistry, and dairy manufactures. Members of the graduate staff.

D.H. 114. Seminar.—(½ unit). Once a week. Both semesters. Current literature in biology of milk production. Professor GAINES.

ECONOMICS

Including courses formerly in Public Utilities and Transportation
(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

Courses for Graduates

In addition to complying with the general rules of the Graduate School, candidates for the master's degree in education must meet the following requirements: (1) Education 125 is a required course for all students; (2) for students who have not taken a course in the history of education, Education 11 or Education 30 is required; (3) Education 6 and 25, or their equivalents, are prerequisites for all graduate courses.

No student is recommended to the Dean of the Graduate School for formal admission to candidacy for the master's degree until at least four units of the eight ordinarily required for the degree have been completed satisfactorily. In the case of a student who has been allowed to waive the thesis (see Graduate School Bulletin), two papers will be required. The first shall be written during the first half of the student's residence and shall be an important factor in determining his further status in the department. The second shall be written during the second half of the student's period of residence.

Courses for Graduates

Note: Entrance on graduate work in electrical engineering presupposes the equivalent of the full undergraduate course in that subject. The undergraduate courses in electrical engineering are open for minor credit to students majoring in other departments who have the proper prerequisites.

E.E. 101. Advanced Courses in Alternating Currents.—(½ to 2 units).* Arrange.
- (a) **Graduate Seminar.**—Professor PAINE.
- (c) **Machine Transients.**—Assistant Professor KEENER.

E.E. 102. Electric Waves, Oscillations, and Transients.—(½ to 2 units).* Arrange.
- (a) **Theory of Electric Waves, Oscillations, and Transients.**—Assistant Professor REICH.
- (b) **Demonstration Lecture.**—Assistant Professor REICH.
- (c) **Theory of Energy Radiation.**—Assistant Professor BROWN.
- (d) **Principles of Television Engineering.**—Assistant Professor BROWN.

E.E. 103. Electric Design.—(1 unit). Arrange.
- (a) **Power Plant Design.**—Professor PAINE.
- (b) **Machine Design.**—Professor PAINE.
- (c) **Illumination Practice and Design.**—Assistant Professor KRAEHENBUEHL.

E.E. 104. Courses in Electronics.—(1 unit). Arrange.
- (a) **Theoretical Electronics.**—Assistant Professor REICH.
- (c) **Photoelectric Cells, Gaseous Control Tubes and Inverters.**—Assistant Professor REICH.

E.E. 105. Electrical Engineering Research.—(1 to 3 units).* Professors PAINE, TYKOCINER, KNIGHT, Assistant Professors BROWN, REICH, KEENER, KRAEHENBUEHL.

ENGINEERING

Courses for Undergraduates

Note: Each of the following courses may be used as an approved or non-technical elective in all engineering curricula.

Eng. 10. Engineering Economics.—Evolution and growth of industry; basic industrial principles; ownership and securities; standardization; valuation and depreciation; comparisons and selections of engineering projects. *Prerequisite:* Junior standing in engineering.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $5.00.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, and 2 and 31 to sophomores, without prerequisites. Either 1, or both 2 and 9, are prerequisite to all other courses in the department. Recommended sequences of courses are 1, 8, 20, and 31, for those desiring strictly practical or economic work; 2, 9, and 21 for those interested in the cultural or biological values of insect study. Students majoring in entomology should include some advanced work in classification, morphology, and control and should plan all of their work with the advice of the department. Seniors receive reduced credit in Entomology 1.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

GEOLOGY AND GEOGRAPHY

Note: Certain courses in this department require laboratory fees varying from $1.00 to $2.50.

A. GEOLOGY

Major: 20 hours in geology, exclusive of Geol. 1, 1a, 43, and 44, and inclusive of at least five hours of courses not open to freshmen or sophomores.

Minors: 20 hours chosen from one or two of the following subjects: astronomy, botany, chemistry, economics, geography, mathematics, physics, zoology, mining engineering, and civil engineering, after consultation with the Department of Geology. At least eight hours must be offered in each subject, if two are chosen.

Note: Certain geology courses are offered only in alternate years: 4, 15, 24, 38, 95, 96, 122, 125, 151, 160, 161, 163.

Students desiring training which leads to executive positions with companies engaged in the development of various mineral industries should select appropriate courses in geology after consulting the head of the department, and also: Accountancy 1a, 1b; Economics 2, 3, and 35; B.O.O. 11; and Business Law 1a, 1b. A minimum of one year's work after graduation should be included in the student's program if possible. Students of petroleum production engineering should select appropriate courses in geology.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), economics, accountancy, philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Graduates

Math. 100. Seminar and Thesis.—(1 to 2 units).* Arrange.

Math. 101. Functions of Real Variables.—(1 unit). 9 TTS; 254 Math. Dr. DOOB.

Math. 110. Elliptic Functions.—(1 unit). 11 MWF; 366 Math. Professor CARMICHAEL.

Math. 114. Partial Differential Equations.—(1 unit). 8 MWF; 366 Math. Assistant Professor TRJITZINSKY.

Math. 126. Theory of Groups.—(1 unit). 9 MWF; 366 Math. Associate Professor BRAHANA.

Math. 131. Algebraic Geometry.—(1 unit). 10 MWF; 254 Math. Professor COBLE.

Math. 170. Algebra.—(1 unit). 9 MWF; 254 Math. Associate Professor HAZLETT.

Math. 171. Analysis.—(1 unit). 11 MWF; 155 Math. Dr. KETCHUM.

Math. 172. Geometry.—(1 unit). 10 MWF; 366 Math. Professor EMCH.

MECHANICAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.50.

Courses for Undergraduates

M.E. 2. Steam Engineering.—*Prerequisite:* Math. 9, Physics 1 and 3.

M.E. 88. Machine Laboratory.—*Prerequisite:* M.E. 87.

3	PW	8–11	TT	Machine Lab.
	Q	1–4	TT	Machine Lab.

M.E. 89. Heat Treatment of Metals.—*Prerequisite:* Senior standing in Mechanical or Railway Mechanical Engineering.

3	PT	2–4	MWF	Forge Lab.
	Q	8–10	MWF	Forge Lab.

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

Courses for Graduates

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor Macintire.

M.E. 109. Mechanical Engineering Design.—(a) Machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors Leutwiler, Ham.

M.E. 110. Advanced Heating, Ventilating, and Air Conditioning.—Applications of various systems, notable developments, and results of research. Individual problems. (1 unit). Twice a week. Arrange. Professor Severns.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating, ventilation, and air conditioning; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors POLSON, KRATZ, HAM, MACINTIRE, and GOFF.

M.E. 117. Advanced Refrigerating Engineering.—Advanced theory and special cycles. Design of comfort cooling and other special installations. (1 unit). Twice a week. Arrange. Professor MACINTIRE.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours (twice a week). Former members of the bands whose work has been satisfactory will be permitted to register in these courses without further examination. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Bands 2. Freshman Band.—(1).

Bands 4. Sophomore Band.—(1).

Bands 6. Junior Band.—(No credit).

Bands 8. Senior Band.—(No credit).

MILITARY SCIENCE

Note: All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R. O. T. C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

Uniform is required for all practical instruction and is optional for classroom instruction.

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00

Major: 20 hours from courses offered in the department. At least five hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than eight hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6 or 7), education, or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 23, 44, 60, 61, 62.
Senior year: Physics 30, 71, 72, 78, 80.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and advanced undergraduates must be preceded by at least one full year of undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 106. General Embryology.—Problems of development. (1 unit). 2 MW; 432 N.H. Professor SHUMWAY.

Zool. 110. Climatic Ecology.—(½ to 1 unit).* 4 WF; 202 Exp. Zool. Lab.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 117. Invertebrate Taxonomy.—(½ to 1 unit).* Arrange; 420 N.H. Professor VAN CLEAVE.

Zool. 118. Advanced Protozoology.—(1 unit). 1–4 TT; 418 N.H. Assistant Professor KUDO.

Individual Research Courses

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor THOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Associate Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange; 432 N.H. Professor SHUMWAY.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Assistant Professor KUDO.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

TIME TABLE

FIRST SEMESTER
1936-1937

THE LIBRARY OF THE
AUG 21 1936
UNIVERSITY OF ILLINOIS

This Time Table is issued early, for the convenience of faculty members and students. Preserve your copy for use during the period of registration, as there will not be a supply for general distribution at that time.

[Published Twice a Week by The University of Illinois. Entered as second-class matter December 11, 1912, at the post office at Urbana, Illinois, under the Act of August 24, 1912. Acceptance for mailing at the special rate of postage provided for in section 1103, Act of October 3, 1917, authorized July 31, 1918.]

REGISTRATION CALENDAR

1936-37

FIRST SEMESTER

1936

Sept. 9-12, Wed.-Sat. . . . . Entrance examinations (get programs and permits at the Registrar's Office).
Sept. 17, Thurs., 7:30 P.M. . . . . Freshman Welcome.
Sept. 18, Fri., 8 A.M. . . . . Meetings for freshman groups with advisers.
Sept. 18, Fri., 9 A.M. . . . . Placement test in rhetoric.
Sept. 18, Fri., 1 P.M. . . . . Meetings for freshman groups with advisers.
Sept. 18, Fri., 7:30 P.M. . . . . Student night meeting.
Sept. 18-19, Fri.-Sat. . . . . Registration for graduate students.
Sept. 19, Sat., 8 A.M.-5 P.M. . . . . Registration for freshmen.
Sept. 21-22, Mon.-Tues. . . . . Registration for upperclassmen.
Sept. 21, Mon., 1:30 P.M. . . . . Hygiene examination.
Sept. 22, Tues., 8 A.M. . . . . Talks for freshmen by Dean of Men and Dean of Women.
Sept. 23, Wed., 8 A.M. . . . . Instruction begun.
Sept. 28, Mon., 12 M. . . . . Latest date for change of study-lists without fee.
Oct. 3, Sat., 12 M. . . . . Latest date for rebates in full.
Oct. 27, Tues. . . . . Latest date for announcement of subjects for theses.
Nov. 5-7, Thurs.-Sat. . . . . High School Conference.
Nov. 21, Sat., 12 M. . . . . Latest date for rebates of one-half fees, and latest date for seniors graduating in February to make substitutions in courses or to remove failures of the last semester or the summer session.
Nov. 25, Wed., 12 M. . . . . Thanksgiving recess begun.
Nov. 30, Mon., 1 P.M. . . . . Instruction resumed.
Dec. 23, Wed., 12 M. . . . . Holiday recess begun.

1937

Jan. 4, Mon., 8 A.M. . . . . Instruction resumed.
Jan. 15, Fri. . . . . Latest date for special examinations.
Jan. 26, Tues. . . . . Semester examinations begun.
Feb. 3., Wed. . . . . Semester examinations ended.

SECOND SEMESTER

Feb. 3-6, Wed.-Sat. . . . . Entrance examinations (get programs and permits at the Registrar's Office).
Feb. 5-6, Fri.-Sat. . . . . Registration for graduate students.
Feb. 8-9, Mon.-Tues. . . . . Registration for undergraduate students.
Feb. 10, Wed., 8 A.M. . . . . Instruction begun.
Feb. 15, Mon. . . . . Earliest date for special examinations.
Feb. 15, Mon., 12 M. . . . . Latest date for change of study-lists without fee.
Feb. 20, Sat., 12 M. . . . . Latest date for rebates in full.
Mar. 25, Thurs., 12 M. . . . . Easter recess begun.
Mar. 30, Tues., 1 P.M. . . . . Instruction resumed.
April 10, Sat., 12 M. . . . . Latest date for rebates of one-half fees, and latest date for seniors to make substitutions in courses or to remove failures of the first semester.
April 30, Fri., 10 A.M. . . . . Honors day convocation.
May 17, Mon. . . . . Latest date for special examinations.
May 27, Thurs. . . . . Military day.
May 28, Fri. . . . . Semester examinations begun.
June 7, Mon. . . . . Semester examinations ended.
June 14, Mon. . . . . Sixty-sixth Annual Commencement.

SUMMER SESSION, 1937

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 12, in Art 35a-35b, Commercial Art, the prerequisites given are Art 28 and Architecture 72; these two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours,* or simply *hours.* An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units.* A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

Agr. Econ. 40a. Investigation with Thesis.—Continuous through the year; credit not given for either semester separately. *Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. (5). Arrange. Work may be taken in the following subjects:

Agricultural Marketing.—Members of the department.
Agricultural Prices and Statistics.—Associate Professor WORKING.
Farm Management.—Professor CASE.
Land Economics.—Professor STEWART.

Agr. Econ. 41. Problems in Agricultural Economics.—*Prerequisite:* Senior standing; approval of the head of the department. (5). Arrange. Work may be taken in the following subjects:

Agricultural Marketing.—Members of the department.
Agricultural Prices and Statistics.—Associate Professor WORKING.
Farm Management.—Professor CASE.
Land Economics.—Professor STEWART.

Courses for Advanced Undergraduates and Graduates

Agr. Econ. 10. Economic Relationships of Agriculture.—*Prerequisite:* Econ. 1 or 2; junior standing

3	A	11	MWF	316 New Agr.	STEWART

Agr. Econ. 22. Types and Systems of Farming.—*Prerequisite:* Agr. Econ. 20. Field trips will be arranged; estimated cost, $3.

Agr. Econ. 26. Farm Administration.—*Prerequisite:* Agr. Econ. 20; senior standing. Field trips will be arranged; estimated cost, $3.

2	A	9	TT	316 New Agr.	CASE and ACKERMAN

Agr. Econ. 36. Marketing Horticultural Products.—*Prerequisite:* Econ. 1 or 2; Agr. Econ. 30; senior standing. Inspection trip required; estimated cost, $12.

3	A	3	MWF	203 V.G.	LLOYD

Courses for Graduates

Agr. Econ. 109. Seminar. Thesis Course.—All graduate students whose major is Agricultural Economics must register in Agr. Econ. 109, but only those students writing theses acceptable for the degree of Master of Science will be given credit. (1 to 2 units).* Once a week. Arrange. Members of the department.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Agr. Econ. 110. Theory of Agricultural Economics.—(1 unit). Arrange. Professor STEWART.

Agr. Econ. 111. Agricultural Prices and Statistics.—(1 unit). Arrange. Associate Professor WORKING.

Agr. Econ. 112. Agricultural Economics Research.—(1 to 2 units).* Credit is conditional on completion of acceptable report of investigation. Arrange. Members of the department.

Agr. Econ. 120. Farm Management Principles and Investigational Methods.—(1 unit). Twice a week. Arrange. Professor CASE.

Agr. Econ. 135. Marketing Fruits and Vegetables.—(1 to 2 units).* Arrange. Professor LLOYD.

AGRICULTURAL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $1.00 to $8.00.

Courses for Undergraduates

Courses for Advanced Undergraduates

Agr. Eng. 18a. Investigation with Thesis.—Continuous through the year; credit not given for either semester separately. *Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. (5). Arrange. Professor LEHMANN, Assistant Professor SHAWL.

Agr. Eng. 28. Advanced Gas Engines and Tractors.—*Prerequisite:* Agr. Eng. 3; consent of the instructor.

3	Lab.	2–5	MW	201 Agr. Eng.	SHAWL
	Lect.	Arrange		201 Agr. Eng.	

Agr. Eng. 51. Special Problems.—*Prerequisite:* Senior standing; approval of the head of the department. (3). Arrange. Members of the department.

AGRONOMY

Note: Certain courses in this department require laboratory fees varying from $2.00 to $4.00.

Agron. 18a. Investigation with Thesis.—Continuous through the year; credit not given for either semester separately. *Prerequisite:* Senior standing, including not less than 20 hours pertinent to the thesis problem; approval of the head of the department. (5). Arrange. Work may be taken in either of the following subjects:

Soils.—Professors BAUER, DETURK, R. S. SMITH; Associate Professor SEARS.

Crops.—Professors BURLISON, WOODWORTH, DUNGAN.

Agron. 7. Crop Production as Affected by Environmental Factors.—*Prerequisite:* Agron. 25; Bot. 5; junior standing.

3	Lect.	8	MWF	553 Agr.	BURLISON and DUNGAN

Agron. 11. Role of Micro-organisms in Soil Fertility.—*Prerequisite:* Agron. 28; Bact. 5a; junior standing.

3	Lect.	9	MWF	302 Agr.	SEARS

Agron. 29. Principles of Field Plot Experimentation.—(Given in 1936-37 and in alternate years). *Prerequisite:* Junior standing.

3	Lect.	11	MWF	302 Agr.	WOODWORTH and MUMM

Agron. 32. Physical Methods of Soil Investigation.—(Given in 1936-37 and in alternate years). *Prerequisite:* Agron. 28; junior standing.

3	Lect., Disc., Lab.	1–3	MWF	657 Agr.	STAUFFER

Courses for Graduates

Agron. 101. Chemical Properties of Soils; Their Relation to Soil Development and Plant Growth.—(1 unit). Twice a week. Arrange; 306 Agr. Professor DETURK.

Agron. 104. Seminar.—(¼ unit). Once a week. Arrange. Graduate staff.

Agron. 112. Theory and Analysis of Plant Breeding Problems.—(1 unit). Three times a week. Arrange. Professor WOODWORTH.

Agron. 118. Research.—(½ to 4 units).* Arrange.

Soils.—Professors BAUER, DETURK, R. S. SMITH.

Crops.—Professors BURLISON, WOODWORTH, DUNGAN.

ANIMAL HUSBANDRY

Courses for Undergraduates

An. Husb. 1. Introduction to Animal Husbandry.—Required of students not having had livestock judging in high school. (No credit in this course allowed to juniors and seniors.)

Credit	Section	Hours	Days	Room	Instructor
2	A	3–5	TT	S.P.	CRAWFORD

An. Husb. 3. Livestock Judging.—*Prerequisite:* An. Husb. 1 or equivalent.

Cer.E. 97. Thesis.—(3 to 5).* Arrange.

Cer.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. (No credit).

Courses for Graduates

Cer.E. 101. The Chemistry of the Compounds of Silicon.—*Prerequisite:* Elementary courses in organic and physical chemistry. (1 unit).

Cer.E. 102. General Technology of the Clay Industries.—*Prerequisite:* The elements of mineralogy and of physical chemistry. (1 or 2 units).*

Cer.E. 103. Chemistry of the Silicates.—Laboratory to supplement Ceramic Engineering 101, which must precede or accompany it. (1 to 2 units).*

Cer.E. 106. Research.—Professors Parmelee, Hursh, Andrews.

CHEMISTRY

(Including Chemical Engineering)

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.00.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in the chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, ceramic engineering, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; by securing special permission, he may register in Chem. 4, 5, or 6.

Courses for Graduates

Chem. 101a. Inorganic Chemistry.—(½ unit). (For laboratory work see Chem. 102a.) 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102a. Inorganic Chemistry.—(Laboratory work to accompany or follow Chem. 101a.) Arrange. (¼ to ¾ unit).* Professor HOPKINS.

Chem. 105a. Inorganic Seminar.—(¼ unit.) Seminar, 4 Tu; 162 Chem. Professor HOPKINS.

Chem. 106a. Special Topics in Inorganic Chemistry.—Lectures, discussions, and reports. (¾ unit). Non-aqueous solvents as media for chemical reactions. 8 TT; 162 Chem. Assistant Professor AUDRIETH.

Chem. 123a. Qualitative Analysis.—(½ unit). Lectures, 11 MF; 116 Chem. Associate Professor REEDY.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 123c. Qualitative Analysis and Microanalysis.—(Laboratory work, optional, to accompany Chem. 123a.) (¼ to ¾ unit).* Arrange. Associate Professor REEDY.

Chem. 125a. Analytical Chemistry.—(Seminar). (Required of all students taking a major or minor in analytical chemistry.) (¼ to 1 unit).* 4 Th; 162 Chem. Professor CLARK.

Chem. 126a. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—Ultimate bomb analysis, gas density, polarimetry, refractometry, spectrophotometry, colorimetry, microscopy, etc. (½ unit). Lectures, 9 TT; 303 Chem. Associate Professor ENGLIS.

Chem. 126c. Quantitative Instrumental and Chemical Methods of Analysis in Chemical Research.—(Laboratory work, optional, to accompany Chem. 126a.) (¼ to ¾ unit).* Arrange; 305a Chem. Associate Professor ENGLIS.

Chem. 127a. Applied X-rays.—(½ unit). Lectures, 10 TT; 217 Chem. Professor CLARK.

Chem. 127c. Applied X-rays.—(Laboratory work, optional, to accompany Chem. 127a.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 132a. Organic Chemistry.—(First course). (¾ unit). 11 TT; 217 Chem. Professor SHRINER.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Professor SHRINER.

Chem. 135a. Organic Chemistry.—(Seminar). (¼ unit). 11 W; 217 Chem. Professor ADAMS.

Chem. 136a. Organic Chemistry.—Special topics. (¾ unit). 11 TT; 112 Chem.A. Professor MARVEL.

Chem. 145a. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 152a. Biochemistry.—Chiefly laboratory. (½ to 1 unit).* Arrange; 467b Chem. Professor ROSE.

Chem. 155a. Biochemistry.—(Seminar required of all students whose major is in biochemistry.) (¾ unit). 9-11 F; 456 Chem. Professor ROSE.

Chem. 160a. Advanced Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lecture, arrange. Professor KEYES.

Chem. 161a. Chemical Plant Design.—Calculations and layout of equipment for recently developed processes. *Prerequisite:* Chem. 61a and 61b. (½ unit). Lecture, arrange. Associate Professor JOHNSTONE.

Chem. 185a. The Chemistry of Water Treatment.—(Seminar). (½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

Chem. 190a. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Assistant Professor COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Assistant Professors AUDRIETH, BAILAR; Dr. REED.

Analytical Chemistry.—Professor CLARK, Associate Professors REEDY, SMITH, ENGLIS.

Food Chemistry.—Associate Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON, SHRINER; Assistant Professor BAILAR.

Zymochemistry.—Professor BUSWELL.

Phytochemistry.—Associate Professor ENGLIS.

Biochemistry.—Professor ROSE, Dr. CARTER.

Chemical Engineering.—Professor KEYES, Associate Professor JOHNSTONE, Assistant Professor SWANN.

Ceramic Chemistry.—Professor PARMELEE.

Chem. 192a. Chemical Literature and Reference Work.—(¼ unit). 4 W; 201 Chem. Dr. BARTOW.

CIVIL ENGINEERING

Note: Certain courses in this department require laboratory fees varying from $0.50 to $2.00.

CLASSICS

Greek

Major: 20 hours, excluding Greek 1a-1b, 15, 16, and 17.

Minors: 20 hours chosen from not more than two of the following: foreign language (Latin being especially recommended), English literature, history, and philosophy. At least eight hours must be taken in each subject, if two are chosen.

Latin

Majors: 20 hours, excluding Latin 1a-1b, 6, 13, and 20, and including six hours in translation courses for advanced undergraduates and graduates.

Minors: 20 hours chosen from not more than two of the following: foreign language (Greek being especially recommended), English literature, history, and philosophy. At least eight hours must be offered in each subject, if two are chosen.

ECONOMICS

(Including courses formerly in Public Utilities and Transportation)
(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

The courses in economics may be grouped in several rather distinct fields in which students may find it profitable to concentrate in their junior and senior years. The following fields are suggested: economic theory, history, and statistics; public and private finance, including insurance; labor; foreign trade; public utilities and transportation.

Courses for Undergraduates

Home Economics 11. Teaching of Home Economics.—(3). (See Home Economics).

Mathematics 35. Teachers' Course.—(3). (See Mathematics).

Music 25a. Elementary School Methods.—(3). (See Music).

Music 26a. High School Methods.—(2). (See Music).

Physical Education for Women 95a. Methods.—(4). (See Physical Education for Women).

C. EDUCATIONAL PRACTICE

The courses listed below are open only to seniors.—*Prerequisite:* Ed. 25 and 6; also Ed. 10 for those students who take Ed. Pract. 5, 9, 10, 16, 19, 24, and 26. For Educational Practice in Agriculture, see Associate Professor NOLAN at 116 Old Agriculture. For Educational Practice in Physical Education, see Mr. JACKSON at 202 Old Gymnasium. For Educational Practice in Home Economics, see Miss ROBINSON and Miss KING at 119 Woman's Building. Arrange for all other courses in Educational Practice with Principal C. W. SANFORD, at 102 University High School.

Ed. Prac. 1. Physical Education for Men.—(2 to 4).* Students must be registered in Ed. 10, Section F2.

Ed. Prac. 2. Physical Education for Men.—(2 to 4).* Students must be registered in Ed. 10, Section F2.

Ed. Prac. 3. Physical Education for Men.—(2 to 4).* Students must be registered in Ed. 10, Section F2.

Ed. Prac. 4. Physical Education for Men.—(2 to 4).* Students must be registered in Ed. 10, Section F2.

Ed. Prac. 5. Agricultural Education.—(3 to 5).* (Same as Agr. Ed. 50).

Ed. Prac. 6. Biology.—(5). Students must be registered in Ed. 10, Section A1.

Ed. Prac. 7. Chemistry.—(5). Students must be registered in Ed. 10, Section A1.

Ed. Prac. 8. Civics.—(5). Students must be registered in Ed. 10, Section E.

Ed. Prac. 9. Drawing, Art.—(5).

Ed. Prac. 10. Drawing, Mechanical.—(5).

Ed. Prac. 11. English.—(5). Students must be registered in Ed. 10, Section G1.

Ed. Prac. 11a. Speech.—(5). Students must be registered in Ed. 10, Section G1.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.00.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, and 2 and 31 to sophomores, without prerequisites. Either 1, or both 2 and 9, are prerequisite to all other courses in the department. Recommended sequences of courses are 1, 8, 20, and 31, for those desiring strictly practical or economic work; 2, 9, and 21 for those interested in the cultural or biological values of insect study. Students whose major is entomology should include some advanced work in classification, morphology, and control and should plan all of their work with the advice of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

Credit	Section	Hours	Days	Room	Instructor

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: Entom. 3, 4, 7, 8, 10, 20, 21, or 31; and senior standing. (2 to 5).* Saturday morning; additional hours to be arranged. Members of the department.

Entom. 20. Insect Control.—*Prerequisite:* Entom. 1 or 9; senior standing.

4		2–5	TT	109 Entom.	Metcalf

Course for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 100. Research.—(½ to 4 units).* Arrange.

(a) **Morphology and Embryology of Insects.**—Associate Professor Hayes.

(b) **Economic Entomology.**—Professor Metcalf.

(c) **Systematic Entomology.**—Professor Metcalf, Asistant Professor Balduf.

(d) **Biology and Ecology of Insects.**—Professor Metcalf.

Entom. 107a. Insect Anatomy.—(1 unit). 10-12 MWF; 312 Entom. Associate Professor Hayes.

GEOLOGY AND GEOGRAPHY

Note: Certain courses in this department require laboratory fees varying from $0.50 to $2.00.

A. GEOLOGY

Major: 20 hours in geology, exclusive of Geol. 1, 1a, 43, and 44, and inclusive of at least five hours of courses not open to freshmen or sophomores.

Minors: 20 hours chosen from one or two of the following subjects: astronomy, botany, chemistry, economics, geography, mathematics, physics, zoology, mining engineering, and civil engineering, after consultation with the Department of Geology. At least eight hours must be offered in each subject, if two are chosen.

Note: Certain geology courses are offered only in alternate years: 4, 15, 24, 38, 95, 96, 122, 125, 151, 160, 163.

Students desiring training which leads to executive positions with companies engaged in the development of various mineral industries should select appropriate courses in geology after consulting the head of the department, and also: Accountancy 1a, 1b; Economics 2, 3, and 35; B.O.O. 11; and Business Law 1a, 1b. A minimum of one year's work after graduation should be included in the student's program if possible. Students of petroleum production engineering should select appropriate courses in geology.

Courses for Advanced Library School Students and Graduates

Lib. Sci. 13a. U. S. Government Publications.—*Prerequisite:* Lib. Sci. 2a-2b. (2 hours or ½ unit). 10 MW; 328 Lib. Miss Higgins.

Lib. Sci. 24a. Book Selection for Special Groups.—*Prerequisite:* Lib. Sci. 3a and 38. (2 hours or ½ unit). 10 TT; 328 Lib. Assistant Professor Hostetter.

Lib. Sci. 44. Bookbuying for the Large Library.—(2 hours or ½ unit). 11 MW; 328 Lib. Miss GARVER.

Lib. Sci. 45. Library Buildings.—(2 hours or ½ unit). 9 TT; 328 Lib. Mr. HENKLE.

Courses for Graduates

Lib. Sci. 101. Thesis.—(1 to 2 units). Professor WINDSOR and others.

Lib. Sci. 102. (a) Seminar. Publishers.—(1 unit). 3-5 W; 328 Lib. Associate Professor BOYD.
(e) Individual Problems.—(½ to 1 unit). To be arranged. Professor WINDSOR and others.

Lib. Sci. 103a. Advanced Reference.—*Prerequisite:* Lib. Sci. 2a-2b. (½ unit). 11 TT; 328 Lib. Miss HIGGINS.

Lib. Sci. 104a. Advanced Classification.—*Prerequisite:* Lib. Sci. 31a, 36, and 37. (½ unit). 10-12 F; 328 Lib. Associate Professor BOND.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), economics, accountancy, philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, and 6a.
Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

Math. 2. College Algebra.—*Prerequisite:* Entrance algebra, 1½ units; plane geometry, 1 unit.

M.E. 97. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

M.E. 99. Inspection Trip.—*Prerequisite:* Senior standing. (No credit).

Courses for Graduates

Note: Entrance on graduate work in Mechanical Engineering presupposes the full undergraduate course in that subject.

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Professor Goff.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor Macintire.

M.E. 109. Mechanical Engineering Design.—(a) Machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors Leutwiler, Ham.

M.E. 110. Advanced Heating, Ventilating, and Air Conditioning.—Applications of various systems, notable developments, and results of research. Individual problems. (1 unit). Twice a week. Arrange. Professor Severns.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating, ventilation, and air conditioning; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors Polson, Kratz, Ham, Macintire, Goff.

M.E. 117. Advanced Refrigerating Engineering.—Advanced theory and special cycles. Design of comfort cooling and other special installations. (1 unit). Twice a week. Arrange. Professor Macintire.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours (twice a week). Former members of the bands whose work has been satisfactory will be permitted to register in these courses without further examination. Assignments are made according to proficiency. Service in the bands takes the place of the required military courses. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Bands 1. Freshman Band.—(1).

Bands 3. Sophomore Band.—(1).

Bands 5. Junior Band.—(No credit).

Bands 7. Senior Band.—(No credit).

MILITARY SCIENCE

Note: All military courses consist of two parts designated by the same number; a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R.O.T.C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

Uniform is required for all practical instruction and is optional for classroom instruction.

PHYSICAL EDUCATION FOR MEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1 for the semester.

Freshmen and Sophomores: Men entering the University as freshmen are required to obtain credit for four semesters of work in physical education; those entering as sophomores, two semesters. They may obtain this credit by courses listed below or by proficiency examinations which are offered at times specified by the department.

Major: For Curriculum in Physical Education for Men, see "Directions for Registration."

For information, late registration, changing sections, call at Room 201, Men's Old Gymnasium.

Courses for Undergraduates

P.E. 20a, 20b, 20c, 20d. Adapted Sports.—Open only to students who fail to pass the health examinations. Students enrolling for the first time should register for P.E. 20a. Students enrolling for the second, third, or fourth time should register for P.E. 20b, 20c, and 20d, respectively.

PHYSICAL EDUCATION FOR WOMEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1.00 for the semester.

Freshmen and Sophomores: Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 72) or rhythms (P.E. 51); one semester of swimming (P.E. 75, 76, 54); one semester of individual sports (P.E. 60) or seasonal sports (P.E. 73) or team games (P.E. 58); and one semester of an elective.

Proficiency examinations in any courses offered to freshmen and sophomores may be taken at times specified by the department. These will be given each semester.

Major: For Curriculum in Physical Education for Women, see "Directions for Registration."

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00.

Major: 20 hours from courses offered in the department. At least five hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than eight hours in each department if two subjects are chosen: mathematics (courses in calculus and beyond), astronomy, chemistry (except Chem. 1, 2, 3, 4, 5, 6, or 7), education, or engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:

Freshman year: Trigonometry and analytic geometry.

Sophomore year: Physics 1a-1b, 3a-3b, and calculus.

Junior year: Physics 14, 23, 44, 60, 61.

Senior year: Physics 30, 62, 71, 72, 78, 80.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

T.A.M. 110. Analytical Study of Experimental Work on Reinforced Concrete: Beams, Frames, and Footings.—(1 unit). Twice a week. Arrange. Professor RICHART.

T.A.M. 114. Theory of Elasticity with Applications to Engineering Problems.—(1 unit). Three times a week. Arrange. Dr. NEWMARK.

T.A.M. 116. Resistance of Materials.—(1 unit). Three times a week. Arrange. Professor SEELY.

ZOOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.00 to $4.50.

Major: 20 hours from any courses offered in the department, excluding Zoology 1, and including Zoology 2, 3, 4, 5 (or 7), and 9. At least five hours must be offered from the advanced groups.

Minors: 20 hours chosen from one or two of the following subjects: animal husbandry, bacteriology, botany, chemistry, entomology, geology, physics, physiology, psychology. At least eight hours must be offered in each subject, if two are chosen.

Note: Credit for seniors who take Zoology 1 or 2 will be reduced one hour.

Courses for Graduates

Students entering on graduate study in the department of zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and advanced undergraduates must be preceded by at least one full year of undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

Zool. 103. Cytology.—Morphology of the animal cell, especially in development. (1 unit). 2 MW; 432 N.H. Professor SHUMWAY.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 MW; 340 N.H. Professor ZELENY.

Zool. 131. Helminthology.—(½ to 1 unit).* 2-5 TT; 420 N.H. Professor VAN CLEAVE, Assistant Professor THOMAS.

Individual Research Courses

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor TAOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Associate Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange. 432 N.H. Professor SHUMWAY.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Associate Professor KUDO.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

EXPLANATION OF LISTING OF COURSES

The arrangement of subjects in the following Time Table is alphabetical by names of departments. The connections of allied departments and divisions are indicated by cross references. (See page 3 for key to names of departments and divisions.)

The courses offered by each department or division are listed, in numerical order, in groups with headings that indicate the students for whom they are designed. Groups of general, elementary, and introductory courses are listed as "Courses for Undergraduates." Intermediate and advanced groups are listed as "Courses for Advanced Undergraduates and Graduates." Courses with numbers beginning at 100 are listed as "Courses for Graduates" and are not open to undergraduates.

Following the title of each course of instruction will be found the requirements, if any, for admission to that particular course. The sequence indicated by these prerequisites must be followed. For example, on page 12, in Art 35a-35b, Commercial Art, the prerequisites given are Art 28 and Architecture 72; these two courses must be completed before Art 35a-35b may be taken.

If a course not required for graduation is selected by fewer than five students it may be withdrawn for the semester.

Credit

Credit for undergraduate students is reckoned in *semester hours*, or simply *hours*. An *hour* is one class period a week for one semester or the equivalent in laboratory, shop, or drafting room. The number of hours for which each course counts is shown in parentheses in the description of the course, thus, (2), except where the credits, sections, etc., are tabulated.

Credit for first-year graduate students, candidates for the master's degree, is counted in *units*. A *unit* course is one which requires ten hours of time per week through one semester, irrespective of the distribution of that time in class work, laboratory work, and private study. Four such courses or their equivalent constitute a full minimum program for one semester. The unit values of graduate courses (numbered 100 and upwards) are indicated in parentheses following the titles of these courses. Courses of the intermediate groups "for graduates and advanced undergraduates" generally are evaluated for graduate credit as follows: (a) courses open only to students having at least senior standing, 1 unit for a 4-hour or a 5-hour course, ½ unit for a 1-hour, 2-hour, or 3-hour course; (b) courses open to juniors, ½ unit for a 4-hour or 5-hour course, ¼ unit for a 1-hour, 2-hour, or 3-hour course.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

CHEMISTRY

(Including Chemical Engineering)

Note: Certain courses in this department require laboratory fees varying from $2.50 to $18.00.

Students in the curricula of chemistry and chemical engineering, majors in chemistry, and all others who desire a thorough training in the fundamentals of chemistry and their applications to modern life, should select courses from the following, and usually in the sequence given: Chemistry 1 or 2, 6, 10, 24, 34a, 36b, 37b, 40, 41, 42, 43, 50a, and courses in chemical engineering, sanitary chemistry, and miscellaneous groups. Students in engineering should register for Chemistry 3 or 2, 4, 24. Students who are compelled to meet chemical requirements briefly may register for the following sequence: Chemistry 1 or 2, 5, 24, 32 or 33.

Students who find it impossible to take more than one semester's work are requested to register in Chemistry 1 or 2 in the second semester rather than in the first.

Major: 20 hours, exclusive of Chemistry 1, 2, 3, 4, 5, 6, 7, and inclusive of courses in qualitative, quantitative, and organic chemistry. At least five hours must be offered from the advanced group.

Minors: 20 hours chosen from not more than two of the following: bacteriology, botany, ceramic engineering, entomology, geology, mathematics, philosophy, physiology, physics, psychology, and zoology. At least eight hours must be offered in each subject, if two are chosen.

Note: Seniors receive reduced credit in Chemistry 1, 2, 3, 4, 5, 6, and 7.

Courses for Undergraduates

Chem. 7. General Chemistry.—Not open to students who have earned credit in high school chemistry. This course may be applied toward the science group requirements. After completing Chem. 7, a student is permitted to register in Chem. 2; or by securing special permission he may register in Chem. 4, 5, or 6.

Courses for Graduates

Graduate students whose major subject is in some department other than chemistry must have had the equivalent of 15 university credits in chemistry, and the ground covered should include satisfactory work in general chemistry and in qualitative and quantitative analysis and elementary organic chemistry. Such students are advised to make selections from the following courses: Chemistry 40, 41, 42, 43, 27, 34a, 36b, 37b, 50a, 15a, and 29b. Courses of a more special nature will not, as a rule, be accepted for graduate work unless preceded by one of the courses above. Graduate students who are candidates for an advanced degree in chemistry must have had the equivalent of 25 university credits in chemistry, properly distributed.

Graduate students whose major subject is in some department other than chemistry and who intend to take a first minor in chemistry or any branch of chemistry toward the Ph.D. degree must include among the courses taken Chemistry 40 and 41, or must have had the equivalent.

Graduate students who are candidates for the A.M. or M.S. degree in chemistry or in chemical engineering must include in the courses taken Chemistry 40 and 41, or must have had the equivalent. Graduate students who are candidates for the Ph.D. degree in any branch of chemistry or in chemical engineering must include among their courses Chemistry 40, 41, 42, and 43, or must have had the equivalent. Those courses (with the exception of Chemistry 12b) listed under the heading "Advanced Undergraduate and Graduate Courses" may be all counted toward advanced degrees in chemistry.

Chem. 101b. Inorganic Chemistry.—The less familiar elements and their relationship in the periodic system. (½ unit). (For laboratory work see Chem. 102b). 8 MW; 303 Chem. Professor HOPKINS.

Chem. 102b. Inorganic Chemistry.—Inorganic preparations and qualitative analysis of the less familiar elements. (Laboratory work to accompany or follow Chem. 101b.) (¼ to ¾ unit).* Arrange. Professor HOPKINS.

Chem. 105b. Inorganic Seminar.—(¼ unit). Seminar, 4 Tu; 162 Chem. Professor HOPKINS.

Chem. 106b. Special Topics in Inorganic Chemistry.—Lectures, discussions, and reports. Chemical radicals as pseudoatoms. (¾ unit). 8 TT; 456 Chem. Dr. REED.

Chem. 124b. Quantitative Analysis.—Advanced principles, calculations, experimental methods, and applications. (For majors and minors in analytical chemistry). (½ unit). Lectures, 9 TT; 116 Chem. Associate Professor SMITH.

Chem. 124d. Quantitative Analysis.—(Laboratory work, optional, to accompany Chem. 124b.) (¼ to ¾ unit).* Arrange; 350 Chem. Associate Professor SMITH.

Chem. 125b. Analytical Chemistry.—(Seminar). Required of all students taking a major or minor in analytical chemistry. (¼ to 1 unit).* 4 Th; 162 Chem. Additional meetings to be arranged. Professor CLARK.

Chem. 127b. Applied X-rays.—(½ unit). Lectures, 10 TT; 217 Chem. Professor CLARK.

Chem. 127d. Applied X-rays.—(Laboratory work, optional, to accompany Chem. 127b.) (¼ to ½ unit).* Arrange; 308 Chem. Professor CLARK.

Chem. 133b. Organic Chemistry.—(¾ unit). 11 TT; 217 Chem. Professor ADAMS.

Chem. 134. Organic Chemistry.—Chiefly laboratory work. (½ to 1 unit).* Arrange; 219 Chem. Professor MARVEL.

Chem. 135b. Organic Chemistry.—(Seminar). (¼ unit). 11 W; 217 Chem. Professor ADAMS.

Chem. 145b. Physical Chemistry.—(Seminar). (¾ unit). 10-12 S; 176 Chem. Professor RODEBUSH.

Chem. 150b. Biochemistry.—(¾ unit). 9 TT; 111 Chem. Professor ROSE.

Chem. 152b. Biochemistry.—(½ to 1 unit).* Chiefly laboratory work. Arrange; 467b Chem. Professor ROSE.

Chem. 155b. Biochemistry.—(Seminar). Required of all students majoring in biochemistry. (¾ unit). 9-11 F; 456 Chem. Professor ROSE.

Chem. 160b. Advanced Chemical Engineering.—*Prerequisite:* Chem. 61a and 61b. (½ unit). Lectures, 9 TT; 162 Chem. Professor KEYES.

---

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Chem. 161b. Chemical Plant Design.—*Prerequisite:* Chem. 61a and 61b. (½ unit). 8 TT; 162 Chem. Associate Professor JOHNSTONE.

Chem. 185b. The Chemistry of Water Treatment.—(Seminar). (½ to 1¼ units).* Arrange; 60b Chem. Professor BUSWELL.

Chem. 190b. Research.—Work may be taken in the following subjects:

Physical and Electrochemistry.—Professor RODEBUSH, Associate Professor PHIPPS, Assistant Professor COPLEY.

Inorganic Chemistry.—Professor HOPKINS, Associate Professor REEDY, Assistant Professors BAILAR, AUDRIETH, and COPLEY, Dr. REED.

Analytical Chemistry.—Professor CLARK, Associate Professors REEDY, SMITH, and ENGLIS.

Food and Phyto-Chemistry.—Associate Professor ENGLIS.

Applied X-rays.—Professor CLARK.

Organic Chemistry.—Professors ADAMS, MARVEL, FUSON, and SHRINER, Assistant Professor BAILAR.

Sanitary Chemistry.—Professor BUSWELL.

Biochemistry.—Professor ROSE.

Chemical Engineering.—Professor KEYES, Associate Professor JOHNSTONE, Assistant Professor SWANN.

Ceramic Chemistry.—Professor PARMELEE.

Zymochemistry.—Professor BUSWELL.

Courses for Graduates

D.H. 101. Economic Milk Production.—(½ to 2 units).* Twice a week. Arrange. Professor FRASER.

D.H. 105. Dairy Manufactures.—(½ to 2 units).* 10-12 S, or arrange. Professor RUEHE, Associate Professor TRACY.

D.H. 106. Dairy Bacteriology.—(½ to 2 units).* Arrange. Professor PRUCHA.

D.H. 107. Dairy Chemistry.—(½ to 2 units).* Arrange. Associate Professor OVERMAN.

---

†All students specializing in dairy manufactures are expected to take an inspection trip either in the junior or senior year. The trip will cover dairy manufacturing plants and wholesale markets and probably will cost about $15.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

D.H. 108. Physiology of Lactation.—(½ to 2 units).* Arrange. Professor GAINES.

D.H. 112. Research.—(1 to 4 units).* 10-12 S, or arrange. *Note:* Graduate students writing a thesis should so indicate when registering in Dairy Husbandry 112.

Dairy Bacteriology.—Professor PRUCHA.
Dairy Chemistry.—Associate Professor OVERMAN.
Dairy Cattle Breeding.—Professor YAPP.
Dairy Cattle Feeding.—Professor NEVENS.
Milk Production.—Professor GAINES.
Dairy Manufactures.—Professor RUEHE, Associate Professor TRACY.

D.H. 113. Seminar.—(½ unit). Once a week. Both semesters. Current literature in dairy bacteriology, dairy chemistry, and dairy manufactures. Members of the graduate staff.

D.H. 114. Seminar.—(½ unit). Once a week. Both semesters. Current literature in biology of milk production. Professor GAINES.

ECONOMICS

Including courses formerly in Public Utilities and Transportation

(See also Agricultural Economics and Business Organization and Operation)

Major: For students in the College of Liberal Arts and Sciences, 20 hours made up of Economics 1 and other courses in economics for which it is a prerequisite.

Minors: 20 hours in any one or two of the following subjects: geography, history, mathematics, philosophy, political science, and sociology.

Note: Economics 22 and 27 are open only to freshmen, without previous requirements.

Economics 1 is the fundamental course in economics. It is a prerequisite for most of the advanced courses, and students expecting to do advanced work in economics should take it in their sophomore year.

The courses in economics may be grouped in several rather distinct fields in which students may find it profitable to concentrate in their junior and senior years. The following fields are suggested: economic theory, history, and statistics; public and private finance, including insurance; labor; foreign trade; public utilities and transportation.

Courses for Graduates

In addition to complying with the general rules of the Graduate School, candidates for the master's degree in education must meet the following requirements: (1) Education 125 is a required course for all students; (2) for students who have not taken a course in the history of education, Education 11 or Education 30 is required; (3) Education 6 and 25, or their equivalents, are prerequisites for all graduate courses.

No student is recommended to the Dean of the Graduate School for formal admission to candidacy for the master's degree until at least four units of the eight ordinarily required for the degree have been completed satisfactorily. In the case of a student who has been allowed to waive the thesis (see Graduate School Bulletin), two papers will be required. The first shall be written during the first half of the student's residence and shall be an important factor in determining his further status in the department. The second shall be written during the second half of the student's period of residence.

Courses for Graduates

Note: Entrance on graduate work in electrical engineering presupposes the equivalent of the full undergraduate course in that subject. The undergraduate courses in electrical engineering (except E.E. 14, 90, 92) are open for minor credit to students majoring in other departments who have the proper prerequisite.

E.E. 101. Advanced Courses in Alternating Currents.—(0 to 2 units).* Arrange.
(a) **Graduate Seminar.**—Professor Paine.
(c) **Machine Transients.**—Assistant Professor Keener.

E.E. 102. Electric Waves, Oscillations, and Transients.—(½ to 2 units).* Arrange.
(a) **Theory of Electric Waves, Oscillations, and Transients.**—Associate Professor Reich.
(b) **Demonstration Lecture.**—Associate Professor Reich.
(c) **Theory of Energy Radiation.**—Assistant Professor Brown.
(d) **Principles of Television Engineering.**—Assistant Professor Brown.

E.E. 103. Electric Design.—(1 to 3 units).* Arrange.
(a) **Power Plant Design.**—Professor Paine.
(b) **Machine Design.**—Professor Paine.
(c) **Illumination Practice and Design.**—Assistant Professor Kraehenbuehl.

E.E. 104. Courses in Electronics.—(1 unit). Arrange.
(a) **Theoretical Electronics.**—Associate Professor Reich.
(c) **Photoelectric Cells, Gaseous Control Tubes and Inverters.**—Associate Professor Reich.

E.E. 105. Electrical Engineering Research.—(1 to 3 units).* Professors Paine, Tykociner, Knight; Associate Professor Reich; Assistant Professors Brown, Keener, Kraehenbuehl.

ENGINEERING

Courses for Undergraduates

Note: Each of the following courses may be used as an approved or non-technical elective in all engineering curricula.

Eng. 10. Engineering Economics.—Evolution and growth of industry; basic industrial principles; ownership and securities; standardization; valuation and depreciation; comparisons and selections of engineering projects. *Prerequisite:* Junior standing in engineering.

Credit	Section	Hours	Days	Room	Instructor
3	A	9	MWF	105 T.B.	King
	B	10	MWF	105 T.B.	

Eng. 39. Industrial Relations.—History of the development of industry; the factory system; manufacturers' organizations; labor organizations; works management; trade unions; wage systems; personnel problems; labor legislation. *Prerequisite:* Junior standing.

3	A	11	MWF	Mach. Lab.	Casberg

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Eng. 92. Engineering Law.—Contracts, evidence, torts, equity, real property, corporations, agency, sales, negotiable instruments, water rights, patent rights, special assessments, contract letting, general conditions. *Prerequisite:* Senior standing in engineering or architecture.

ENGLISH

(Including Rhetoric, Speech, and Scandinavian Languages)

Major in English

Major: 20 hours in English *excluding* Rhetoric 1, 2, 10, 12, 21, 22, English 10a, 10b, 20a, 20b, 41, 42, and courses in Scandinavian and Speech, and *including* at least ten hours in English literature, at least three hours in composition, and two courses chosen from the advanced groups in English literature.

Minors: 20 hours in (a) Latin or Greek or French or German or Spanish or Italian; or (b) in any two of those languages; or (c) in one of those languages and philosophy; or (d) in one of those languages and history; or (e) in history and philosophy. No language courses may be regarded as satisfying the minor requirement if they are excluded from the majors of the language departments (excepting elementary courses in Greek, Latin, French 2a, Italian 2a, and Spanish 2a). At least eight hours must be offered in each subject, if two are chosen.

Major in Speech

Major: 10 hours in Speech, inclusive of Speech 7 and 8 and either 4 or 6; and 10 hours of English, exclusive of English 10a, 10b, 41, 42, and of Rhetoric 1, 2, 10, 12, 21, 22, and inclusive of one course in English literature chosen from the advanced groups.

Minors: 20 hours in any one or two of the following subjects: psychology, philosophy, Greek, Latin, French, German, history, political science, economics, law, or sociology. At least eight hours must be offered in each subject, if two are chosen.

ENTOMOLOGY

Note: Certain courses in this department require laboratory fees varying from $1.50 to $4.00.

Major: 20 hours exclusive of Entomology 1, 2, 31. At least five hours must be offered from the advanced group.

Minors: 20 hours in not more than two of the following, with not less than eight hours in either department, if two subjects are chosen: zoology, botany, chemistry, physiology, horticulture, and agronomy.

Entomology 1 is open to freshmen, and 2 and 31 to sophomores, without prerequisites. Either 1, or both 2 and 9, are prerequisite to all other courses in the department. Recommended sequences of courses are 1, 8, 20, and 31, for those desiring strictly practical or economic work; 2, 9, and 21 for those interested in the cultural or biological values of insect study. Students whose major is entomology should include some advanced work in classification, morphology, and control and should plan all of their work with the advice of the department. Seniors receive reduced credit in Entomology 1.

Courses for Undergraduates

Entom. 1. Destructive and Useful Insects.—Two discussion periods and four hours laboratory a week.

Credit	Section	Hours	Days	Room	Instructor
3[1]	A	8–10	MWF	309 Entom.	METCALF, MILUM, and FAY
[1]Seniors will receive only 2 hours credit.	B	10–12	MWF	309 Entom.	METCALF, MILUM, and BALDUF
	C	1–3	MWF	309 Entom.	HAYES, MILUM, and SMITH
	D	3–5	MWF	309 Entom.	HAYES and FAY

Entom. 2. Insects: Their Ways and Their Relation to Man.—A non-technical, cultural course of illustrated lectures with exhibits. *Prerequisite:* Sophomore standing. (Not open to students who have taken Entom. 1.)

2	A	11	TT	202 Entom.	BALDUF
	B	2	TT	202 Entom.	BALDUF

Entom. 4. Classification of Insects. Orders with Complete Metamorphosis.—*Prerequisite:* Entomology 9 or its equivalent; sophomore standing.

5	Lab.	8–10	MWF	310 Entom.	BALDUF
	Disc.	To be arranged		310 Entom.	BALDUF

Entom. 7b. Insect Morphology.—Internal morphology and physiology. *Prerequisite:* Entom. 7a; sophomore standing.

3	Lect.	10	M	312 Entom.	HAYES
	Lab.	11	M	312 Entom.	HAYES
		10–12	WF	312 Entom.	

Entom. 8b. Insect Pests of Field Crops.—*Prerequisite:* Entom. 1 or 9; sophomore standing.

3	Lect.	1	TT	312 Entom.	HAYES
	Lab.	2–4	TT	312 Entom.	HAYES

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Entom. 31. Essentials of Beekeeping.—*Prerequisite:* Sophomore standing.

Courses for Advanced Undergraduates and Graduates

Entom. 6. Special Problems.—*Prerequisite:* Any of the following: 3, 4, 7, 8, 10, 20, 21, 22, or 31; senior standing. (2 to 4).* Saturday morning; additional hours to be arranged. Members of the department.

Entom. 21. Insect Bionomics.—*Prerequisite:* Entom. 1 or 9; senior standing.

3	Lect.	3	MWF	312 Entom.	METCALF

Courses for Graduates

Note: The prerequisite for graduate work in entomology is two years of undergraduate biology, including zoology and entomology.

Entom. 100. Research.—(½ to 4 units).* Arrange.

(a) **Morphology and Embryology of Insects.**—Associate Professor HAYES.
(b) **Economic Entomology.**—Professor METCALF.
(c) **Systematic Entomology.**—Professor METCALF, Assistant Professor BALDUF.
(d) **Biology and Ecology of Insects.**—Professor METCALF.

Entom. 107b. Internal Insect Anatomy.—(1 unit). 10-12 MWF; 312 Entom. Associate Professor HAYES.

GENERAL ENGINEERING DRAWING

Note: All courses in this department require laboratory fees of $1.00.

Courses for Undergraduates

G.E.D. 1. Elements of Drawing.—*Prerequisite:* Plane geometry.

4	C	8–11	TT	302 T.B.	
		8–10	S	302 T.B.	

G.E.D. 6. Elements of Drawing.—*Prerequisite:* Plane geometry. (For students in chemical engineering).

3	D	1–4	TT	316 T.B.	JORGENSEN

G.E.D. 8. Architectural Projections.—(Continuation of G.E.D. 7). *Prerequisite:* G.E.D. 7. (Students completing G.E.D. 7 and 8 may substitute them for G.E.D. 2).

2	A	8–11	MF	103 T.B.	PORTER and LENDRUM
	B	2–5	MF	103 T.B.	
	C	8–11	TT	103 T.B.	

G.E.D. 10. Pictorial Drawing.—*Prerequisite:* G.E.D. 2. (Required of students in the City Planning Option in Civil Engineering; and "approved elective" in all other curricula of the College of Engineering).

4 or 3[1]	C	8–11	TT	316 T.B.	LENDRUM
		8–10	S	316 T.B.	

[1]For "approved elective" group who will omit 8-10 S hours in registering.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

GEOLOGY AND GEOGRAPHY

Note: Certain courses in this department require laboratory fees varying from $0.50 to $2.00.

A. GEOLOGY

Major: 20 hours in geology, exclusive of Geol. 1, 1a, 43, and 44, and inclusive of at least five hours of courses not open to freshmen or sophomores.

Minors: 20 hours chosen from one or two of the following subjects: astronomy, botany, chemistry, economics, geography, mathematics, physics, zoology, mining engineering, and civil engineering, after consultation with the Department of Geology. At least eight hours must be offered in each subject, if two are chosen.

Note: Certain geology courses are offered only in alternate years: 4, 15, 24, 38, 95, 96, 122, 125, 151, 160, 163.

Students desiring training which leads to executive positions with companies engaged in the development of various mineral industries should select appropriate courses in geology after consulting the head of the department, and also: Accountancy 1a, 1b; Economics 2, 3, and 35; B.O.O. 11; and Business Law 1a, 1b. A minimum of one year's work after graduation should be included in the student's program if possible. Students of petroleum production engineering should select appropriate courses in geology.

Courses for Undergraduates

Courses for Graduates

Geol. 134. Advanced Studies in Geology.—(½ to 2 units).* Arrange, possibly Saturday. Members of the department.

Geol. 135. Research.—(½ to 4 units).* Arrange, possibly Saturday. Members of the department.

Geol. 143. Stratigraphic Paleontology: Mesozoic and Cenozoic.—(1 unit). Arrange; 134 N.H. Assistant Professor Sutton.

Geol. 151. Advanced Dynamic Geology.—(1 unit). Three times a week. Arrange. Associate Professor Shepard.

Geol. 160. Petroleum Geology.—(1 unit). Three times a week. Arrange. Professor DeWolf.

B. GEOGRAPHY

Major: 20 hours of courses in geography, exclusive of Geography 1, and including at least five hours of courses not open to freshmen.

Minors: 20 hours chosen from one or two of the following subjects: botany, economics, education, geology, history, and zoology. At least eight hours must be offered in each subject, if two are chosen. For those whose major is in geography, or in education with a minor in geography, the following sequences are recommended: Geography 1, 2, 4, 5, 7, 14, 15, or 10 or 11, or 12 or 8 or 53.

Note: Certain geography courses are offered only in alternate years: 6, 9, 10, 14a.

(c) **Individual Problems.**—(½ to 1 unit). To be arranged. Professor WINDSOR and others.

Lib. Sci. 103b. Advanced Reference.—(½ unit). 11 TT; 328 Lib. Miss HIGGINS.

Lib. Sci. 104b. Advanced Cataloging and Classification.—(½ unit). 8–10 F; 328 Lib. Associate Professor BOND.

MATHEMATICS

Major: 20 hours exclusive of Math. 2, 3, 4, 5, 6, 6a, 8a, 8b, and all courses taken during the freshman year, and inclusive of Mathematics 7 and 9, and two semesters of Math. 70, 71, 72.

Note: For undergraduate students intending to take advanced work or a major in mathematics, the following outline of freshman and sophomore work is suggested: Freshman year: first semester, Math. 2 (or 3) and 4 (or 5); second semester, Math. 6. Sophomore year: first semester, Math. 7; second semester, Math. 9. In certain courses Math. 6 may be replaced by Math. 6a, and Math. 7 and 9 by Math. 8a and 8b.

Minors: 20 hours exclusive of courses taken during the freshman year selected from one or two of the following subjects: astronomy, chemistry, physics, statistics (Math. 21, 22, 23, 30, and 31), economics, accountancy, philosophy, theoretical and applied mechanics, surveying. If two subjects are chosen, at least eight hours must be offered in each.

Note: Seniors receive reduced credit in Mathematics 2, 3, 4, 5, 6, or 6a.

Mathematics 32, 35, 36, and 40 are suggested as desirable courses for students preparing to teach high school mathematics.

Courses for Undergraduates

M.E. 98. Thesis.—*Prerequisite:* Senior standing. (3). Arrange.

Courses for Graduates

M.E. 107. Thermodynamics.—Application of thermodynamics to the solution of physical and engineering problems. (1 unit). Twice a week. Arrange. Professor GOFF.

M.E. 108. The Flow of Fluids and Heat Transfer.—The application of dimensional analysis and other rational formulas. Special problems. (1 unit). Twice a week. Arrange. Professor MACINTIRE.

M.E. 109. Mechanical Engineering Design.—(a) Machine design; (b) power plant design; (c) dynamics of machinery. (1 unit). Twice a week. Arrange. Professors LEUTWILER, HAM.

M.E. 110. Advanced Heating, Ventilating, and Air Conditioning.—Applications of various systems, notable developments, and results of research. Individual problems. (1 unit). Twice a week. Arrange. Professor SEVERNS.

M.E. 112. Laboratory Investigations.—Special problems in: (a) combustion; (b) steam; (c) gas and oil engineering; (d) heating, ventilation, and air conditioning; (e) refrigeration; (f) flow of fluids; (g) heat transfer; (h) mechanical transmission of power. (1½ units). Three times a week. Arrange. Professors POLSON, KRATZ, HAM, MACINTIRE, and GOFF.

M.E. 117. Advanced Refrigerating Engineering.—Advanced theory and special cycles. Design of comfort cooling and other special installations. (1 unit). Twice a week. Arrange. Professor MACINTIRE.

MILITARY BANDS

Note: The following courses are open only to those who have passed the examination for admittance to one of the bands. All new students who play band instruments and who desire to try for places in the bands should make application at the Band Office, in the Band Building, at the earliest possible time. Those who are accepted for membership will be given a slip indicating the band to which they have been assigned, together with their rehearsal days and hours (twice a week). Assignments are made according to proficiency. Service in the bands takes the place of the required military courses. Director HARDING, Assistant Director HINDSLEY, Mr. OVERGARD.

Bands 2. Freshman Band.—(1).

Bands 4. Sophomore Band.—(1).

Bands 6. Junior Band.—(No credit).

Bands 8. Senior Band.—(No credit).

MILITARY SCIENCE

Note: All military courses consist of two parts designated by the same number: a practical course lettered with "a" and a theoretical course lettered with "b". Students who have had training in a senior R.O.T.C. unit are permitted to register for work one year advanced for each year they have had in the senior unit. All students who register for junior and senior courses are required to sign a contract with the Government to take five hours of military per week during two years in the University and to attend one summer camp of six weeks.

Uniform is required for all practical instruction and is optional for classroom instruction.

PHYSICAL EDUCATION FOR WOMEN

Note: Each student registering for a course or courses in physical education is assessed a locker fee of $1.00 for the semester.

Freshmen and Sophomores: Of the four required semesters in physical education, the department requires: one semester of gymnastics (P.E. 72) or rhythms (P.E. 51); one semester of swimming (P.E. 75, 76, 54); one semester of individual sports (P.E. 60) or seasonal sports (P.E. 73) or team games (P.E. 58); and one semester of an elective.

Proficiency examinations in any courses offered to freshmen and sophomores may be taken at times specified by the department. These will be given each semester.

Major: For Curriculum in Physical Education for Women, see "Directions for Registration."

PHYSICS

Note: Certain courses in this department require laboratory fees varying from $1.50 to $10.00.

Major: 20 hours from courses offered in the department. At least five hours must be offered from the group of courses for advanced undergraduates and graduates.

Minors: 20 hours in one or two of the following subjects, with not less than eight hours in each if two are chosen: astronomy, chemistry, education, geology, mathematics, or any one branch of engineering.

For undergraduate students taking advanced work or a major in physics, the following courses are suggested:
Freshman year: Trigonometry and analytic geometry.
Sophomore year: Physics 1a-1b, 3a-3b, and calculus.
Junior year: Physics 14, 23, 44, 60, 61.
Senior year: Physics 30, 62, 71, 72, 78, 80.

Physics 7a-7b and 8a-8b are recommended to students not specializing in physics, mathematics, chemistry, or engineering.

The general physics prerequisite for certain courses may be satisfied by either Physics 1a-1b and 3a-3b or by 7a-7b and 8a-8b. The calculus prerequisite may be satisfied either by Mathematics 7 and 9 or by Mathematics 8a-8b.

Courses for Graduates

Students entering on graduate study in the Department of Zoology should have had two years of undergraduate work in the subject. When chosen as a minor the courses listed for graduates and advanced undergraduates must be preceded by at least one full year of undergraduate work in zoology. Work done at other institutions will be evaluated on conference with the head of the department.

*In registering for a course with variable credit, as 1 to 2 units or 2 to 4 hours, each student puts on his study-list the number of units or hours for which he intends to take the course.

Zool. 103. Cytology.—Morphology of the animal cell, especially in development. (1 unit). 2 MW; 432 N.H. Professor SHUMWAY.

Zool. 109. Physiological Ecology.—(½ to 1 unit).* 4 WF; 202 Exp. Zool. Lab. Professor SHELFORD.

Zool. 111. Experimental and Field Ecology.—(½ to 2 units).* Arrange. May be taken by students who can attend classes only on Saturdays. Professor SHELFORD.

Zool. 115. Factors of Individual and Racial Development.—(1 unit). 3 WF; 103 Exp. Zool. Lab. Dr. LUCE.

Zool. 117. Invertebrate Taxonomy.—(½ to 1 unit).* Arrange; 420 N.H. Professor VAN CLEAVE.

Zool. 118. Advanced Protozoology.—(1 unit). 9–12 TT; 418 N.H. Associate Professor KUDO.

Individual Research Courses

Note: These courses may be taken by students who can attend classes only on Saturdays.

Zool. 121. Invertebrate Zoology and Parasitology.—(1 to 2 units).* Arrange. Professor VAN CLEAVE, Assistant Professor THOMAS.

Zool. 122. Vertebrate Morphology.—(1 to 2 units).* Arrange. Associate Professor ADAMS.

Zool. 124. Experimental Zoology and Genetics.—(1 to 2 units).* Arrange. Professor ZELENY, Dr. LUCE, Dr. BROWN, Dr. HALL.

Zool. 125. Animal Ecology and Behavior.—(1 to 2 units).* Arrange. Professor SHELFORD, Assistant Professor KENDEIGH.

Zool. 126. Vertebrate Embryology and Cytology.—(1 to 2 units).* Arrange; 432 N.H. Professor SHUMWAY, Assistant Professor ADAMSTONE.

Zool. 128. Protozoology.—(1 to 2 units).* Arrange. Associate Professor KUDO.
